## Summary

The Regime Jurídico de Acesso e Exercício da Atividade Seguradora e Resseguradora [legal framework on the taking-up and pursuit of the business of insurance and reinsurance] approved by Law No. 147/2015, of 9 September, requires insurance undertakings and insurance groups to disclose publicly, on an annual basis, a report on their solvency and financial condition.

The qualitative information<sup>1</sup> that insurance groups are required to disclose is set out in Chapter V of Title II of Commission Delegated Regulation (EU) 2015/35, of 10 October 2014.

The quantitative information¹ to be disclosed together with this report is laid down in Articles 4 and 5 of Commission Implementing Regulation (EU) No. 2015/2452, of 2 December 2015, repealed by Commission Implementing Regulation (EU) No. 2023/895, of 4 April 2023.

In line with the description contained in Article 292 of the Delegated Regulation, a "clear and concise" summary of the items detailed in this report will be presented below.

#### **BUSINESS AND PERFORMANCE**

The Longrun Group operates in the Portuguese insurance market, selling products across all lines of business, as part of a multi-brand strategy using a vast and diversified distribution network.

The Longrun Group has a wide range of products and services available to its customers, resulting from its solid experience and the constant focus on diversification and innovation. The Group has been developing a comprehensive offer in the insurance business and reaffirming its aim of positioning itself more as a partner for its customers in the provision of protection and assistance services.

Within the scope of the insurance business, the Longrun Group has a wide range of products, which cover most Life and Non-Life lines of business.

Through the Group companies, services are also provided in other areas such as Health, Assistance, Real Estate, Asset Management, Loss Adjusting and Motor Vehicle Repairs.

The Longrun Group's strategy is based on the four pillars described in detail on the following pages: Boost Growth; Optimise Profitability; Focus on the Customer; Mobilise the Organisation. The Group integrates these four pillars, permanently respecting its commitment to society, always with a view to creating value for all stakeholders.

#### International Expansion

International expansion plays an extremely important role in the Group's growth strategy, via the geographical diversification of the business and greater resilience to adverse events. Initially, this strategy targeted markets with which Portugal had the greatest economic, cultural, and linguistic affinities, following its natural banking channel distribution partner (CGD) and by concentrating on markets where the bank was already present (Spain, France, and Macau). In 2011, the Group expanded into the Angolan market, which was followed by the Cape Verde and Mozambique markets, three years later.

Subsequently, in 2019, with the acquisition of a majority stake in the La Positiva Insurance Group in Peru and the start of operations in Chile in 2020, the Group began a new phase of international expansion, which continued with acquisitions of a majority stake in Seguradora Internacional de Moçambique (now Fidelidade Moçambique) and a majority stake in The Prosperity Group AG, which focuses on the German and Swiss markets.

The Group aims to balance the consolidation of the various international operations with the selective search of expansion opportunities in complementary markets where it can offer competitive advantages, while always ensuring compliance with all the criteria of financial and operational sustainability.

<sup>&</sup>lt;sup>1</sup> Quantitative information on monetary amounts is presented in thousands of euros, and in some circumstances the tables and graphs may present totals which do not correspond precisely to the sum of the parts, due to rounding up or down of those parts.

The Group's strategy for international expansion is based on innovation, proximity, and the establishment of synergies, in order to create a cohesive and efficient organization in all geographies.

#### Consolidated Performance

Despite a challenging context, the Longrun Group achieved a consolidated volume of written premiums totalling 5,206.9 million Euros, in 2023, an increase of 1.7% on the previous year.

The combined ratio in 2023 was 93.8%, a decrease of -5.0 p.p. compared to the previous year, reflecting reduced claims in some Non-Life business lines, namely in Workmen's Compensation and Fire and Other Damage, and increased efficiency levels, as reflected in the costs allocated to the various segments.

Non-operating results and non-attributable expenses worsened to -345.4 million Euros, which reflects the fact that the corresponding 2022 result was boosted by non-recurring events. As a result of the above-mentioned developments, particularly the insurance contract results, the net profit increased by 6.2% compared to 2022, to 152.8 million Euros.

Life business fell by 7.5% on the previous year to 2,305.4 million Euros, reflecting the evolution of Financial Life premiums in Portugal, which was negatively impacted by the new interest rate environment, which made lower risk products (such as bank deposits or savings certificates) more appealing as an alternative to insurance-related financial products.

In contrast, the Life business at an international level recorded a growth of 11.7% compared to the previous year, benefiting from the performance of international operations, in particular from The Prosperity Company group, which performs its activity in several European markets.

In the Non-Life segment, the Group grew 10.5% in 2023 to 2,901.5 million euros, with a positive performance in all business lines and in most geographies. It should also be noted that in 2023, the international business represented about a third (33.3%) of the total volume of Non-Life written premiums.

In Portugal, the Group performed well in Non-Life segment premiums, growing 10.9% compared to the previous year and above the market average (10.1%), growth to which most business lines contributed. This evolution allowed its Non-Life market share to increase by 0.2 p.p. to 29.0%.

In terms of Non-Life activity, the Workers' Compensation and Health lines of business recorded the highest growth, with total premiums reaching 333.2 and 479.1 million euros, respectively. It should also be noted that the Group market share in Portugal for Workers' Compensation increased to 1.3 p.p. to 29.2%.

In the Life business in Portugal, the Group registered a premiums' decrease of 14.4%, compared to the previous year, influenced by the unfavourable evolution of Life Financial products.

The amount of premiums from the international business reached 1,702.8 million euros in 2023, recording a growth of 10.6% compared to the previous year, reflecting the contribution of Life and Non-Life segments.

Non-Life activity grew 9.7%, with Peru, Chile and Spain being the geographies that contributed most to the increase of 85.4 million euros in international Non-Life premiums.

The Workers' Compensation business line grew very positively (22.3%), driven by the Group's business in Peru, Cape Verde, and Macao. On the other hand, the Fire and Other Damage line grew by 17.6%, influenced by the Group's business in Peru and Chile.

The Life Risk and Annuities line, which holds a significant weight in the Latin American business, recorded a growth of 2.1%, reflecting mainly an increase in operations in Bolivia and Peru.

For its part, the Financial Life branch grew by 21.0%, largely driven by the activity of The Prosperity Company group.

#### SYSTEM OF GOVERNANCE

As an insurance holding company, Longrun, SGPS, SA., does not carry out insurance or reinsurance activities.

Since Fidelidade – Companhia de Seguros, SA, is the most representative company of the Group, the governance requirements applied to the insurance Group are defined therein. Accordingly, the relevant body to which the Group's governance requirements apply is the Executive Committee of Fidelidade – Companhia de Seguros, S.A..

Fidelidade has processes to assess the fit and proper requirements of the people who effectively run the Company, supervise it, are its managers or perform key functions within it.

The remuneration policy applicable to the management body and the way the practices in it are established promote sound and effective risk management and do not encourage excessive risk-taking.

Likewise, key functions of risk management, internal audit, actuarial and compliance, within the risk management and internal control systems, are carried out by Fidelidade bodies which perform functions across the Fidelidade Group's insurance business in Portugal and perform a supervisory role internationally.

The companies in the international sphere are very homogeneous in terms of respect for regulations and the local context, together with adequate articulation with the Group, resulting in a governance model that operates in two areas: independently and dependently, reporting to the central Board.

The Fidelidade Group's insurance area has implemented processes and procedures for managing risk by type of risk – strategic risk, underwriting risk (product design and pricing; underwriting; reserving; claims management processes; reinsurance and alternative risk transfer), market risk, counterparty default risk, concentration risk, liquidity risk and reputational risk.

Fidelidade's ORSA Policy aims to establish general principles for the own risk and solvency assessment. The ORSA plays a critical role in the management of the Fidelidade Group companies, and the results obtained from it are taken into consideration in Risk Management, Capital Management and Decision Making.

The rules and principles that the internal audit function must comply with are established in the Internal Audit Policy.

The internal audit function is performed with independence, impartiality and objectivity, and mechanisms have been set up to preserve these principles.

Due to the nature, complexity and scale of the Companies' portfolios, the actuarial function is subdivided into life actuarial and non-life and health actuarial. These actuarial functions are independent in functional terms.

A series of objective and transparent rules, which are subject to specific approval mechanisms, are applicable to transactions with related parties.

The operational risk and internal control management processes described in this report enable the dissemination, to all the Group Companies, of a culture of risk management, thereby strengthening the protection of their stakeholders, in particular, the policyholders and beneficiaries.

There were no material changes in the system of governance either of Fidelidade or of the Companies owned by it, during the period covered by this report.

#### **RISK PROFILE**

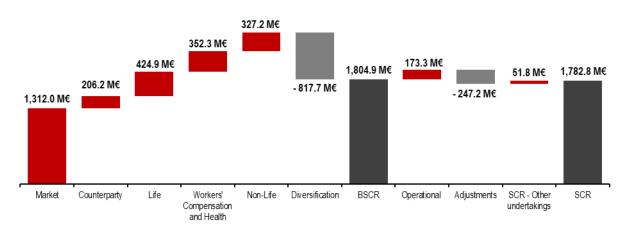

Risk management is an integral part of the daily activities of the Longrun Group Companies. An integrated approach is applied to ensure that the Group Companies' strategic objectives (customers' interests, financial strength and efficiency of processes) are maintained.

Accordingly, to outline Longrun Consolidated's risk profile the various risks to which the Group is exposed are identified and then assessed.

The risk assessment is based on the standard formula used to calculate the solvency capital requirement. For other risks, not included in that formula, the Group has opted to use a qualitative analysis to classify the foreseeable impact on its capital needs.

Hence, the calculation of Longrun's solvency capital requirement (SCR) with reference to 31 December 2023 was as follows:

#### **Breakdown SCR 2023**

The market risk is clearly prominent in this requirement, followed by the much lower underwriting risks (of which the Life underwriting risk is more significant) and counterparty default risk. Operational risk is the lowest of the risk modules that make up the SCR calculated on the basis of consolidated data in line with Article 336 a) of Delegated Regulation (EU) 2015/35.

During the period covered by this report, there was an increase in the solvency capital requirement (SCR) of around 1.4 million euros, when compared with the figure at 31 December 2022.

#### Evolution SCR 2022-2023 71.1 M€ 44.0 M€ 24.9 M€ 14.3 M€ 1.4 M€ -8.7 M€ -9.1 M€ -13.5 M€ -47.9 M€ -60.8 M€ -60.8 M€ Market Counterparty Life Workers' Non-Life Diversification BSCR Operational Adjustments SCR - Other SCR Compensation undertakings and Health

The following elements can be highlighted in this evolution:

- The decrease in the market risk, as detailed in Chapter C.2.;
- The increase in the non-life underwriting risk, presented in Chapter C.1.2.: and
- The increase in the workers' compensation and Health underwriting risk, presented in Chapter C.1.3.: and
- The decrease in the counterparty default risk, presented in Chapter C.3.;
- The increase in operational risk, presented in Chapter C.5..

Various risk mitigation techniques are in use, or are being studied, at Fidelidade, for a series of risks to which Longrun is exposed.

Risks that do not fall within the standard formula are identified and assessed as part of the ORSA process. No materially significant risks were identified at Group level that are not incorporated in the standard formula.

#### VALUATION FOR SOLVENCY PURPOSES

A description is provided of the bases, methods and main assumptions used for the valuation of assets for solvency purposes, and how these compare with those used in the financial statements. This information is divided into financial assets, real estate assets and other assets.

Recoverable amounts from reinsurance contracts and special purpose vehicles are also presented.

Amounts in thousand euros

| Assets                   | Solvency II | Financial statements | Difference | Solvency II<br>previous year |
|--------------------------|-------------|----------------------|------------|------------------------------|
| Financial assets         | 15,905,731  | 16,052,374           | -146,643   | 15,432,852                   |
| Real estate assets       | 542,077     | 521,151              | 20,926     | 627,971                      |
| Other assets             | 1,425,163   | 1,548,966            | -123,803   | 1,744,438                    |
| Reinsurance recoverables | 426,387     | 756,181              | -329,794   | 360,452                      |
| Total                    | 18,299,358  | 18,878,672           | -579,314   | 18,165,713                   |

The differences are in the following classes of assets:

Holdings in related undertakings, including participations

This results from the valuation, for solvency purposes, of unlisted subsidiaries using the Adjusted Equity Method (AEM). The total net value of these holdings for solvency purposes fell by 83,672 thousand euros.

The total difference includes (among less relevant others) the impacts of the valuation of Luz Saúde S.A. by the Adjusted Equity Method (the value of this participation, for solvency purposes, fell by 296,904 thousand euros) and of Fidelidade Property Europe (increase of 212,590 thousand euros in the valuation for solvency purposes).

#### Equities - listed

This results from valuation adjustments to standardise prices of assets held in more than one geography, the valuations of which in the individual accounts were obtained at different times (different time zones).

#### Equities - unlisted

This results from the valuation, for solvency purposes, of unlisted securities using the Adjusted Equity Method (AEM).

#### Government bonds

The difference corresponds to potential gains from the portfolio of financial assets valued at amortised cost recognised in Solvency II.

#### Corporate bonds

This results from valuation adjustments to standardise exchange rates on assets held outside the Euro area and the price of assets held in more than one geography.

#### Collective investment undertakings

This results from funds valuation adjustments where the look-through approach was applied. In the statutory financial statements, the available valuation at the close of accounts date was considered. In some funds this did not correspond to the year-end valuation. For Solvency II purposes, it was possible to consider the year-end valuation that was made available in the meantime by the collective investment undertakings.

#### Derivatives

The Solvency II adjustment in this heading is justified by the revaluation made to reflect the full economic impacts on the Solvency II Balance Sheet, relating to the sale/purchase option existing over 12.1% of the capital of Fidelidade Moçambique – Companhia de Seguros S.A. (previously Seguradora Internacional de Moçambique, S.A.). These impacts are reflected in other balance sheet headings, namely "Holdings in related undertakings, including participations" and "Financial liabilities other than debts owed to credit institutions".

#### Deposits other than cash equivalents

Most of the Solvency II adjustment is due to the fact that as of the Q4 2022 report, assets relating to margin and collateral accounts were no longer included under the balance sheet heading "Deposits other than cash equivalents" due to a change in the classification. Following the ASF's guidelines, this amount is now reflected under the heading "Any other assets, not elsewhere shown". The remaining amount of the adjustment is due to reclassifications under Solvency II.

#### Assets held for index-linked and unit-linked contracts

The difference results from adjustments to the valuation of the funds in unit-linked portfolios, where the look-through approach was applied. In the financial statements, the available valuation at the close of accounts date was considered. In some funds this did not correspond to the year-end valuation. For Solvency II purposes, it was possible to consider the year-end valuation that was made available in the meantime by the collective investment undertakings. The remaining amount of the adjustment is due to reclassifications under Solvency II.

#### Property, plant and equipment held for own use

In the financial statements the valuation at cost was considered, and hence the difference results from the fact that in Solvency II property is valued at fair value, as required by the Supervisory Authorities.

#### Collective investment undertakings

This results from funds valuation adjustments where the look-through approach was applied. In the statutory financial statements, the available valuation at the close of accounts date was considered. In some funds this did not correspond to the year-end valuation. For Solvency II purposes, it was possible to consider the year-end valuation that was made available in the meantime by the collective investment undertakings.

#### Goodwill and deferred acquisition costs

The value of these assets for solvency purposes is zero, in accordance with the Delegated Regulation.

#### Intangible assets

In order for these assets to have a value in the balance sheet for solvency purposes, they must be able to be sold separately and, moreover, it would be necessary to demonstrate that there is an active market in which similar intangible assets are traded. Given that the Group's assets considered in this class do not meet these requirements, their value for solvency purposes is zero.

#### Deferred tax assets

The difference results from the application of the tax rate to losses with taxable temporary differences implicit in the balance sheet for solvency purposes, that is, after adjustments with a negative impact on own funds.

#### Other loans and mortgages

The difference results from the evaluation for solvency purposes.

#### Loans on insurance policies

This results from the difference, when negative, between the loan balances, which were considered in the valuation for Solvency purposes under the heading "Any other liabilities, not elsewhere shown" in other liabilities.

#### Insurance and intermediaries receivables

The difference relates to receivables for reimbursement of amounts paid out in claims. This amount is considered in the technical provisions, given that its valuation for solvency purposes is net of these receivables.

#### Cash and cash equivalents

This results from the difference, when negative, between the balances of current accounts, which were considered in the valuation for Solvency purposes under the heading "Any other liabilities, not elsewhere shown" in other liabilities.

#### Any other assets, not elsewhere shown

As of the quarterly report relating to Q4 2022, assets relating to margin and collateral accounts were no longer included under the balance sheet heading "Deposits other than cash equivalents" due to a change in the classification. Following the ASF's guidelines, this amount is now reflected under the heading "Any other assets, not elsewhere shown".

#### Reinsurance and special purpose vehicles recoverables

The differences result from the method applied to calculate the best estimate, which uses assumptions different to those considered in the financial statements, such as:

- Different discount structures of estimated liabilities;
- Methodological differences when valuing liabilities for remaining coverage reflected in the financial statements and in the Solvency II premium provision.

The valuation of technical provisions for solvency purposes and a comparison with that used in the financial statements is presented in this report, segmented into:

- Life;
- Non-Life;
- Health:
  - SLT (Similar to Life Techniques);
  - NSLT (Not Similar to Life Techniques).

Amounts in thousand euros

| Line of Business | Solvency II | Financial statements | Difference | Solvency II<br>previous year |
|------------------|-------------|----------------------|------------|------------------------------|
| Life             | 10,185,075  | 11,009,128           | -824,053   | 10,443,433                   |
| Non-Life         | 1,219,571   | 1,398,355            | -178,784   | 1,298,772                    |
| Health – SLT     | 1,117,119   | 1,181,444            | -64,325    | 984,228                      |
| Health – NSLT    | 468,282     | 475,650              | -7,368     | 466,566                      |
| Total            | 12,990,047  | 14,064,577           | -1,074,530 | 13,192,999                   |

#### Life

For risk products the differences are basically justified by the different times when future profits are recognised as own funds for the set of temporary annual renewable (TAR) group life insurance contracts with the extension of the contract boundary, as described in point D.5.2. This recognition of future profits has a positive impact on the Group's solvency capital requirement coverage ratio of around 3.5 p.p.

For annuities products, the differences are essentially the result of applying the risk-free interest rate term structure.

The differences in the index-linked and unit-linked class arise from the current value of the difference between the estimated technical management costs and the future management costs.

For capital redemption products, without profit participation, the differences result, on the one hand, from the application of the transitional measure on technical provisions and, on the other, from the difference between the rates guaranteed to customers and the rates contained in the reference interest rates curve (see point D.2.6). For a set of products with profit sharing where the discretionary component is not materially significant, these were classified for the purposes of valuation of the technical provisions according to the financial statements, within the scope of IFRS 9.

#### Non-Life

The main differences identified between the amounts in the financial statements and the Solvency II technical provisions are the result of:

- The application of different discounting structures;
- Methodological differences when valuing liabilities for remaining coverage reflected in the financial statements and in the Solvency II premium provision;
- Methodological differences when valuing the margin for non-financial risks in Solvency II (Risk Margin, in line with the standard formula) and in the financial statements (risk adjustment, in line with IFRS 17).

#### Health-SLT

Considering the adjustment of the transitional measure on technical provisions, the impact of revaluing the provisions results fundamentally from the evolution of the interest rates term structures referred to in point D.2.6.

#### **Health-NSLT**

The main differences identified between the amounts in the financial statements and the Solvency II technical provisions are the result of:

- The application of different discounting structures;
- Methodological differences when valuing liabilities for remaining coverage reflected in the financial statements and in the Solvency II premium provision;
- Methodological differences when valuing the margin for non-financial risks in Solvency II (Risk Margin, in line with the standard formula) and in the financial statements (risk adjustment, in line with IFRS 17).

Pursuant to Article 25 of Law No. 147/2015, of 9 September, the Group applied the transitional deduction to technical provisions on the first day of 2023. The table below shows the amount of that deduction at 31 December 2023:

Amounts in thousand euros

|              |   | Transitional Deduction    |                    |   |                         |  |
|--------------|---|---------------------------|--------------------|---|-------------------------|--|
| Lines of b   | usiness/ Homogeneous risk groups  | Recalculation<br>1/1/2019 | Annual<br>decrease | Accumulated<br>decrease to<br>31/12/2023<br>(4 years) | Amount at<br>31/12/2023 |  |
| 29 and<br>33 | Life insurance obligations - Health – SLT   | 256,882                   | -19,760            | -79,041   | 177.841                 |  |
| 30           | Life insurance obligations - Insurance with profit sharing - Capital redemption products        | 137,145                   | -10,550            | -42,198   | 94.947                  |  |
| 32           | Life insurance obligations - Other obligations similar to life -<br>Capital redemption products | 192,764                   | -14,828            | -59,312   | 133.452                 |  |
| Total        |   | 586.791                   | -45,138            | -180,551  | 406,240                 |  |

A comparison is also provided between the valuation of other liabilities for solvency purposes and their valuation in the financial statements.

Amounts in thousand euros

| Liabilities       | Solvency II | Financial statements | Difference | Solvency II<br>previous year |
|-------------------|-------------|----------------------|------------|------------------------------|
| Other liabilities | 2,484,849   | 2,205,840            | 279,009    | 2,267,142                    |
| Total             | 2,484,849   | 2,205,840            | 279,009    | 2,267,142                    |

The differences, by class of liability, are:

#### Deferred tax liabilities

The difference results from the application of the tax rate to gains with taxable temporary differences implicit in the balance sheet for solvency purposes, that is, after adjustments with a positive impact on own funds.

#### Derivatives

The Solvency II adjustment in this heading is justified by the revaluation made to reflect the full economic impacts on the Solvency II Balance Sheet, relating to the sale/purchase option existing over 12.1% of the capital of Fidelidade Moçambique – Companhia de Seguros S.A. (previously Seguradora Internacional de Moçambique, S.A.). These impacts are reflected in other balance sheet headings, namely "Holdings in related undertakings, including participations" and "Financial liabilities other than debts owed to credit institutions".

#### Financial liabilities other than debts owed to credit institutions

The Solvency II adjustment in this heading is justified by the revaluation made to reflect the full economic impacts on the Solvency II Balance Sheet, relating to the sale/purchase option existing over 12.1% of the capital of Fidelidade Moçambique – Companhia de Seguros S.A. (previously Seguradora Internacional de Moçambique, S.A.). These impacts are reflected in other balance sheet headings, namely "Holdings in related undertakings, including participations" and "Derivatives".

#### Reinsurance payables

The difference relates to reinsurance ceded payables for reimbursement of amounts paid from index-linked and unit-linked contracts. For solvency purposes these payables are included in the Life reinsurance recoverables, index-linked and unit-linked, the valuation of which was net of these.

#### Subordinated liabilities

The difference is due to the fact that in Solvency II subordinated liabilities are valued at fair value, while in the financial statements they are initially recognised at fair value (less directly related transaction costs) and subsequently measured at amortised cost.

Any other liabilities, not elsewhere shown

This results from the difference, when negative, between the balances of current accounts related with futures contracts and the components relating either to the valuation of unmatured contracts (recorded under the heading "Derivatives") or to the initial margin (collateral), which were considered in the financial statements valuation under the heading "Any other assets, not elsewhere shown", and "Sight deposits" with negative balances which were considered in the financial statements valuation under the heading "Cash and cash equivalents".

#### CAPITAL MANAGEMENT

Method 1 (accounting consolidation-based method) described in Article 270 of the Legal Framework on the Taking-up and Pursuit of the Business of Insurance and Reinsurance, approved by Law No. 147/2015, of 9 September, was used to calculate the Group's solvency, using the net data of any intra-group transactions.

The table below presents a comparison of the own funds as set out in Longrun's financial statements and the excess of assets over liabilities calculated for solvency purposes:

Amounts in thousand euros

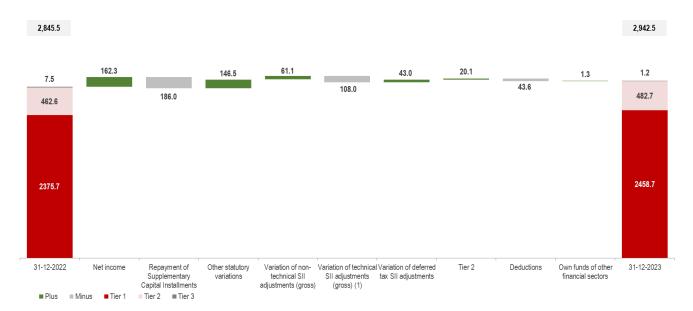

|                                   | Solvency II | Financial statements | Difference | Solvency II<br>previous year |
|-----------------------------------|-------------|----------------------|------------|------------------------------|
| Assets                            | 18,299,358  | 18,878,672           | -579,314   | 18,165,713                   |
| Technical Provisions              | 12,990,047  | 14,064,577           | -1,074,530 | 13,192,999                   |
| Other liabilities                 | 2,484,849   | 2,205,840            | 279,009    | 2,267,142                    |
| Excess of assets over liabilities | 2,824,462   | 2,608,255            | 216,207    | 2,705,572                    |

The table below shows the amounts of own funds available and eligible to meet the solvency capital requirement (SCR) and the minimum capital requirement (MCR), classified by tier, relating to 31 December 2023 and 31 December 2022:

Amounts in thousand euros

|        | Amounts in trousund cures  |                            |                            |               |           |               |
|--------|----------------------------|----------------------------|----------------------------|---------------|-----------|---------------|
|        |                            | Eligible own funds to meet |                            |               |           |               |
|        |                            | SC                         |                            |               |           |               |
|        | Including financial sector | previous year              | Excluding financial sector | previous year | MCR       | previous year |
| Tier 1 | 2,458,681                  | 2,375,337                  | 2,454,664                  | 2,372,970     | 2,454,664 | 2,372,970     |
| Tier 2 | 482,667                    | 462,590                    | 482,667                    | 462,590       | 128,909   | 125,777       |
| Tier 3 | 1,183                      | 7,541                      | 1,183                      | 7,541         | 0         | 0             |
| Total  | 2,942,531                  | 2,845,468                  | 2,938,514                  | 2,843,101     | 2,583,573 | 2,498,747     |

The graph below shows the main changes to the Longruun 's available own funds during the period covered by this report, in million euros:

(1) Includes the reduction of the Transitional Measure on Technical Provisions of 45,1 million euros.

When calculating the Solvency Capital Requirement (SCR), Longrun's insurance companies use the standard formula and do not apply any internal model.

Calculation of capital requirements of the currency risk sub-module includes the effect of hedging of exchange rate exposure of assets held in portfolio denominated in American dollars (USD), Hong Kong dollars (HKD) and Pounds sterling (GBP), via the use of futures and foreign exchange forwards and swaps, and of assets denominated in Yen (JPY) and Swiss francs (CHF), via the use of foreign exchange forwards.

The counterparty default risk module also takes into account exposure to counterparties with which the above-mentioned hedging is performed.

The consolidated group solvency capital requirement (SCR) and the minimum consolidated group capital requirement (MCR), and the respective coverage ratios, relating to 31 December 2023 were as follows:

Amounts in thousand euros

|                                | Capital Requirements | Capital Requirements<br>previous year | Coverage Ratio | Coverage Ratio<br>previous year |
|--------------------------------|----------------------|---------------------------------------|----------------|---------------------------------|
| SCR                            | 1,782,832            | 1,781,475                             | 165.05%        | 159.73%                         |
| SCR excluding financial sector | 1,782,832            | 1,781,475                             | 164.82%        | 159.59%                         |
| MCR                            | 644,546              | 628,884                               | 400.84%        | 397.33%                         |

Lastly, it should be stressed that if the Longrun did not apply the transitional deduction to technical provisions, the consolidated group solvency capital requirement (SCR) would be 156.10%.

## A. Business and Performance

No activities or other significant events with a material impact on the Group occurred during the period covered by this report.

Notwithstanding, comparisons with the information included in the 2022 report are presented throughout this chapter.

#### A.1. Business

#### A.1.1. Name and legal form

Longrun Portugal, SGPS, S.A. ("Longrun" or "Company"), with its registered office in Lisbon, Portugal, at Largo do Calhariz, no 30, was incorporated on February 13, 2014 and its corporate purpose is to manage shareholdings in other companies, as an indirect way of carrying out economic activities. Since that date, it has been part of the Fosun International Holdings Ltd. Group.

It holds interests in other insurance companies and other subsidiaries, associates and joint ventures, which together form the Longrun Group. The Group's insurance Companies held by Lomgrun include Fidelidade - Companhia de Seguros, S.A. ("Fidelidade"), Via Directa - Companhia de Seguros, S.A. ("Via Directa"), Companhia Portuguesa de Resseguros, S.A. ("CPR"), Garantia - Companhia de Seguros de Cabo Verde, S.A. ("Garantia"), Fidelidade Angola - Companhia de Seguros, S.A. ("Fidelidade Angola"), Multicare - Seguros de Saúde, S.A. ("Multicare"), Fidelidade Assistência - Companhia de Seguros, S.A. ("Fidelidade Macau - Companhia de Seguros, S.A. ("Fidelidade Macau"), Fidelidade Macau Vida - Companhia de Seguros, S.A. ("Fidelidade Macau Vida"), La Positiva Seguros Y Reaseguros S.A. ("La Positiva"), La Positiva Vida Seguros y Reaseguros S.A. ("Alianza Vida"), Alianza Compañía de Seguros y Reaseguros E.M.A. S.A. ("Alianza"), Alianza Garantía Seguros Y Reaseguros S.A. ("Fidelidade Moçambique - Companhia de Seguros, S.A. ("Fidelidade Moçambique") and Liechtenstein Life Assurance AG ("LLA").

#### A.1.2. Supervisory authority responsible for financial supervision of the group

The Autoridade de Supervisão de Seguros e Fundos de Pensões (ASF, the Portuguese Insurance and Pension Funds Supervisory Authority), with its head office at Av. da República, 76, 1600-205 Lisbon, is the national authority responsible for the regulation and supervision of insurance, reinsurance, pension funds and respective management companies and insurance mediation companies, from both a prudential and a market conduct point of view.

For the purposes of Supervision of Insurance Groups, the ASF is also the supervisor of the Longrun Group.

#### A.1.3. Statutory Auditor

The Statutory Auditor, at 31 December 2023, is Ernst & Young Audit & Associados – SROC, S.A., represented by Ricardo Nuno Lopes Pinto, Statutory Auditor no. 1579, registered with the Portuguese Securities Market Commission under licence no. 20161189.

The Statutory Auditor was appointed on 26 September 2014 and reappointed on 30 May 2023 to perform its duties regarding the 2023 financial year.

In addition to the statutory audit and audit work, Ernst & Young Audit & Associados – SROC, S.A. provides the following services required by law, on a recurring basis:

 Certification of the Solvency and Financial Condition Annual Report within the scope of ASF Regulatory Standard no. 2/2017-R, of 24 March;

 Opinion on the adequacy of the remuneration policy, pursuant to Article 1118(3 and 4) of ASF Regulatory Standard no. 4/2022-R, of 26 April.

Besides the work mentioned above, Ernst & Young Audit & Associados – SROC, S.A. does not provide the Company, or companies that are in a control relationship with it, with any other type of services on a recurring basis.

However, when other services are provided to the Company, or to companies that are in a control relationship with it, this is in strict compliance with the procedures defined in law, namely in Law No. 140/2015, of 7 September.

#### A.1.4. Holders of qualifying holdings

The qualifying shares in the Company's share capital at 31 December 2023, and the percentage of capital and votes allocated and source and causes of allocation, are set out in the table below.

| Shareholder             | Number of Shares | % Share Capital | % Voting Rights | Source and Causes of<br>Allocation |
|-------------------------|------------------|-----------------|-----------------|------------------------------------|
| Millennium Gain Limited | 50,000           | 100%            | 100%            | Constitution                       |
| Total                   | 50,000           | 100%            | 100%            | -                                  |

At 31 December 2023, the members of the management and supervisory bodies did not hold shares or bonds in the Company.

#### A.1.5. Insurance group structure

#### SHAREHOLDER STRUCTURE

Longrun is 100% owned by Millennium Gain Ltd (Hong Kong), of the Fosun Group. The Fosun Group is one of the largest private Chinese conglomerates with an international presence that is listed (Fosun International Limited) on the Hong Kong stock exchange (00656.HK). The Fosun Group has shareholdings in several sectors including insurance, banking, the pharmaceutical industry and tourism, among others.

Longrun's principal asset is its 84.9892% stake in Fidelidade - Companhia de Seguros, S.A. ("Fidelidade"), which is the company that heads the Fidelidade Group.

#### **GROUP COMPANIES**

Through its participation in the Fidelidade Group, Longrun operates in the Portuguese insurance market through five companies: Fidelidade, Multicare, Fidelidade Assistência, Via Directa and Companhia Portuguesa de Resseguro. In the international market it operates through its branches – in Spain, France, Luxembourg and Mozambique – and through its subsidiaries - Fidelidade Angola, Garantia (Cabo Verde), SIM (Mozambique), Fidelidade Macau, La Positiva (Peru), Alianza (Bolivia), Alianza Garantia (Paraguay), Fid Chile Chile and The Prosperity Company (Liechtenstein). The Fidelidade also has subsidiaries and strategic shareholdings in companies that provide services that are complementary to insurance (e.g. the Luz Saúde Group, CETRA, EAPS, Fidelidade Property, Tenax, etc.), these fit within the strategy of guaranteeing operational excellence and service quality throughout the value chain, enabling the Group to position itself as a global service provider of people protection.

The main companies in Longrun's consolidation (hereinafter "Group") perimeter are:

88%

#### ASIA-PACIFIC

Fidelidade has been present in Macao since 1999, with a diverse offer of protection solutions for private clients and companies. It initially operated through local branches and subsequently through companies incorporated under local law: Fidelidade Macau – Companhia de Seguros, S.A. that sell Non-Life and Life insurance through an agents' network and Banco Nacional Ultramarino ("BNU"), with which they have a bancassurance agreement.

100%

Fidelidade Angola - Companhia de Seguros, S.A., (formerly Universal Seguros, S.A.), was founded in 2011 and currently ranks third in the Angolan market. It trades in the Non-Life and Life segments, where it offers a diversified range of products, particularly its comprehensive offer in the corporate segment.

70%

Garantia - Companhia de Seguros de Cabo Verde, S.A., is the primary insurer in the Cape Verde market, and trades in the Life and Non-Life insurance segments with a wide range of products, including health insurance, of which it is a pioneer in this market. These products are distributed by its branches, brokers and via banking channel strategic partnerships, i.e. Banco Comercial do Atlântico, which is also its shareholder.

55.9%

Fidelidade Moçambique - Companhia de Seguros, S.A. (formerly Seguradora Internacional de Moçambique, S.A.), is one of the largest and most experienced insurance companies in Mozambique and offers a wide range of products in the Life and Non-Life segments. It ranks third in the Mozambican insurance market, and its presence throughout the country is ensured by a network of branches in the provincial capitals, under the Fidelidade Impar brand, and via exclusive access to the Millennium BIM network, which is one of the largest banks in Mozambique.

70%

#### LATIN AMERICA

La Positiva Seguros y Reaseguros S.A., was founded in 1937, and leads the La Positiva Group, which has been one of the main players in the Peruvian insurance market for over 80 years. It currently ranks third in the market and has more than three million customers in the country. La Positiva's mission involves confinuous improvement, risk management expertise, and a growing presence in the insurance market, in which it focuses on the development and launching of innovative products. This strategy is reinforced by collaboration with strategic partners and the effective use of distribution channels, which not only strengthen the company's market position, but also increase its standards of excellence and agility in customer service.

93.9%1

- Bolivia via its holdings in the Alianza Compañía de Seguros y Reaseguros S.A. E.M.A. and Alianza Vida Seguros y Reaseguros, S.A.
- Paraguay via its holding in Alianza Garantia Seguros y Reaseguros S.A.

In addition to its strong presence in Peru, Grupo La Positiva has expanded its operations to:

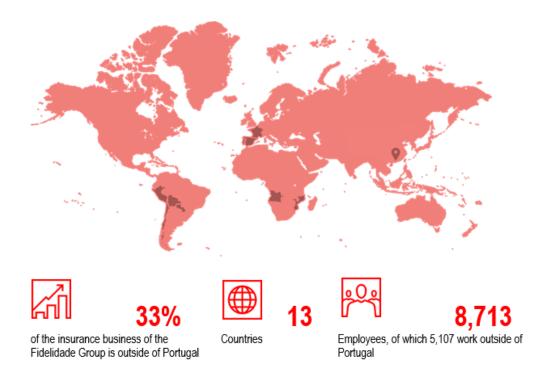

FID Chile Seguros Generales S.A. is an insurance company in the Non-Life segment that began operating in January 2020, after having obtained authorisation from the Chilean regulator in the final quarter of 2019. FID Chile has developed a range of Non-Life products aimed at individual and corporate customers, and distributes these through brokers and other non-traditional channels.

#### In terms of the Insurance Area:

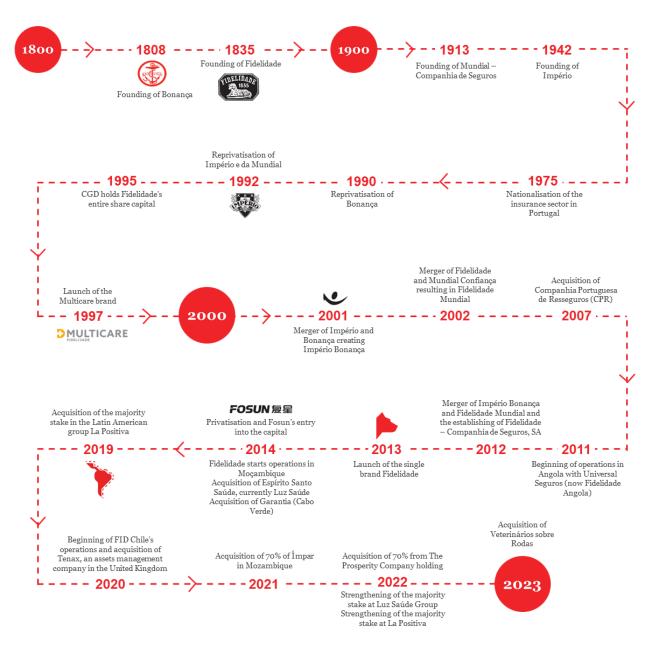

A.1.6. Group business

#### THE THIRD OLDEST INSURANCE COMPANY IN THE WORLD

Two centuries of history have contributed to the current credibility, size and solidity of the companies in the consolidation perimeter of Longrun Portugal, SGPS, S.A. ("Longrun").

Its origins date back to 1808, when Seguradora Bonança was founded. The Group has grown over 215 years, through a long organic process of mergers, which involved more than 50 insurance companies and four core brands, Bonança, Fidelidade, Mundial and Império, which culminated in Fidelidade being chosen as its sole brand in 2013. This growth was also marked by the launch of pioneering brands such as Multicare (health insurer) and ok! seguros (direct insurer) and, more recently, by an acquisitions strategy and the launch of greenfield operations, both in Portugal and internationally. The Group's recent history is defined by the privatisation process that took place in 2014, when the Portuguese State, acting via Caixa Geral de Depósitos, sold around 85% of the Group's share capital to the Fosun Group. This initiated a new phase marked by the consolidation of the leadership in Portugal and international expansion.

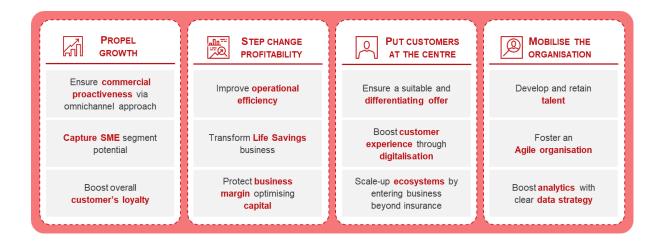

Today, the Group is present on four continents, and in 13 countries, and serves 9.1 million customers. Its geographical diversity and the strength of its brands make its business more solid, by giving it greater resilience to adverse contexts and by ensuring new opportunities for growth.

As a result of its ambition to go further and to fortify its presence in the international market, Fidelidade has been implementing a model of high proximity between local teams and central services, by taking advantage of best practices at a global level and valuing the local characteristics of its various operations.

#### LONGRUN GROUP STRATEGY

The Longrun Group's strategy is based on the four pillars described in detail on the following pages: Boost Growth; Optimise Profitability; Focus on the Customer; Mobilise the Organisation. The Group integrates these four pillars, permanently respecting its commitment to society, always with a view to creating value for all stakeholders.

#### **BOOST GROWTH**

#### Ensure commercial proactiveness via omnichannel approach

The Group relies on the strength of its brands, its presence in various distribution channels, its recognised technical capabilities, and its culture of innovation, in order to strengthen its presence in the markets in which it operates and reach more and more customers. The continuous work to improve commercial dynamics and strengthen interaction between the various sales channels also enhances the offer of an omnichannel experience and the adaptation of products to customer expectations. This action plan supports an increase in market share and greater resilience in the face of external adversity. At the same time, the potential identified in the Life segment in European markets, strengthened by Group's position in the savings ecosystem in Portugal, has been one of the drivers of growth.

#### Capture SME segment potential

The Group aims to grow in the SME segment, by increasing its customer portfolio percentage, via a modular offer, new tools, and a commitment to the streamlining of points of sale. It also aims to attract new customers in priority segments via a more targeted sectoral approach.

The Group has therefore been working on renewing its integrated value propositions for SMEs in terms of segmentation, offer, tools, market approach and operating model.

#### Boost overall customer's loyalty

The Group has been developing value propositions centred on the launch of programmes such as Fidelidade Drive and Multicare Vitality, which promote safe and responsible driving and healthy habits, respectively, in order to promote customer loyalty. By signing up to these programmes, customers are challenged to meet a set of goals for safe driving and healthy habits which, once achieved, allow them to accumulate points, which they can redeem at a wide variety of shops and services.

#### STEP CHANGE PROFITABILITY

#### Improve operational efficiency

Automation and technologies enable continuous improvement of the efficiency of the business, by driving digitalisation of the relationship with customers and distribution partners. As a result, the Group has redirected its people to higher value-added

activities, due to the automation and improvement of internal processes that do not require human intervention and increased efficiency in various aspects of the business, namely underwriting and claims management.

#### **Transform Life Savings business**

In order to consolidate its prominent position in the savings area in Portugal and being aware of its importance as an economic agent, the Group has been transforming its Financial Life business over the last few years.

Therefore, in order to promote savings and encourage responsible financial behaviour, the Group has carried out a series of financial literacy initiatives with training measures and the provision of training content, in both face-to-face and digital formats, with a view to increasing the acquisition of financial products adjusted to individual needs and the financial and sustainable planning of the entire population.

The structuring of Fidelidade's entire product offering is based on simplicity and accessibility, which allows it to be adjusted to the life cycle and objectives of each stage of people's lives, with a medium/long-term risk/return balance.

At the same time, the Group is making progress towards incorporating ESG criteria into its offer and its investment, procurement, underwriting and operating processes, and is seeking to make a difference by assessing impacts and making decisions that impact environmental and social factors in a way that is aligned with the Group's purpose, values, and corporate strategy.

#### Protect business margin optimising capital

Adaptation to the market and regulatory context in which the Group operates, together with the integration of ESG issues into its investment decisions, optimises the management of the investment portfolio, by acting as a responsible investor. The Group seeks to maximise the return/risk factor, while ensuring the prudence that has always characterised its operations. This optimisation also focuses on diversifying investments, either geographically or in terms of asset classes, to mitigate risks and ensure protection against adverse market contexts.

#### PUT CUSTOMERS AT THE CENTRE

#### Ensure a suitable and differentiating offer

The Group's ambition is not only to offer insurance and mutualise the customer's risk, but to actively support them in managing their risks. That requires the development of new integrated product ranges in the ecosystems in which it operates, offering products and services outside its primary activity and increasingly focused on preventing and solving the customer's holistic needs. The Group has taken this path in areas such as Mobility, Heritage, Health, and Assistance through the internalisation of various services relevant to the activity and also through forging strategic partnerships.

In view of the increasing complexity of the market and the increasing demand of consumers, the Group continuously aim to leverage its presence along the value chain, in order to offer a differentiated value proposition and continue to introduce sustainability criteria that foster ecological transition and social well-being.

#### Boost customer experience through digitalisation

The best solutions result from processes that connect improving the customer experience with process operational efficiency. To this end, the Group invests in solutions that involve the digitalisation and automation of processes, through the development of various business initiatives aimed at implementing and developing innovative products and service models.

#### Scale-up ecosystems by entering businesses beyond insurance

With its strategy of the creation of differentiated value propositions, the Group has built five ecosystems by leveraging digital, where it offers products other than insurance: Health Ecosystem, Home/Family Ecosystem, Mobility Ecosystem, Savings Ecosystem and Pets Ecosystem.

#### Develop and retain talent

In order to achieve its strategic objectives of growth, profitability and customer focus, the Group is attentive to change and to trends in the sector in order to ensure that it has the talent needed today for the challenges of the future, in line with its ambition to become a benchmark employer. To that end, it has developed an action plan that allows it to respond to challenges and fill potential gaps identified, from the talent available in the market, in a structured way.

The Group continues to focus on measures that promote its values, purpose, and identity among its employees and that create a community spirit, namely via social responsibility initiatives, such as the WeCare programme.

#### Foster an Agile organisation

The Group recognises the urgent need to adapt to a new way of working that is more centred on employee engagement and well-being and focuses on the maximisation of the impact on customers. To this end, we continued to invest in employee training and internal mobility, fostering experience sharing and knowledge generation. Alongside this, we continued to focus on reformulating working methods and organisational processes based on Agile methodologies.

#### Boost analytics with a clear data strategy

The Group believes that Analytics and Artificial Intelligence are crucial to offering a better experience and increasing efficiency. It is therefore promoting measures such as:

- The implementation of tools to generate recommendations and leads for improvement/cross-selling and activation of digital properties, based on customer information;
- The development of retention and propensity models, predictive models based on Machine Learning functionalities, which make it possible to anticipate customer behaviour and adopt the best position in relation to them;
- Automation using Artificial Intelligence as the basis of new functionalities and redesign processes, to facilitate claims management and interaction with customers;
- The implementation of intelligent localisation systems to monitor forest fires and potential damage to insured units.

The Group sees data strategy as a key enabler for achieving the established objective, from data collection to data security and data quality, to the making available of the data.

#### INTERNATIONAL EXPANSION

International expansion plays an extremely important role in the Group's growth strategy, via the geographical diversification of the business and greater resilience to adverse events. Initially, this strategy targeted markets with which Portugal had the greatest economic, cultural, and linguistic affinities, following its natural banking channel distribution partner (CGD) and by concentrating on markets where the bank was already present (Spain, France, and Macau). In 2011, the Group expanded into the Angolan market, which was followed by the Cape Verde and Mozambique markets, three years later.

Subsequently, in 2019, with the acquisition of a majority stake in the La Positiva Insurance Group in Peru and the start of operations in Chile in 2020, the Group began a new phase of international expansion, which continued with acquisitions of a majority stake in Seguradora Internacional de Moçambique (now Fidelidade Moçambique) and a majority stake in The Prosperity Group AG, which focuses on the German and Swiss markets.

The Group aims to balance the consolidation of the various international operations with the selective search of expansion opportunities in complementary markets where it can offer competitive advantages, while always ensuring compliance with all the criteria of financial and operational sustainability.

The Group's strategy for international expansion is based on innovation, proximity, and the establishment of synergies, in order to create a cohesive and efficient organization in all geographies. Its vision for the future focuses on four main objectives:

Continued growth and increased international business, to contribute to the profitability of the Group

Optimisation of the Group's operations, boosted efficiency, growth, profitability, and value creation

Achievement of a new level of performance by consolidating the governance model

To seek to establish more synergies between the head office and international operations, namely through international mobility, the development of commercial projects with bilateral teams and the continuous sharing of best practices and know-how.

The Group has adopted a strategic model that seeks to optimise the assimilation of know-how and the implementation of best practices at local level. The results of this effort, which has generated significant synergies for the development and implementation of comprehensive projects, have been boosted by the creation of follow-up forums. These forums seek to cover differing but complementary areas, and needs. Their fundamental principles are the strengthening of internal collaboration, the promotion of a disruptive and innovative dynamic in working models and projects, and the proactive driving of the development of international operations, with a commitment to constant support and monitoring of actions.

In order to consolidate support for the various geographies and ensure that internal know-how is put to good use, the Group, through Fidelidade, has launched centres of excellence specialising in areas such as Advanced Analytics, Artificial Intelligence, pricing and innovation. These exchange platforms have made it possible for companies to share best practices and are a key to increasing their solidity and competitiveness in their markets, which has consequently, strengthened the Group worldwide.

With the aim of achieving a more robust basis for participation, transparency, accountability and consensus as a Group, control bodies and mechanisms have been put in place, at both local level and Group level by International Committees. At the same time, there is a commitment to creating efficient operating practices and a consistent customer experience throughout the organisation. The Group is accordingly redefining its internal processes in the various geographies, in order to achieve a more solid and comprehensive vision that contributes to the implementation of effective strategies and consistency in the internal practices of its internal operations.

The Group has also defined a strategy to strengthen its offer to families and other customers looking to invest in long-term products, via unit-linked insurance. The acquisition of TPC, which specialises in the sale of savings solutions without a guaranteed capital, which occurred in 2022 as part of this strategy, has accelerated the introduction of savings insurance in the various geographies in which the Group is present, by strengthening skills, via improved offer and by providing more flexible solutions to its distribution business partners.

This year, Fidelidade has reiterated its commitment to being the insurance partner of benchmark Chinese companies with international business in the geographies in which the Group is present. It has therefore created strategic alliances with some of China's top 100 companies, to which it has allocated significant specialist team efforts, working across geographies to develop a commercial approach aimed at China's communities and companies.

This milestone was celebrated at the end of 2023 with an event that highlighted the scope of the Group's commitment and ambition, i.e. the Chinese Business Society. At the same time, the second Fidelidade Roadshow in China took place, which is a strategic initiative that seeks to strengthen commercial ties and to identify business opportunities, in order to build a global network of solid and lasting partnerships between the Group, and Chinese partners and customers.

#### RISK MANAGEMENT

For the Group, risk management is an essential component of business development, enabling it to anticipate, assess and address challenges that, if neglected, could jeopardize its performance, both financially and in terms of sustainability.

Effective and systematic risk management corresponds to informed decision-making for the Group, which weighs up different factors to ensure organizational stability and the pursuit of its strategic objectives.

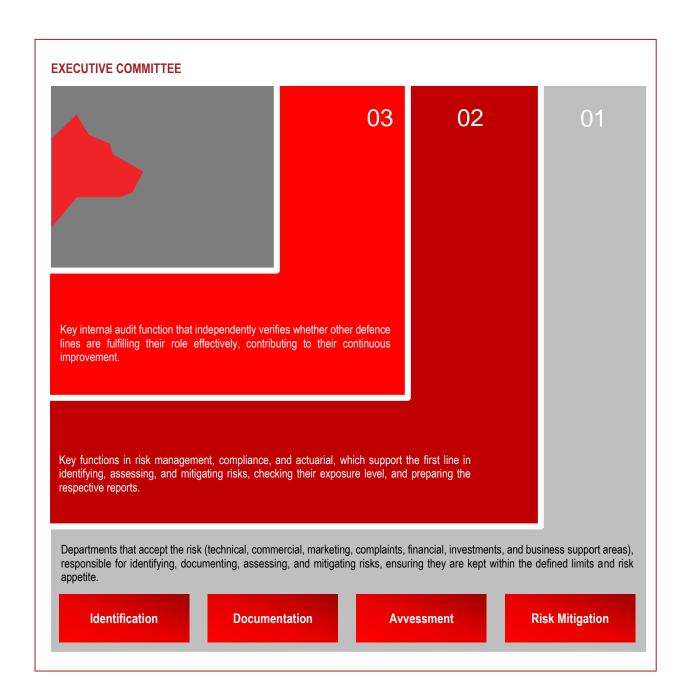

To this end, a risk management model has been defined in line with the requirements of the Solvency II regime, which allows the Group's risk profile to be defined and immediate measures to be taken whenever necessary in response to material changes.

Risk and Solvency Self-Assessment Exercise ("ORSA"), which means a qualitative and quantitative assessment of all the risks to which the Group is, or may be, exposed, and a projection of its solvency position in the short to medium term, allows us to relate, in a prospective vision, both the Group's risk profile and the adequacy of capital to regulatory requirements and internal capital needs.

#### Risk management processes

The Group has policies, processes, and procedures suitable to its operations and business strategies, in order to ensure prudent management practices. The Audit, Risk Management and Compliance Departments, along with four committees, are responsible for ensuring compliance with these mechanisms via the performance of key functions that ensure the management and internal control of risk assessment.

The effectiveness of the risk management process is ensured by the Executive Committee, which establishes the Group's appetite for risk, as well as the overall limits of tolerance for it. The model adopted by the Group has three defence lines, which report to the Executive Committee and aim to adequately measure, monitor, and control risks.

#### EMPLOYEES - THE LONGRUN GROUP TEAM

At Longrun, we look at the world through the humanistic and creative lens of people. They are the ones who put the values into practice with colleagues, customers, and partners. They have the empathy, and the will to act and do good. Above all, it is in people that we find the maximum potential for innovation and the agile talent that enables us to continue working collaboratively.

At the Group, people have space to do things, to make mistakes, to try out, and to make decisions. They have the opportunity to watch and participate in the ongoing process of adaptation to change. For us, change starts with each person. It is people, who unhesitatingly implement new ways of working on a daily basis, who take the initiative to redefine career objectives, to change their point of arrival, to engage in internal mobility. It is the people, who make the Longrun Group a great place to work, and who give the Group the strength to continue improving all aspects of its operations. They are, in essence, our "driving force".

For all these reasons, Longrun wants to continue to promote lifelong learning, to invest in more hours of training, knowledge acquisition, and to strengthen skills and collaboration between everyone. To do this, our people can rely on mechanisms such as a knowledge centre, made of people for people. The Group has tailor-made programmes focused on our people's well-being, to ensure they feel good, valued, and continue to distinguish themselves and fascinate Longrun with their work and commitment.

At the end of 2023, the Longrun Group's insurance area, excluding Luz Saúde, had 8,713 employees, representing an increase of 9% compared to the previous year.

#### A.1.7. 2023 Highlights

Longevity occupies a central place in Longrun's global strategy. In 2023, and as a result of this positioning, Longrun, through the Fidelidade Group, invested in innovative solutions that help foster health and healthy lifestyles, and financial autonomy and resilience, and that reinforce the Group's commitment to society and the planet. This commitment has been recognised in many ways, further increasing the commitment to "Longevity for all ages".

#### SOME IMPORTANT MILESTONES

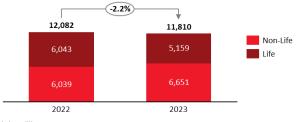

#### A.2. Underwriting performance

#### A.2.1. Insurance sector environment

#### Evolution of the insurance market in Portugal

In 2023, the Portuguese insurance market recorded total gross premiums of 11.8 billion euros, a decrease of 2.2% compared to 2022, reflecting the evolution of the Life segment (-14.6% to 5.2 billion euros) due to the economic context referred to above. On the other hand, the Non-Life segment continued its growth trajectory, recording premiums of 6.7 billion euros, i.e. 10.1% more than in 2022.

Unit: million euros Source: ASF

The decrease in premiums in the Life segment was mainly due to the Life Financial component, in particular in terms of unit-linked products. In fact, despite rising interest rates, the loss of income caused by inflation and instability in financial markets had a negative impact on this type of financial product, as was the case in 2022.

For their part, premiums in the Non-Life segment maintained their growth trend, generating greater traction when compared to the previous year, mainly as a result of real economic growth and the inflationary context.

In this segment, it is important to highlight the positive evolution registered in the Health line of business (+16.7%), at a time when the population is increasingly aware of the need to complement the services of the National Health System. This growth allowed the Health line of business to consolidate its position as the second largest line of business in the Non-Life segment, with direct insurance premiums rising to 1,349 million euros.

#### Non-Life: Gross Premiums

Evolution of the international insurance market

#### **Latin America**

In the Latin American markets where the Group is present – especially Peru, Bolivia and Chile -, the Non-Life segment maintained the trend in premiums growth, with growth accelerating in the Peruvian market, in 2023.

#### Non-Life: Gross Premiums

|         | Gross Premiums |      |  |  |  |
|---------|----------------|------|--|--|--|
| Country | 2022           | 2023 |  |  |  |
| Peru    | 0.4%           | 7.6% |  |  |  |
| Chile   | 22.0%          | 4.4% |  |  |  |
| Bolivia | 11.7%          | 5.6% |  |  |  |

Unit: % change rate

#### **Africa**

In the African market, Angola maintained the trend in premiums growth, with an increase of around 17% in 2023 compared to 2022, mainly due to growth in the Life segment, which increased by 101%. The Non-Life segment also grew 9% compared to 2022.

On the other hand, Mozambique saw a decrease in premiums in 2023 (-2% compared to 2022) due to a fall in Non-Life premiums of around 2%. The Life segment saw an increase of around 1% compared to 2022.

#### A.2.2. Group Performance

Key indicators in 2023 are:

<sup>8</sup> ASAN (Association of Angolan Insurers), November 2023

#### POSITION OF THE LONGRUN GROUP IN THE PORTUGUESE MARKET

In 2023, the Longrun Group maintained its leading position in the Portuguese market. It recorded a global market share of 29.6%, which corresponded to an increase of +0.1 p.p. compared to the previous year, mainly reflecting the performance of the Non-Life segment.

Total market share - Life and Non-Life segments (Unit: %; Source: ASF)

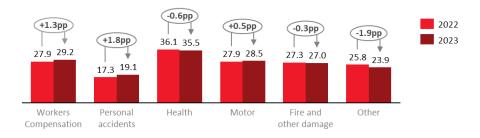

In the Life segment, and despite the decrease in the amount of premiums, the Longrun Group increased its market share by 0.1 p.p. compared to 2022, reflecting the commercial performance of financial products, especially the growth of guaranteed capital products, which grew by 88.8% compared to 2022, as a result of the new interest rate context.

In the Non-Life segment, the Group increased its market share by 0.2 p.p. compared to 2022, reflecting its improved position in the Workmen's Compensation, Motor Vehicle and Personal Accident products:

- In the Workmen's Compensation and Motor segments, market share increased by
- 1.3 p.p. and 0.5 p.p., respectively, reflecting strong commercial dynamics.
- The Personal Accidents branch also increased its market share by 1.8 p.p., reflecting a strong increase in premiums compared to the previous year, which was above the market average.
- The Health and Fire and Other Damage lines of business saw a decrease in market share compared to 2022, essentially
  reflecting the reinforcement of the cautious risk underwriting policy, with a greater focus on the profitability of these lines
  of business.

#### Market share - Non-Life segment (Unit: %; Source: ASF)

#### POSITION OF THE LONGRUN GROUP IN THE INTERNATIONAL MARKET

#### **Latin America**

In 2023, the Group consolidated its position in the insurance market in Latin America 12:

- Peru: 4th place, with the La Positiva Group achieving a market share of 13.2%13, which is higher than the previous year. In the Non-Life segment, La Positiva Seguros also holds the 4th place, with a market share of 14.5%. In the Life segment, La Positiva Vida holds the 3rd place, with a market share of 12.1%.
- Bolivia: 1st place, with a market share of 19.2%, in the Non-Life segment and 2nd place in the Life segment, with a market share of 18.7%.
- Chile: 13th place with a market share of 2.4%.
- Paraguay: 8th place with a market share of 4.1%.

#### **Africa**

The Group also consolidated its position in **Africa**. In Mozambique, the Group holds the 3rd place in the insurance market ranking, with a market share of 15.1%<sup>14</sup>. In Angola, the Group reached a market share of 12.4%, thus holding the 3rd place in the ranking<sup>15</sup>.

<sup>1.</sup> Excludes unit-linked products and properties for own use; 2. Includes earnings from the financial component of insurance contracts.

Despite a challenging context, the Longrun Group achieved a consolidated volume of written premiums totalling 5,206.9 million Euros, in 2023, an increase of 1.7% on the previous year.

The combined ratio in 2023 was 93.8%, a decrease of -5.0 p.p. compared to the previous year, reflecting reduced claims in some Non-Life business lines, namely in Workmen's Compensation and Fire and Other Damage, and increased efficiency levels, as reflected in the costs allocated to the various segments.

<sup>12</sup> Source: Peru: SBS November 2023; Bolivia: APS December 2023; Chile: CMF September 2023; Paraguay: BCP, Central Bank of Paraguay, September 2023

<sup>&</sup>lt;sup>13</sup> Including La Positiva Seguros and La Positiva Vida.

<sup>&</sup>lt;sup>14</sup> Source: Main Quarterly Indicators Report (II Quarter 2023) - ISSM (Mozambique Insurance Supervision Institute)

<sup>&</sup>lt;sup>15</sup> Source: Association of Angolan Insurers, November 2023.

Insurance contract results grew to 261.6 million Euros, an increase of 44% compared to 2022, because of increased insurance contract revenues and a reduction in the combined ratio.

Investment contract management commissions totalled 143.7 million Euros, an increase of 26% compared to 2022, in line with the strategy defined for Financial Life products.

Investment income totalled 217.7 million Euros, similar to the level in the previous year as the effect of the increase in guaranteed rates for Life product customers, in line with interest rate trends, was offset by increased investment income.

Non-operating results and non-attributable expenses worsened to -345.4 million Euros, which reflects the fact that the corresponding 2022 result was boosted by non-recurring events.

As a result of the above-mentioned developments, particularly the insurance contract results, the net profit increased by 6.2% compared to 2022, to 152.8 million Euros.

<sup>1.</sup> Includes sums related to investment contracts

Life business fell by 7.5% on the previous year to 2,305.4 million Euros, reflecting the evolution of Financial Life premiums in Portugal, which was negatively impacted by the new interest rate environment, which made lower risk products (such as bank deposits or savings certificates) more appealing as an alternative to insurance-related financial products.

In contrast, the Life business at an international level recorded a growth of 11.7% compared to the previous year, benefiting from the performance of international operations, in particular from The Prosperity Company group, which performs its activity in several European markets.

In the Non-Life segment, the Group grew 10.5% in 2023 to 2,901.5 million euros, with a positive performance in all business lines and in most geographies. It should also be noted that in 2023, the international business represented about a third (33.3%) of the total volume of Non-Life written premiums.

| Health                | 479.1   | 24.7%  | 417.9   | 23.9%  | 14.6%        |
| Fire and Other Damage | 324.1   | 16.7%  | 298.1   | 17.1%  | 8.7%         |
| Workers' Compensation | 333.2   | 17.2%  | 286.6   | 16.4%  | 16.3%        |
| Others - Non-Life     | 202.2   | 10.4%  | 194.6   | 11.1%  | 3.9%         |
| TOTAL                 | 3,504.2 | 100.0% | 3,577.9 | 100.0% | -2.1%        |

In Portugal, the Group performed well in Non-Life segment premiums, growing 10.9% compared to the previous year and above the market average (10.1%), growth to which most business lines contributed. This evolution allowed its Non-Life market share to increase by 0.2 p.p. to 29.0%.

In terms of Non-Life activity, the Workers' Compensation and Health lines of business recorded the highest growth, with total premiums reaching 333.2 and 479.1 million euros, respectively. It should also be noted that the Group market share in Portugal for Workers' Compensation increased to 1.3 p.p. to 29.2%.

In the Life business in Portugal, the Group registered a premiums' decrease of 14.4%, compared to the previous year, influenced by the unfavourable evolution of Life Financial products.

#### International business premiums

| Unit: million euros   | 2023    | % Mix  | 2022    | % Mix  | Change 23/22 |
|-----------------------|---------|--------|---------|--------|--------------|
| Life Premiums         | 737.6   | 43.3%  | 660.5   | 42.9%  | 11.7%        |
| Risk and Annuities    | 332.0   | 45.0%  | 325.2   | 49.2%  | 2.1%         |
| Financial - Life      | 405.6   | 55.0%  | 335.3   | 50.8%  | 21.0%        |
| Non-Life              | 965.2   | 56.7%  | 879.7   | 57.1%  | 9.7%         |
| Car                   | 215.2   | 22.3%  | 198.6   | 22.6%  | 8.4%         |
| Health                | 130.1   | 13.5%  | 123.8   | 14.1%  | 5.1%         |
| Fire and Other Damage | 308.4   | 31.9%  | 262.1   | 29.8%  | 17.6%        |
| Workers' Compensation | 108.6   | 11.3%  | 88.8    | 10.1%  | 22.3%        |
| Others                | 202.9   | 21.0%  | 206.4   | 23.5%  | -1.7%        |
| TOTAL                 | 1,702.8 | 100.0% | 1,540.2 | 100.0% | 10.6%        |

The amount of premiums from the international business reached 1,702.8 million euros in 2023, recording a growth of 10.6% compared to the previous year, reflecting the contribution of Life and Non-Life segments.

Non-Life activity grew 9.7%, with Peru, Chile and Spain being the geographies that contributed most to the increase of 85.4 million euros in international Non-Life premiums.

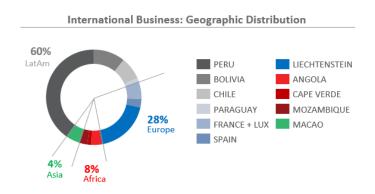

The Workers' Compensation business line grew very positively (22.3%), driven by the Group's business in Peru, Cape Verde, and Macao. On the other hand, the Fire and Other Damage line grew by 17.6%, influenced by the Group's business in Peru and Chile.

The Life Risk and Annuities line, which holds a significant weight in the Latin American business, recorded a growth of 2.1%, reflecting mainly an increase in operations in Bolivia and Peru.

For its part, the Financial Life branch grew by 21.0%, largely driven by the activity of The Prosperity Company group.

In 2023, Latin America accounted for 60% of the Group's international business, with the remainder being distributed between Europe (28%), Africa (8%) and Asia (4%).

#### BALANCE SHEET - KEY INDICATORS

| Unit: million euros  | 2023     | 2022     | Change 23/22 |
|--|----------|----------|--------------|
| Balance Sheet Summary  |          |          |              |
| Total assets   | 20,342.7 | 20,049.7 | 1.5%         |
| Assets under management  | 17,364.7 | 17,081.3 | 1.7%         |
| Insurance contract liabilities and investment contracts <sup>2</sup> | 14,247.5 | 14,262.9 | -0.1%        |
| Margin of contractual services                                       | 428.2    | 442.1    | -3.1%        |
| Equity <sup>3</sup>  | 2,327.7  | 2,218.0  | 4.9%         |
| ROE  | 6.7%     | 6.3%     | 0.4 p.p.     |

<sup>1.</sup> Includes properties for own use; 2. It includes financial liabilities of the deposit component of insurance contracts and insurance contracts and operations considered for accounting purposes as investment contracts; 3. Does not include minority interests

At the end of 2023 the Group had assets under management amounting to 17.4 billion euros, an increase of 1.7% compared to 2022, 22% of which related to unit-linked contracts. The investment portfolio not connected to unit-linked products amounted to 13.6 billion euros, generating an average annual return of 2.7%.

Still in this context, in 2023, we continued the policy of diversification by asset class and geography as a way of maximising profitability with an adequate level of risk in view of the environment of rising interest rates, taking into account the optimisation of the capital structure under the Solvency II regime.

In turn, liabilities from insurance contracts and investment contracts amounted to 14.2 billion euros in 2023, showing a reduction of 0.1% compared to 2022, reflecting the evolution of the Life insurance.

In addition, the contractual services margin reached 428.6 million euros in 2023, a decrease of 3.1% compared to the previous year.

Equity, excluding minority interests, totalled 2.3 billion Euros, up on the previous year, mainly reflecting the effect of the increased value of financial assets, as reflected in the revaluation reserve and the net annual profit. The average return on shareholder equity ("ROE") was 6.7%.

It should also be noted that in 2021, Fidelidade issued, for the first time, subordinated debt in the financial markets, allowing the optimisation of its capital structure. At the end of 2023, subordinated debt totalled 503.3 million euros and the debt to total assets ratio was 2.5%.

#### A.2.3. Premiums, claims and expenses by line of business

The tables below provide a breakdown of premiums, claims and expenses by line of business.

Amounts in thousand euros

| Life Line of business | Insurance with<br>profit<br>participation | Index-linked and<br>unit-linked<br>insurance | Other life<br>insurance | Life reinsurance | Total     | Previous year |
|-----------------------|---|--|-------------------------|------------------|-----------|---------------|
| Premiums written      |   |  |                         |                  |           |               |
| Gross                 | 5,592                                     | 646,408                                      | 1,515,561               | 11,154           | 2,178,715 | 2,491,992     |

### A.3. Investment performance

#### A.3.1. Income and expenses from investments

At 31 December 2023, the allocation of investments and other assets to insurance contracts or insurance contracts and other operations classified as investment contracts is as follows (amounts for solvency purposes):

Amounts in thousand euros

| Investments and other assets                               | Life       | Non-Life  | Not allocated | Total      | Previous year |
|--|------------|-----------|---------------|------------|---------------|
| Property, plant and equipment held for own use             | 0          | 14,495    | 146,526       | 161,021    | 154,625       |
| Property (other than for own use)                          | 0          | 9,805     | 221,893       | 231,698    | 257,825       |
| Holdings in related undertakings, including participations | 1,175,959  | 926,068   | 298,351       | 2,400,378  | 2,332,692     |
| Equities - listed  | 20,721     | 300,435   | 42,705        | 363,861    | 420,655       |
| Equities - unlisted  | 400        | 7,467     | 22,835        | 30,702     | 29,228        |
| Government bonds   | 2,096,971  | 301,935   | 220,532       | 2,619,438  | 2,947,708     |
| Corporate bonds  | 4,072,374  | 1,123,847 | 115,034       | 5,311,255  | 5,240,734     |
| Structured notes   | 181,689    | 6,744     | 337           | 188,770    | 172,755       |
| Collateralised securities                                  | 0          | 0         | 0             | 0          | 0             |
| Collective investment undertakings                         | 297,765    | 513,074   | 35,028        | 845,867    | 900,860       |
| Derivatives  | 162,723    | 9,075     | 13,013        | 184,811    | 112,175       |
| Deposits other than cash equivalents                       | 37,949     | 53,142    | 273,377       | 364,468    | 356,932       |
| Assets held for index-linked and unit-linked contracts     | 3,744,013  | 0         | 1,525         | 3,745,538  | 3,134,637     |
| Loans and mortgages  | 0          | 0         | 50,655        | 50,655     | 13,905        |
| Cash and cash equivalents                                  | 0          | 0         | 352,417       | 352,417    | 385,223       |
| Total  | 11,790,564 | 3,266,087 | 1,794,228     | 16,850,879 | 16,459,954    |

The investments in the table above include investments allocated to unit-linked contracts, which break down as follows:

Amounts in thousand euros

| Investments allocated to unit-linked contracts | Total     | Previous year |
|--|-----------|---------------|
| Shares - listed                                | 25,898    | 125,100       |
| Government bonds                               | 377,608   | 140,223       |
| Corporate bonds                                | 1,122,608 | 966,806       |
| Structured bonds                               | 49,749    | 17,570        |
| Collaterized bonds                             | 44,198    | 35,824        |
| Investment units                               | 1,959,983 | 1,633,083     |
| Derivative financial instruments               | 115,561   | 113,398       |
| Deposits                                       | 52,816    | 103,914       |
| Others   | -2,881    | -1,281        |
| Total  | 3,745,538 | 3,134,637     |

In 2023, the following income was gained from investments:

| Amounts | in | thousand | euros |
|---------|----|----------|-------|
|         |    |          |       |

| Investments                                  | Dividends            | Interest | Rents  | Total   | Previous year |

#### A.3.3. Information on investment in securitisations

At 31 December 2023, the value of investment in securitisations is immaterial, and no information is therefore included in this chapter.

#### A.4. Performance of other activities

There are no other activities performed by the companies included in Longrun's consolidation perimeter with material relevance for the purposes of disclosure in this report.

### A.5. Any other information

#### A.5.1. Group structure

As an insurance holding company, Longrun, SGPS, SA., does not carry out insurance or reinsurance activities, and its activity is limited to management of the participation held in the insurance company Fidelidade – Companhia de Seguros, S.A.

Since Fidelidade – Companhia de Seguros, S.A, is the most representative company of the Group, the governance requirements applied to the insurance Group are defined therein.

The subsidiaries, grouped according to the nature of their main business, are:

#### **INSURANCE**

**Fidelidade - Companhia de Seguros, S.A**. is a public limited liability company resulting from the merger by incorporation of Império Bonança - Companhia de Seguros, S.A. ("Império Bonança") in Companhia de Seguros Fidelidade-Mundial, S.A. ("Fidelidade Mundial"), in accordance with the public deed dated 31 May 2012, which produced accounting effects with reference to 1 January 2012. This operation was authorised by ASF through a resolution of its Board of Directors dated 23 February 2012. The Company's purpose is to perform the "Non-life" and "Life" insurance activity, as set out in the statute governing this activity.

**Multicare - Seguros de Saúde, S.A.**, with its head office in Lisbon, at Rua Alexandre Herculano, nº. 53, was set up on 9 March 2007 with the corporate purpose of performing insurance and reinsurance activities, in all legally authorised non-life insurance lines of business and operations, and may also perform activities related to insurance and reinsurance. The company is focused on the management of health insurance.

Fidelidade Assistência – Companhia de Seguros, S.A. (previously Cares – Companhia de Seguros, S.A.), with its head office in Lisbon, at Rua Alexandre Herculano, no 53, was set up on 17 February 1995, with the name Companhia de Seguros Tágus, S.A., with the corporate purpose of performing insurance and reinsurance activities, in all legally authorised non-life insurance lines of business and operations, and may also perform activities related to insurance and reinsurance. In 2015, CARES – Companhia de Seguros, S.A. changed its name and image to Fidelidade Assistência – Companhia de Seguros, S.A. and now acts under the Fidelidade Assistance brand.

**Via Directa - Companhia de Seguros, S.A. (OK Teleseguros)**, with its head office in Lisbon, at Rua Alexandre Herculano, no 53, was set up on 28 November 1997 with the corporate purpose of performing insurance and reinsurance activities, in all legally authorised non-life insurance lines of business, and may also perform activities related to insurance and reinsurance.

**Companhia Portuguesa de Resseguros, S.A.**, with its head office in Lisbon, at Largo do Calhariz no 30, was set up on 22 September 1979 with the corporate purpose of performing any operations regarding reinsurance of non-life lines of business, both in Portugal and abroad, in addition to participating in the redistribution in the market of certain risks of a specific type or dimension.

**Fidelidade Angola – Companhia de Seguros, S.A.**, with its head office in Luanda, at Rua 1° Congresso MPLA, n.° 11, 1° A, Ingombota, was set up on 2 June 2009 with the corporate purpose of performing insurance activities in the life and non-life lines of business in the national territory of the Republic of Angola.

Garantia - Companhia de Seguros de Cabo Verde, S.A. resulted from the split of the former Instituto de Seguros e Providência Social, EP which occurred on 30 October 1991, pursuant to Decree-Law No. 136/91, of 2 October, with all the assets and liabilities related to the insurance business being transferred to it. The Company has its head office in Chã de Areia, C.P. 138, Cidade da Praia, in the Republic of Cape Verde, and branches in the Sal, São Vicente, Boavista, São Nicolau, Fogo and Santo Antão islands. In order to attract clients to purchase insurance policies, the company also has a network of agents. The Company is engaged in the activity of direct insurance and reinsurance in all lines of business and operations, and may also perform related and complementary activities.

**Fidelidade Macau – Companhia de Seguros, S.A.**, with its head office in Macao at Avenida da Praia Grande, no. 567, BNU Building, 14th floor, was set up on 30 September 2015 with the corporate purpose of performing the insurance and reinsurance activities, in all legally authorised non-life insurance lines of business and operations, and may also perform activities related to insurance and reinsurance.

**Fidelidade Macau Vida – Companhia de Seguros, S.A.**, with its head office at Avenida da Praia Grande, no. 567, BNU Building, 14th floor, Macao, was set up on 31 March 2020 with the corporate purpose of performing insurance and reinsurance activities, in all legally authorised life insurance lines of business, and may also perform activities related to insurance and reinsurance.

La Positiva Seguros Y Reaseguros S.A.A., with its head office at Calle Francisco Masías 370, floor 3, San Isidro, Lima, Peru, was set up on 27 September 1937 with the corporate purpose of providing the services of a general risk insurance and reinsurance company, assuming as insurer and reinsurer all the risks that, in accordance with the law, may be subject to that contract, both in Peru and abroad. It may also develop any other subsidiary or business that, in line with the General Law of the Financial System, the Insurance System and the Banks and Insurance Supervisory Organisation, a general risk insurance and reinsurance company may undertake, while complying with the requirements of the legal regulations.

La Positiva Vida Seguros Y Reaseguros S.A., with its head office at Calle Francisco Masías 370, floor 3, San Isidro, Lima, Peru, was set up on 20 July 2005, with the corporate purpose of providing the services of a life insurance and reinsurance company, assuming as insurer and reinsurer all the risks that, in accordance with the law, may be subject to that contract. It may also develop any other subsidiary or business that, in line with the General Law of the Financial System, the Insurance System and the Banks and Insurance Supervisory Organisation, a life insurance and reinsurance company may undertake, while complying with the requirements of the legal regulations.

**Alianza Vida Seguros y Reaseguros S.A.**, with its head office in Santa Cruz de la Sierra, Bolivia, was set up on 5 July 1999, and is engaged in the sale of personal insurance and pre-paid services, social security insurance and savings and capitalisation services, co-insurance, reinsurance and related transactions, on its own behalf or on behalf of third parties.

**Alianza Compañía de Seguros y Reaseguros E.M.A. S.A.**, with its head office in La Paz, Bolivia, was set up on 9 July 1991, and is engaged in the sale of general insurance, including transport and suretyship insurance, both directly and through reinsurance, on its own behalf, on behalf of third parties or through participation with third parties.

**Alianza Garantía Seguros Y Reasseguros S.A.**, with its head office in Paraguay, was set up in the city of Assunção on 27 November 1972, and is engaged in selling general insurance and life insurance, the main risk being motor insurance.

It does not engage in any commercial activity.

#### A.5.2. Information on the scope of the Group

For the preparation of Longrun's consolidated financial statements, the subsidiaries listed in point A.5.1 above were considered in the company's consolidation perimeter.

For the determination of consolidated data for solvency purposes, and taking into account both the provisions of Commission Delegated Regulation (EU) 2015/35, of 10 October 2014, and the understanding of the ASF, the following subsidiaries and associates were not considered in the consolidation perimeter:

- FIDELIDADE PROPERTY EUROPE, S.A.
- Fundo de Investimento Imobiliário Aberto IMOFID
- Luz Saude
- FIDELIDADE PROPERTY INTERNATIONAL, S.A.
- FPI (UK) 1 LIMITED
- FPE (IT) Societa per Azioni
- FPE (Lux) Holding S.a r.l.
- Thomas More Square (Lux) Sarl
- Thomas More Square (Lux) Holdings Sarl
- Fundo Broggi
- Fidelidade Sociedade Gestora de Organismos de Investimento Coletivo, S.A.
- Fid Loans 1 (Ireland) Limited
- FPE (BE) HOLDING S.a.r.l.
- FID I & D, S.A.
- EA One Holding, Inc.
- FPE (PT), S.A.
- Tenax Capital Ltd
- FPE (HU) Kft
- IBERFID Fundo de Investimento Imobiliário Fechado
- FPE (UK) 1 LIMITED
- FPE (PT), SGPS, S.A.
- FPE (PT) OFFICE A, S.A.
- FPE (PT) 2 OFFICE B, S.A.
- FPE (PT) 3 RESIDENTIAL, S.A.
- FPE (PT) 4 RET, S.A.

- FPE (PT) 5 PARK, S.A.
- GK Lisbon
- TMK Lisbon
- prosperity solutions AG (previously prosperity brokershome AG)
- prosperity solutions GmbH
- prosperity cashtech AG
- FID REAL ASSETS, SGPS, S.A.
- FID REAL ASSETS SPAIN, S.L.
- Florestas de Portugal Fundo Especial de Investimento Imobiliário Fechado
- prosperity solutions (Switzerland) AG
- prosperity funds SICAV

Taking into account these differences between the scope of the Group used in the consolidated financial statements and the scope of the consolidated data for solvency purposes, consolidated financial statements were prepared for comparative purposes, considering the consolidation perimeter for solvency purposes, that is, not including the above-mentioned entities.

Thus, the table below summarises the main differences between Longrun's consolidated financial statements (Accounting Financial Statements) and the consolidated financial statements considering the consolidation perimeter for solvency purposes described above (Solvency II Financial Statements):

Amounts in thousand euros

|                                   | Financial S             | tatements                |            | Financial Stateme       | ents previous year       |
|-----------------------------------|-------------------------|--------------------------|------------|-------------------------|--------------------------|
|                                   | Accounting<br>Perimeter | Solvency II<br>Perimeter | Difference | Accounting<br>Perimeter | Solvency II<br>Perimeter |
| Total Assets                      | 20,342,670              | 18,878,672               | 1,463,998  | 20,305,910              | 19,165,129               |
| Total Liabilities                 | 17,290,105              | 16,270,417               | 1,019,688  | 17,386,911              | 16,679,703               |
| Excess of assets over liabilities | 3,052,565               | 2,608,255                | 444,310    | 2,918,999               | 2,485,426                |

Accordingly, in Chapter D of this report, the valuation of assets, technical provisions and other liabilities for solvency purposes is compared to the consolidated financial statements considering the consolidation perimeter for solvency purposes described above (Solvency II Financial Statements).

Likewise, in Chapter E, the excess of assets over liabilities calculated for solvency purposes is compared to that resulting from the Solvency II Financial Statements.

There were no transactions of this type.

# **B.** System of Governance

During the period covered by this report, there were no material changes in the Company's system of governance.

# B.1. General information on the system of governance

# B.1.1. Corporate governance structure

Corporate governance involves a series of relationships between the management of the Company, its shareholders and other stakeholders, by means of which the Company's objectives are defined, and also the means by which these will be achieved and monitored.

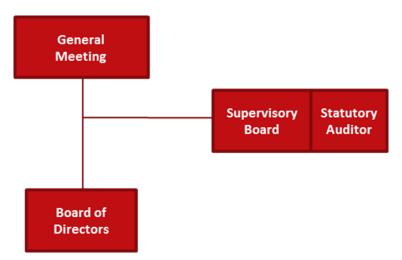

The Company adopts a unitary corporate governance model with a Board of Directors and a supervisory body composed of a Supervisory Board and a Statutory Auditor.

The members of the Board of Directors are elected by the General Meeting.

Vacancies or impediments in the Board of Directors are filled by co-opting until a resolution is submitted to the first subsequent General Meeting.

Pursuant to the Company's Articles of Association, the Board of Directors is composed of between two and five members, and the Chairman of the Board of Directors is appointed by the General Meeting. The Board Members' mandate is for three calendar years, and they may be re-elected once or more times. The year of their appointment counts as one full calendar year.

The figure below represents Longrun's Corporate Governance structure during 2023:

The main competences of the bodies included in the corporate governance structure are:

### GENERAL MEETING

Pursuant to Article 8 of the Articles of Association, the General Meeting is composed of shareholders who are present and represented in the terms of the law, and each share corresponds to one vote.

The Articles of Association do not provide for any maximum percentage of voting rights that may be exercised by a single shareholder or even by a shareholder who has with the former any of the relationships set out in Article 20(1) of the Securities Code.

The General Meeting can deliberate at its first convening, provided that shareholders holding at least three quarters of the total shares representing the share capital are present or represented. At the second convening it can deliberate regardless of the number of shareholders present or represented and regardless of the amount of capital to which their shares correspond.

### **BOARD OF DIRECTORS**

As one of the Company's corporate bodies, the Board of Directors has, pursuant to Article 13(1) of the Company's Articles of Association, the broadest of powers to manage and represent the company.

The Board of Directors may not deliberate if the majority of its members is not present or represented.

### SUPERVISORY BOARD AND STATUTORY AUDITOR

The supervision of the Company, pursuant to Article 413(1) a) of the Code of Commercial Companies, is the responsibility of a Supervisory Board and a Statutory Auditor, with the competences set out in law and whose current mandate corresponds to the period 2020/2022.

The company's Articles of Association establish the duties of the Supervisory Board as those provided for in law.

The Supervisory Board is composed of 3 permanent members and one alternate, with three-year renewable mandates.

### B.1.2. Internal governance

As a holding company in the insurance sector, Longrun does not carry out insurance or reinsurance activities. Its activity is limited to managing the holdings in Fidelidade - Companhia de Seguros, S.A. and the insurance companies it owns.

As Fidelidade - Companhia de Seguros, S.A. is the Group's most representative company, it defines the governance requirements applied to the insurance Group.

The Legal Framework for Access to and Exercise of the Insurance and Reinsurance Activity (RJASR), approved by Law no. 147/2015, of September 9, which transposes the Solvency II Directive into Portuguese law, came into force on January 1, 2016.

In this context, a global risk management system was implemented in order to meet the requirements set out therein.

The implementation of this system, in addition to compliance with the regulations applicable to the insurance activity, is understood to be an opportunity to improve the risk assessment and management processes, thus contributing to maintaining the solidity and stability of the Company.

Thus, the risk management system is part of the daily activities of the Company, applying an integrated approach to ensure that its strategic objectives (client interests, financial solidity and process efficiency) are maintained.

On the other hand, the execution of the Risk and Solvency Self-Assessment (ORSA) exercise makes it possible to relate, in a prospective vision, risk, capital and return, in the context of the business strategy established by the Group.

With regard to the governance system, the insurance area of the Group headed by the Company has policies, processes and procedures appropriate to its business strategy and operations, guaranteeing sound and prudent management of its activity. In these terms, key cross-Group functions are defined for risk management, internal auditing, actuarial services and compliance, within the scope of the risk management and internal control systems, which are carried out by the Risk Management Department, the Audit Department and the Compliance Department.

The other Structural Bodies have the role of driving the risk management and internal control process forward, in order to ensure that operations are managed and controlled in a sound and prudent manner. They are also responsible for ensuring that the documentation relating to their business processes, respective risks and control activities exists and is kept up to date.

As part of the supervisory authorities' set of prudential recommendations to guarantee the operational continuity of processes, systems and communications, the company's insurance area has a Business Continuity Plan ("BCP") to ensure a structured damage assessment and agile decision-making on the type of recovery to be undertaken.

The measures adopted during the preparation phase for the application of the Solvency II regime, as well as their consolidation over the years of its validity, place the Company at a comfortable level of compliance with this new regime.

# INTERNATIONAL GOVERNANCE MODEL

The Longrun's strategy for international expansion is based on innovation, proximity, and the establishment of synergies, in order to create a cohesive and efficient organisation in all geographies.

The Longrun Group has adopted a strategic model that seeks to optimise the assimilation of know-how and the implementation of best practices at local level. The results of this effort, which has generated significant synergies for the development and implementation of comprehensive projects, have been boosted by the creation of follow-up forums. These forums seek to cover differing but complementary areas, and needs. Their fundamental principles are the strengthening of internal collaboration, the promotion of a disruptive and innovative dynamic in working models and projects, and the proactive driving of the development of international operations, with a commitment to constant support and monitoring of actions.

With the aim of achieving a more robust basis for participation, transparency, accountability and consensus as a Group, control bodies and mechanisms have been put in place, at both local level and Group level by International Committees. At the same time, there is a commitment to creating efficient operating practices and a consistent customer experience throughout the organisation. The Group is accordingly redefining its internal processes in the various geographies, in order to achieve a more solid and comprehensive vision that contributes to the implementation of effective strategies and consistency in the internal practices of its international operations.

In the context of developing the Group's International Governance Model, a process for monitoring compliance risks in international operations was implemented, which outlines the need to support them to improve the operating model and achieve higher levels of maturity. The Compliance Department, in conjunction with the information systems area, has sought to improve control of the money laundering risk and to implement automatic online filtering and transaction monitoring processes at Garantia Cabo Verde, Fidelidade Moçambique, Fidelidade Angola and the Fidelidade branch in France.

# B.1.3. Key functions

The key functions established within the risk management and internal control systems in the Fidelidade Group's insurance area have policies, processes and procedures aligned with the business strategy and operations, guaranteeing sound and prudent management of the business. Accordingly, Group-wide key functions are established, in risk management, internal audit, actuarial and compliance, within the scope of the risk management and internal control systems, which are guaranteed by the Risk Management Division, the Audit Division and the Compliance Division.

The key functions established within the risk management and internal control systems are given to the following bodies:

| Divisions     | Risk Management<br>Division | Audit<br>Division | Compliance<br>Division |
|---------------|-----------------------------|-------------------|------------------------|
| Key functions | Risk Management<br>Function | Internal Audit    | Compliance<br>Function |
|               | Actuarial<br>Function       | Function          |                        |

The following functions are defined for these bodies:

# B.1.3.1. Risk Management Function

- Ensuring information is produced and made available to support decision-making, both by the Executive Committee and by the other decision-making bodies;
- Ensuring the development, implementation and maintenance of a risk management system which enables all material
  risks to which the Insurers and the group are exposed to be identified, assessed and monitored;
- Assessing and monitoring the current and future solvency situation;
- Identifying, assessing and monitoring the market risks and counterparty credit risks;
- Monitoring compliance with the defined level of liquidity and coverage of estimated payments by estimated receipts;
- Identifying, assessing and monitoring operational risks incurred in the insurance group, as well as identifying and characterising the existing control tools;
- Diagnosing and identifying improvements in the operational risk management and internal control systems;
- Assessing and monitoring the risk mitigation instruments, namely Reinsurance;
- Identifying, assessing and monitoring underwriting risks and the credit risk of instruments to mitigate those risks, and preparing information to support decision-making;
- Drawing up, proposing and revising the medium-term Capital Management Plan and respective Contingency Plans;
- Coordinating and conducting the annual ORSA exercise;
- Ensuring that the report on mechanisms and procedures to be adopted specifically within the scope of the Policy for the
  prevention, detection and reporting of insurance fraud situations is produced in line with the stipulations of that policy;
- Drawing up, proposing and revising the Risk Management Policy;
- Drawing up, proposing and revising or cooperating with the revision of all specific risk management policies for each category of material risk:
  - Cooperating with the revision of the Underwriting Policy;
  - Cooperating with the revision of the Reserving Policy;
  - Cooperating with the revision of the Asset and Liability and Liquidity Risk Management Policy;
  - Cooperating with the drawing up and revision of the Investments Policy;
  - o Drawing up, proposing and revising the Operational Risk Management Policy;
  - Cooperating with the revision of the Reinsurance Policy;
  - o Cooperating with the proposal and revision of the Capital Management Policy;
  - Cooperating with the revision of the Dividends Policy;
  - o Drawing up, proposing and revising the Own Risk and Solvency Assessment Policy;
  - Drawing up, proposing and revising Deferred Tax Policy;
  - o Drawing up, proposing and revising the Risk Appetite Framework;
  - Drawing up, proposing and revising the Internal Control Policy.

### B.1.3.2. Actuarial Function

- Monitoring the accounting Technical Provisions, assessing their level of prudence;
- Undertaking an actuarial assessment of the portfolios, including calculation of the fair value of liabilities of a technical nature:
- Ensuring consultancy and actuarial technical assistance to the bodies and institutions which request it, as part of
  contracts for the provision of actuarial-type services, in particular, on the subject of pension funds, benefits plans or any
  other private pension plan frameworks;

- Drawing up, proposing and revising the Provisioning Policies;
- Coordinating calculation of the technical provisions;
- Assessing the adequacy and quality of the data used in the technical provisions calculation;
- Ensuring that appropriate methodologies, basic models and assumptions are used in the technical provisions calculation;
- Comparing the technical provisions best estimate with the actual amounts;
- Informing the management body of the level of reliability and adequacy of the technical provisions calculation;
- Supervising the technical provisions calculation whenever the insurer does not have sufficient data and with the quality needed to apply a reliable actuarial method and, for that reason, if approximate values are used;
- Issuing an opinion on the global underwriting policy;
- Issuing an opinion on the adequacy of reinsurance agreements;
- Contributing to the effective application of the risk management system, particularly regarding the risk modelling on which
  the solvency capital requirement and minimum capital requirement are based, and also regarding the own risk and
  solvency assessment.

# B.1.3.3. Internal Audit Function

- Drawing up, implementing and maintaining an Annual Audit Plan based on a methodical analysis of risk, covering all significant activities and the governance system of the Insurers in the Longrun Portugal Group, including planned developments regarding activities and innovations;
- Assessing compliance with the principles and rules defined as part of the internal control and operational risk management, identifying possible insufficiencies and suggesting action plans to mitigate the inherent risk or optimise the control in terms of effectiveness;
- Carrying out audit actions based on a specific methodology which, since it always has risk assessment in mind, can help
  to determine the probability of the risks occurring and the impact they may have on the Group;
- Presenting the Board of Directors and the Executive Committee with audit reports produced, demonstrating the conclusions obtained and recommendations issued;
- Drawing up the Annual Audit Report, with a summary of the main deficiencies detected in the audit actions, and
  presenting it to the Board of Directors, the Executive Committee and the Supervisory Bodies;
- Analysing the level of implementation of recommendations issued;
- Aiding the Executive Committee, when requested by the latter, in uncovering the facts relating to potential disciplinary breaches by employees and irregularities performed by agents or service providers;
- Performing ad hoc audits, as requested by the Board of Directors, the Executive Committee or another Structural Body;
- Working with the External Audit and with the Statutory Auditor, when requested.

# B.1.3.4. Compliance Function

- Proposing the Compliance strategy and policies and ensuring revision of these;
- Ensuring the development and maintenance of the Compliance risk management system with a risk-assessment approach
- In conjunction with the other key functions, maintaining the Compliance risks catalogue up to date;
- Ensuring the actions necessary to promote a Compliance culture within the Group;
- Preparing and proposing the Group's Code of Conduct, and the internal rules that develop and implement it, and ensuring these are disseminated and revised;
- Preparing and proposing the Compliance Policy, ensuring its revision, and the annual Compliance Plan;
- Articulating the Compliance function with the other key functions of the Group's insurance and reinsurance companies;
- Contributing to the development of the Group's international governance system.

### B.1.4. Committees

The following Committees also ensure the management of the risk management and internal control systems:

### RISK COMMITTEE

This Committee has the aim of making recommendations on all matters related to Risk Management and Internal Control, including risk policy revision, risk appetite framing and process monitoring, as a means of support to the Executive Committee.

# PRODUCTS COMMITTEE (LIFE AND NON-LIFE)

The Products Committee's main mission is to approve and coordinate the launch of new products of all Group companies, and to update and monitor existing products, during their lifecycle, ensuring that the offer is consistent with the omni-channel and value creation strategy. The Committee is responsible for ensuring that both new and existing products are aligned with the Company's strategic planning and risk appetite as defined by the Executive Committee and that the different guidelines in terms of Product Design and Approval Policies, Risk Management, Investment, Underwriting and Reinsurance are followed.

# ASSETS AND LIABILITIES MANAGEMENT COMMITTEE

The main objectives of the Assets and Liabilities Management Committee (ALCO) are to supervise the asset / liability matching, the investments portfolio and the market risks (namely interest rate risk, currency risk and liquidity risk). Another aim is to establish an optimal structure for the Company's balance sheet to allow maximum profitability, limiting the level of risk possible and monitoring the performance of the Company's investments in terms of risk and return and the implementation of the ALM strategy, as well market and liquidity risks.

### SUSTAINABILITY COMMITTEE

The objective of the Sustainability Committee is to make recommendations and validate or provide support for decisions of the company bodies on all matters related with Sustainability, in particular in defining the strategic pillars of sustainability and monitoring Fidelidade's actions in these areas, in revising procedures and policies from the sustainability perspective and in the general assessment of performance in this area.

# B.1.5. Remuneration rights of the members of the management body

The fixing of the remunerations of the members of the corporate bodies is the responsibility of the General Meeting, since no Remunerations Committee has been set up in the Company.

The members of the Board of Directors are not remunerated for the performance of their functions, unless the General Meeting deliberates otherwise.

The remuneration of the members of the management and supervisory bodies, if any, is fixed with reference to the applicable legal and regulatory standards, and to the principles guiding the policy for fixing the remunerations of the members of the corporate bodies of the Group companies.

The members of the Board of Directors were remunerated for the performance of their functions in 2023, as disclosed in Longrun Portugal, SGPS, S.A.'s Corporate Governance Report.

No indemnity or compensation was paid as a result of any cessation of the functions of a Board Member during the year.

The President of the General Meeting does not receive any remuneration

There are no agreements between the Company and the members of the Management Body that provide for compensation in the event of removal, dismissal without just cause or cessation of the employment relationship, following a change of control in the Company.

There are no share allocation plans or stock options benefiting members of the management and supervisory bodies.

### B.1.6. Transactions with related parties

The Company has adopted a set of transparent and objective rules which are applicable to transactions with related parties, which are subject to specific approval mechanisms.

All transactions with related parties were subject to control.

Operations to be performed between the Company and holders of qualifying shares or entities which are in a controlling or group relationship with them are subject to assessment and a decision of the Board of Directors, and these operations, like all others performed by the Company, are subject to supervision by the Supervisory Board.

Information on business with related parties is in the Financial.

### B.1.7. Assessment of the adequacy of the system of governance

Longrun considers that its system of governance is adequate for the nature, scale and complexity of the risks to which it is exposed, and complies with the requirements set out in the Legal Framework on the Taking-up and Pursuit of the Business of Insurance and Reinsurance.

# B.2. Fit and proper requirements

The Fit & Proper Policy currently in force, which falls within the Legal Framework on the Taking-up and Pursuit of the Business of Insurance and Reinsurance (RJASR), aims to establish general principles for assessing whether the persons who effectively run the Company, supervise it, are its managers or perform key functions within it are fit and proper.

The fit and proper requirements assessed in the terms and for the purposes of this Policy are:

- Integrity;
- Professional Qualification;
- Independence, Availability and Capacity.

Professional qualification is assessed in the light of academic qualifications, specialist training and professional experience.

When assessing academic qualifications and specialist training, value is particularly given to knowledge obtained in the fields of insurance and general finance or in any other area which is relevant for the activity to be performed.

When assessing professional experience, the nature, size and complexity of activities previously performed is compared to those that will be performed in the future.

In the specific case of Top Management, meaning management positions with direct reporting to the executive management body, 5 years' previous professional experience is required.

In the case of key functions, the following professional qualifications are required:

|  | Academic Qualifications  | Specialist Training  | Professional Experience  |
|--|--|--|--|
| Internal Audit<br>(head)               | Higher education in Business<br>Management, Economics,<br>Auditing or similar  | Ongoing training, provided by the Group, to develop technical and behavioural skills to perform the function.  | Preferably 10 years' experience, but this may be less depending on qualifications, experience and relevance of this to the position.   |
| Internal Audit<br>(team member)        | Higher education in Economics,<br>Business Management,<br>Engineering or other relevant<br>areas   | Ongoing training, provided by the Group, to develop technical and behavioural skills to perform the function. Higher education (at post-graduate/ Masters level) in Financial Markets or similar areas is also relevant.   | Preferably 2 years' experience, which may<br>be less depending on the role the employee<br>is performing, the seniority required and the<br>level of responsibility to be assumed. |
| Compliance<br>(head)                   | Higher education in Law,<br>Economics, Business<br>Management, Auditing or similar   | Ongoing training, provided by the Group, to develop technical and behavioural skills to perform the function.  | Preferably 10 years' experience, but this may be less depending on qualifications, experience and relevance of this to the position.   |
| Compliance<br>(team member)            | Higher education in Law,<br>Economics, Business<br>Management, Auditing or other<br>relevant areas   | Ongoing training, provided by the Group, to develop technical and behavioural skills to perform the function. Higher education (at post-graduate / Masters level) in Law, Compliance, European Studies, Economics, Business Management, Information Technologies, or other similar areas is also relevant. | Preferably 5 years' experience, which may be less depending on the role the employee is performing, the seniority required and the level of responsibility to be assumed.          |
| Risk<br>Management<br>(head)           | Higher education in Business<br>Management, Economics,<br>Mathematics, Actuarial Studies,<br>Economics, Statistics or other<br>relevant areas  | Ongoing training, provided by the Group, to develop technical and behavioural skills to perform the function.  | Preferably 10 years' experience, but this may be less depending on qualifications, experience and relevance of this to the position.   |
| Risk<br>Management<br>(team member)    | Higher education in Mathematics,<br>Business Management, Actuarial<br>Studies, Finance, Economics,<br>Actuarial Science, Statistics,<br>Sociology, Engineering other<br>relevant areas | Ongoing training, provided by the Group, to develop technical and behavioural skills to perform the function. Higher education (at post-graduate / Masters level) in Banking and Insurance Management and in Markets and Financial Assets is also relevant.  | Preferably 4 years' experience, which may be less depending on the role the employee is performing, the seniority required and the level of responsibility to be assumed.          |
| Actuarial<br>Function (head)           | Higher education in Mathematics,<br>Actuarial Studies, Economics or<br>Statistics or similar   | Ongoing training, provided by the Group, to develop technical and behavioural skills to perform the function. Higher education (at post-graduate / Masters level) in Actuarial Science is also relevant.   | Preferably 10 years' experience, but this may be less depending on qualifications, experience and relevance of this to the position.   |
| Actuarial<br>Function (team<br>member) | Higher education in Mathematics,<br>Actuarial Studies, Economics or<br>Statistics or other relevant areas  | Ongoing training, provided by the Group, to develop technical and behavioural skills to perform the function. Higher education (at post-graduate / Masters level) in Actuarial Science is also relevant.   | Preferably 4 years' experience, which may<br>be less depending on the role the employee<br>is performing, the seniority required and the<br>level of responsibility to be assumed. |

In line with the Fit and Proper Policy, the scope of application of which is singular, covering the various insurance companies within the Longrun Portugal, SGPS, S.A. universe and Longrun itself, persons who effectively run the Company, supervise it, are its managers or perform key functions within it must possess and demonstrate the capacity to at all times guarantee sound and prudent management of the insurance company, with a view, in particular, to safeguarding the interests of policyholders, insured persons and beneficiaries.

For this reason, they must comply with the requirements of qualifications (fit), integrity (proper), independence and availability. Additional requirements are provided for collegiate bodies.

The following persons are subject to the assessment: members of the management body, members of the supervisory body, the statutory auditor who is responsible for issuing the statutory auditor's report and the responsible actuary.

The following persons are also subject to the assessment: persons who perform other functions which give them significant influence over the management of the Companies, Top-Level Managers, persons who are responsible for or perform risk management, compliance, internal audit and actuarial functions, representatives of the Companies' branches and, where key functions are outsourced, the internal interlocutor for those functions.

The Companies must confirm that the persons subject to the assessment fulfil the fit and proper requirements to perform their respective functions. The Policy therefore sets out the process for assessing those requirements, divided into three major areas: (1) Assessment; (2) Registration; (3) Appointment.

The Assessment Committee is responsible for assessing the fit and proper requirements of the members of the Management and Supervisory Bodies, the Statutory Auditor and the Responsible Actuary. The Assessment Committee is also responsible for assessing the heads of the risk management, compliance and internal audit functions, and also the head of the People and Organisation Division.

The responsibility for assessing other persons – top-level managers, the persons responsible for the actuarial function, branch representatives, staff who perform key functions and those responsible for important or critical functions or activities which are outsourced – lies with the People and Organisation Division.

The assessment is carried out prior to the commencement of functions (initial assessment) and continuing compliance with the fit and proper requirements is confirmed every three years thereafter (successive assessment), by means of a statement presented for the purpose by the interested party, whenever that compliance continues.

Since the appointed persons must inform the insurance company of any facts subsequent to the appointment or to the registration which change the content of the statement initially presented, an extraordinary assessment will be carried out whenever they become aware of any subsequent circumstances which may lead to the requirements not being fulfilled within the scope of their functions.

# B.3. Risk management system including the own risk and solvency assessment

The risk management and internal control systems are managed by the following bodies: the Risk Management Division, the Audit Division, the Compliance Division, the Risk Committee, the Products Committee (Life and Non-Life), the Assets and Liabilities Management Committee and the Sustainability Committee.

# B.3.1. Risk management processes

The following sub-paragraphs describe the Group's risk management processes for each category of risk, including how these are identified, monitored and managed.

# B.3.1.1. Strategic Risk

The Group's medium to long-term strategy is defined on the basis of analysis and discussion in a broad forum, in which reflection is encouraged on the Group's position in the various lines of business, considering the broader evolution of the external macroeconomic situation, the insurance sector and the Group's main stakeholders. The results of this reflection are supported and summarised on key tools and outputs such as the long-term Business Plan and the selection of strategic Imperatives and Orientations.

The Company's strategy is executed by means of a chain of responsibilities beginning with the Executive Committee, which defines the high-level strategic objectives, and then passing to the heads of each Division, who establish strategic objectives for their sphere of action and propose a plan of initiatives to achieve those objectives. The execution of the strategy ends with the Company's employees, who seek, on a daily basis and within the scope of their functions, to achieve the proposed objectives by carrying out the prioritised initiatives.

The strategic decisions taken by the Company are based on well-defined processes of approval and of implementation and monitoring, which have proved to be both effective in terms of implementing the strategy and adequate as a reaction to external factors which may affect the Company's activity.

### B.3.1.2. Underwriting Risk – Product Design and Pricing

The Business Divisions are responsible for managing and assessing this risk. The Business Divisions ensure the technical development of new products, or reformulation of existing ones, including defining their technical characteristics and technical documentation, establishing their prices, which, in the Non-Life lines of business, is done in conjunction with DET (the Statistics

and Technical Studies Division), drawing up rules for delegation of powers and underwriting policies, and drawing up technical information to support the sales activity.

For each product, there is a process of identifying the needs which are intended to be met, bearing in mind the target market, considering the benefits and risks, relating to internal or external factors, including sustainability risks, and defining the Company's strategic objectives which are intended to be achieved with its launch / reformulation.

The launch of new products, reformulation of existing ones and pricing updates are approved in advance by the Products Committee (Life and Non-Life).

When a new product is launched, or when significant changes are made to the characteristics of existing products, training programmes and communication plans are scheduled with the aim of introducing the product to the commercial networks, emphasising, in particular, its characteristics and the underwriting policies that have been defined.

Analyses are periodically undertaken of products/prices, and also of the composition and behaviour of the respective portfolios, with the purpose of assessing how adequate they are in terms of contractual conditions versus profitability. A Value for Money assessment of the products is also carried out bearing in mind the target market.

# B.3.1.3. Underwriting Risk – Underwriting

The Business Divisions are responsible for managing and assessing the risks associated with underwriting the Company's products, and the acceptance of risk is delegated to the sales areas and/or distribution channels in situations where knowledge of the risk is high and the technical risk is low.

The aim of the Company's General Underwriting Policy is to classify the risks according to the level of exposure to and knowledge of the risk. This policy takes the form of underwriting rules and delegation of available competences.

The Company has an Underwriting Policy Acceptance and Supervision Committee, the mission of which is to analyse and accept risks the acceptance of which, as defined in the Underwriting Policy, is not delegated to the Business Divisions.

The Business Divisions are responsible for underwriting risks the acceptance of which is not delegated.

The Business Divisions monitor sales of the products within the defined target market and in line with the underwriting policy.

In order to guarantee that the underwriting policy is properly implemented, in the products' sales phase, the Operations and Procurement Division (DOP) and the Non-Life Business Divisions, in the case of Non-Life products, and the Life Business Divisions, in the case of Life products, check compliance with the underwriting rules defined. Besides this check, the Business Divisions and the Statistics and Technical Studies Division, in the case of Non-Life products, regularly monitor the adequacy of the underwriting policies, by means of statistical indicators of the portfolio's development, the drawing up of risk profiles and occasional analyses of contracts.

There is a system of Portfolio Selection and Checking which occurs monthly, aimed at checking and monitoring customers in the portfolio, in order to safeguard profitability of the business.

There is also a process to monitor underwriting quality, which seeks, on one hand, to identify situations of false declarations or omission of declarations in the issue of contracts and, on the other, to rectify these situations, ensuring articulation between all those involved: the Business Divisions, Commercial Divisions and Operations and Procurement Division. This monitoring process, which seeks to assess irregular types of behaviour, is performed weekly and is mainly supported by cross-referencing with sources of external or internal historical data and identifying anomalous patterns.

# B.3.1.4. Underwriting Risk - Reserving

The Group's Reserving Policy establishes the methodologies for calculating provisions, broken down by line of business and in accordance with the obligations to be estimated. Accordingly, different reserving methodologies are defined for each line of business, based on recognised actuarial methods.

In order to guarantee the reliability of the information used in the process for establishing provisions for the Group's obligations, the quality of the information is validated by reconciling the accounting information with the operational information.

Alongside this process, an analysis is conducted, for the Life segment, of the provisions set up, considering the methodologies used for calculating the provisions and the insurer's historical experience relating to each of the obligations, and compliance with the rules in force regarding the calculation of provisions is also validated. Forecasts are made annually of the technical results for the different lines of business with the aim of assessing the adequacy of the technical bases in force.

For the Non-Life segment, the Group also regularly assesses compliance of the provisions by analysing the obligations in terms of uncertainty, length of contract, nature of claims and expenses with settlement of claims. Compliance with the rules in force regarding the calculation of provisions is also validated. In addition, a range of micro and macro-economic scenarios are used to confirm the adequacy of the amount of the provision.

# B.3.1.5. Underwriting Risk - Claims Management Processes

The Business Divisions are the main players in the management and assessment of risk associated with the Company's claims processes.

The Company's Claims Management Policy is formalised in procedures manuals of the divisions responsible for its management, namely, the Business Divisions, and compliance with it is guaranteed by rules defined in the claims management systems and by the configuring of the profiles allocated to each user of those applications.

In order to promote better following up of claims management, regarding claims which are slow or complex to resolve, time limits are defined for settlement. If these are exceeded, the claims are sent for analysis by specialised sectors. In addition, in business areas which have time limits established by law, the operating systems have an important set of alarm features that guarantee that management is warned when those time limits are becoming critical.

Regular statistical information is prepared on this matter to ensure control of the time limits for settling claims and supervision of those which are covered by reinsurance treaties.

# B.3.1.6 Underwriting Risk - Reinsurance and Alternative Risk Transfer

The Reinsurance Division negotiates and manages reinsurance treaties, closely accompanied by the Executive Committee, which approves the conditions negotiated prior to their acceptance.

As part of the monitoring of this risk, the Reinsurance Division carries out constant follow-up of the treaties, manages the run-off portfolio, controls risk peaks and periodically analyses the technical results by treaty. In order to study annual and multi-annual trends, these analyses include a comparison with the information relating to previous years (minimum 5 years), thus allowing the evolution of the reinsurance technical results to be monitored. This information is used for subsequent negotiations with the reinsurers.

In terms of the Company's Reinsurance Policy, the Reinsurance Division operates in line with the objectives and strategic guidelines defined in conjunction with the Executive Committee and based on an analysis of business needs conducted with the technical and actuarial areas.

The Reinsurance Policy is implemented by the Reinsurance Division, with the drawing-up of proposals, negotiation of treaty conditions, approval of these and their signing and renewal, and monitoring and follow-up of the various reinsurance contracts existing in the Company.

# B.3.1.7. Market Risk

The Company's objectives, rules and procedures on market risk management are governed by means of its Investments Policy, which is revised annually.

The Investments Policy defines:

- The main guidelines for managing investments and how the Company assesses, approves, implements, controls and monitors its investment activities and the risks resulting from those activities;
- Activities related to the Company's investment process, including Strategic Asset Allocation (SAA), Tactical Asset Allocation (TAA), the decision-making process and control and reporting activities;
- The duties and responsibilities of those involved in the investment process.

The Investments Policy aims to ensure alignment between the portfolio objectives and the investment strategy, and to encourage effective and continual monitoring. It is the cornerstone of the Company's investment process.

Considering these aspects, the Company's investment management cycle is composed of the following critical activities:

- Defining Defining and approving the general investment management cycle, including the global investment strategy, investment policies, asset and liability management (ALM) and liquidity management, and strategic asset allocation (SAA);
- Investing Performing all investment activities, in line with the strategies and policies defined (identifying, assessing and approving investment opportunities, and placing, settling and allocating investments);
- Monitoring Monitoring the evolution of the assets portfolio in terms of performance, liquidity and credit quality;
- Managing Reviewing the strategies, policies, benchmarks and limits in line with current and future market conditions/expectations and internal risk capacity;
- Controlling Ensuring compliance with all the strategies, policies, procedures and responsibilities assigned.

### B.3.1.8. Counterparty Default Risk

The Company is essentially exposed to Counterparty Default Risk when selecting and accompanying investments in the different classes of assets and also reinsurers.

Securities issuers are assessed in order to measure their credit quality. This assessment uses various quantitative and qualitative data, including information on their rating, and evaluates the portfolio's compliance with the limits of exposure to this issuer defined in the Investments Policy.

The analysis by investment essentially derives from the selection grid at the time of the asset purchase defined in the Investments Policy, in order to protect insured persons through restrictions on the use of the Company's assets. However, the risk is constantly monitored, and an effort is made to follow the opinions / outlooks of the international ratings agencies so as to prevent a decline in the rating of the securities held. On the other hand, establishing internal limits by class of asset, rating, duration, industry, geography and currency, and not authorising situations of risk accumulation, means that proper spreading of risk can be guaranteed over time.

Regarding reinsurance, decisions concerning the selection of reinsurers are taken in line with the Reinsurance Policy, which only authorises contracts with reinsurers with a minimum credit rating of "A-" or in line with the exceptions defined in the Reinsurance Policy.

### B.3.1.9. Concentration Risk

Management of this risk is connected with the processes for managing other risks, since it is transversal to the different areas.

In order to follow the portfolio's level of exposure to the various sources of concentration risk mentioned, the Business Divisions conduct periodic qualitative analyses of the portfolio.

As part of the Company's underwriting policies, procedures are defined which aim to mitigate Concentration Risk, in particular, when situations are detected in which there are two or more policies which cover risks situated at a location considered to be a common risk, these are classified as situations of risk accumulation and require a specific analysis.

Apart from some exceptions related with the nature of some businesses, the acceptance of Life Risk risks – and the reinsurance of these – takes into account the capital accumulation per entity. Special attention is also given to the underwriting of high capitals per contract or person, and measures are adopted to limit the risk (limiting capitals and/or covers and/or using risk transfer instruments).

Regarding the Concentration Risk associated with investments, as previously stated, the Investments Policy in force defines different exposure limits namely by class of assets, rating, duration, industry, currency and geography. These limits are revised annually and amended when necessary.

Management of this risk associated with reinsurers requires the Reinsurance Division to produce an annual report with a summary of the Company's reinsurance treaties for the following year, plus a summary of the conditions of these treaties and the percentages of exposure to each reinsurer, organised by lines of business, in order to comply with the Reinsurance Policy.

# B.3.1.10. Liquidity Risk

In a short-term perspective, responsibility for managing investments liquidity is given to the Investments Division.

The Company's aim in terms of liquidity is a treasury capable of managing all of the Company's funding needs (cash outflows) in an appropriate timeframe, without resorting to credit or unplanned selling off of assets, and particularly the capacity to generate significant liquidity in a short space of time. In a short-term perspective, the Company also takes into account the cash-in from the investment portfolio and the sales forecasts for financial products being marketed.

In a medium / long-term perspective, the Company conducts a monthly ALM analysis of the liabilities and assets linked to the Life and Non-Life segments.

The analyses performed cover the interest rate gap, considering the yield to maturity and the modified duration of the liabilities and of the respective assets, including the convexity effect, and short and long-term cash flow matching.

This analysis also includes a comparison between the liquidity-generating capacity and the estimated cash flow.

The articulation between functions related to investment, asset and liability management and liquidity is established in the Company's Investments Policy.

In relation, specifically, to Asset and Liability and Liquidity Management processes, in 2023 the Company approved a review of the Asset and Liability and Liquidity Risk Management Policy (the ALM and Liquidity Policy).

Together with the Investments Policy, this Policy describes the strategy for managing financial risks, insurance risks and liquidity risks, in the short, medium and long term, in a context of asset and liability management.

In this way, the ALM and Liquidity Policy seeks to guarantee alignment between assets and liabilities, with a particular focus on maximising return and minimising interest rate risk and liquidity risk.

Taking these aspects into consideration, asset and liability management must be performed, on the one hand, as a risk mitigation exercise and, on the other, as part of the Company's decision-making structure, formulating strategies related with its assets and liabilities. It is therefore composed of the following critical activities:

- Defining Defining and approving the asset and liability and liquidity management strategy;
- Monitoring Monitoring the evolution of cash flow matching and different metrics associated with asset and liability management, producing monthly and annual reports;
- Managing Reviewing the objectives and limits set out in the ALM and Liquidity Policy in line with current and future market conditions/expectations and internal risk capacity;
- Controlling Ensuring compliance with the asset and liability management strategy, limits, procedures and responsibilities assigned.

### B.3.1.11. Reputational Risk

Management of the Company's reputational risk is fundamentally based on:

- The existence of a function responsible for corporate communication and media relations:
- The existence of a brand communication function;
- The function of customer complaints management, which includes providing management information to the heads of the different Company Areas and the Executive Committee;
- Planning and monitoring of the Company's Human Resources;
- The Corporate Social Responsibility programme.
- The existence of a Sustainability Division.

In addition, being aware of the growing importance of reputation for an organisation's standing and success, the Company also set up a Communication Coordination Committee, which meets regularly and is led by the Chairman of the Executive Committee, in order to better articulate the Company's internal and external communication flows.

The activities conducted within this scope have produced results as demonstrated by the various awards the Company has received for service excellence / customer satisfaction.

A focus on operational excellence and service quality has long been a priority for the Group and has a strong impact in terms of customer satisfaction. As a result of this effort, the Group's skill in these areas has been noted, and is identified and recognised by customers.

Fidelidade is proud to have consolidated its leadership as the best insurer in Portugal and to have been recognised on several occasions as a reference brand for the Portuguese. It is the insurance company that has won the most awards in Portugal.

These results are the fruit of continual work. They are a consequence of the innovative products and covers that the Group has developed, thinking about people's real needs and the commitment to giving customers exemplary service and accompanying them closely when they need it most.

# **RECOGNITION**

In 2023, the Group In 2023, the Fidelidade Group continued to be recognised by consumers, partners, and entities in the sector, which demonstrates the relevance of its work in a wide range of areas. A commitment to excellence, which is a distinctive factor in a global market, in which the awards and recognitions achieved demonstrate the Group's focal alignment with the needs and expectations of its stakeholders in each geography.

# REPUTATION

# Trusted brand

For the 22nd year running, Fidelidade was voted a Trusted Brand in the "Motor Insurance" and "Life and Property Insurance" categories. This award demonstrates Fidelidade's responsibility and commitment to consumers, through continuous evolution of services and products, which follow the main trends and respond to customer needs.

Multicare was also recognised for the seventh consecutive year in the "Health Insurance" category.

### Consumer's Choice

Among the 11 insurance brands evaluated, Fidelidade won the Consumer's Choice award for the ninth consecutive year in the "Insurance" category. Rapid response services in the event of an accident, customer support and clear information were the characteristics most valued by consumers. Multicare was distinguished as the Consumer's Choice for the fourth consecutive year in the "Health Systems" category, with the clarity of the information provided, trust in the brand and the breadth of coverage being the most recognised features.

Fidelidade also received the Excellentia Consumer's Choice 2023 award and was recognised as the company that follows the best customer-centric organisational practices.

### Prémio Cinco Estrelas (Five Star Award)

Fidelidade received the Cinco Estrelas 2023 award, which is an evaluation system that measures the degree of user satisfaction with products, services, and brands, according to criteria such as satisfaction through experimentation, value for money, intention to purchase or recommendation, brand trust and innovation.

### Superbrands

Fidelidade and Multicare were once again distinguished as "Top of Mind" brands of excellence, highlighted by their proximity, trust, affinity, satisfaction, and notoriety.

### Prémios Eficácia (Effectiveness Awards)

The Effectiveness Awards recognise the joint work of advertisers and their agencies, based on the measured and proven effectiveness of communication campaigns.

In the ninth edition, the "Fidelidade Pets Ecosystem" project was awarded the gold prize in the following categories: "Connected Ecosystems & Marketplaces", "Financial Services and Insurance", "Low Budget, Commerce & Shopper" and "Activation and Sponsorships".

The "Fidelidade a Todas as Idades" (Fidelidade at All Ages) communication campaign won three awards: gold in the "Financial Services and Insurance" category, silver in "Institutional Communication" and bronze in "Creative Media Use". This campaign reinforced the Group's position of prioritising people and its intention to be present during the various challenges that arise throughout their lives, focusing on issues such as savings, health, property and assistance, and actively working towards sustainable longevity in the community.

### **APCC Best Awards**

Fidelidade and Multicare were honoured by the APCC Best Awards for the sixth consecutive year in the "Insurance and Assistance" (silver) and "Health" (gold) categories. This initiative rewards organisations that stand out most because of their implementation and adoption of good organisational practices in contact centre activity in Portugal, in terms of strategic, operational, and technological management and human capital, and that contribute to the recognition and appreciation of the sector in genera.

### Marketeer Award

Fidelidade won the Marketeer award in the "Insurance" category, which honours the work done by the Group in creating a coherent image and clear communication of the services and products offered and the support provided to customers.

### **Human Resources Awards**

In the 12th edition of the Human Resources awards, Joana Queiroz Ribeiro, Director of People and Organisation at Fidelidade, was once again named "Best Human Resources Director". Fidelidade won in the categories "Senior Management/Active Ageing & Preparation for Retirement" and "Best Company-Personal Life Balance, Flexibility, Well-being and Happiness".

### Randstad Employer Brand Research

A representative study of employer branding based on the perceptions of the general public resulting from an independent survey of almost 163,000 participants and 6,022 companies from all over the world. Professionals value five essential factors when choosing an employer: attractive salary package, work-life balance, pleasant work environment, career progression and professional stability.

Fidelidade was recognised in 2023 as the most attractive company to work for in the insurance sector in Portugal.

# Best Reputation in Industry

Fidelidade and Multicare were distinguished as Best Reputation in Industry 2023 brands. This award is given by OnStrategy as part of a study carried out among a group of more than 50,000 people. For the second year running, Multicare was highlighted among a group of 2,000 brands for its positioning, emotional value, and reputation.

# **Best Workplaces**

Fidelidade was recognised as one of the best companies to work for in Portugal, coming fifth in the Great Place to Work ranking for 2023, while Multicare came sixth.

This is the first time that the two companies have been considered "Best Workplace". According to Great Place to Work, this distinction is given to all the people in an organisation who inspire others to create and maintain excellent work environments.

In addition to Fidelidade and Multicare, Great Place to Work has also

certified Via Directa, GEP, FPE, EAPS, CETRA and CARES.

### Best Non-Life Insurer and Best Insurer for Brokers

In 2023, Fidelidade was recognised by the National Association of Insurance Brokers and Mediators (APROSE) as "Best Non-Life Insurer" and "Best Insurer for Brokers", for the excellence of its services and products.

### B.3.1.12. Operational Risk

Procedures are implemented specifically for managing both operational risk and internal control, namely:

- Documentation and classification of existing control activities, linking them to the risks previously identified in the business processes;
- Decentralised recording of events and subsequent losses, including near misses, resulting from risks associated with the business processes, and also own assessment of risks and control activities.

This risk is discussed further in Chapter B.4.1. Information on the internal control system.

### B.3.2. Risk Management Function

The risk management function is part of the risk management system, and is performed by the Risk Management Division, a first-line body in the corporate structure, reporting directly to the Company's Executive Committee. This function is performed across all the Group's insurance companies.

The mission of the risk management function is based on defining, implementing and maintaining a risk management system which enables identification, measuring, monitoring and reporting of risks, individually or collectively, including risks not contemplated in the solvency capital requirement, enabling the Executive Committee and the various Divisions involved to incorporate this knowledge into their decision-making process.

The activities carried out by the Risk Management Division, in 2023, were fundamentally based on the enhancement and consolidation of several matters related with the three solvency pillars, and technical aspects and certification of information produced within this scope.

The following activities can be highlighted:

- conducting the annual own risk and solvency assessment (ORSA) and reporting the results to the ASF in the respective supervisory report;
- preparing and sending annual information, with reference to 31 December 2022, incorporated in the Quantitative Reporting Templates (QRT), which has been subject to certification by the statutory auditor and the responsible actuary pursuant to the regulations issued by the ASF, and also the Regular Supervisory Report;
- reporting to the ASF and publicly disclosing the Solvency and Financial Condition Report relating to 31 December 2022, accompanied by certification by the statutory auditor and the responsible actuary;
- preparing and sending the quarterly quantitative reporting under Solvency II.

It is also important to mention the activities related with the review of the system of governance, namely, the review and maintenance of policies and the review of processes and data quality, with the review of the Risk Appetite Framework and the conducting of the ROCI Cycle – 2023.

# B.3.3. Own risk and solvency assessment

The Companies in the Group have an ORSA Policy with the aim of establishing the general principles for the own risk and solvency assessment regarding:

- Processes and procedures;
- Functions and responsibilities;

- Criteria and methodologies;
- Reporting;
- Articulation with the strategic management process and use of the ORSA results.

According to the Policy, the ORSA aims to provide a level of security which is acceptable to the Company's Executive Committee regarding compliance with the strategic objectives, within the framework of the risk appetite established.

Accordingly, considering the risk appetite defined, the ORSA seeks to provide a prospective vision of the capacity of the Company's available capital to support different levels of risk, resulting both from strategic decisions and from scenarios involving external factors.

The ORSA is, therefore, an integrated process in the Company's strategic management, which enables a global vision to be gained on a regular basis of all the relevant risks which are a threat to the pursuit of the strategic objectives and the consequences of these in terms of (future) capital needs.

This process also contributes to promoting the Company's risk culture, by measuring the risks the Company is exposed to (including those not considered in the capital requirements), introducing the concept of economic capital in the management processes and communicating the risks, thereby allowing those receiving this information to incorporate this knowledge into their decision making.

In order to comply with these objectives, the ORSA process is divided into five major activities: (1) definition of the business strategy and risk appetite; (2) global solvency needs assessment; (3) stress tests and analysis of scenarios; (4) prospective assessment of the global solvency needs; (5) reporting. In addition to these five major activities, a further activity is defined: continual monitoring of the Company's solvency position.

The Executive Committee is responsible for steering the entire ORSA process, including approving it. The CRO (the member of the Executive Committee responsible for risk management) and the Risk Committee are responsible for regularly monitoring the ORSA process, by means of regular monitoring meetings. The Risk Management Division and the Strategic Planning and Business Development Division are involved in carrying out the process.

When performing the ORSA, the Company begins by conducting an assessment (which is qualitative and, whenever so justified, quantitative) of the possible differences between the Company's risk profile and the assumptions underlying the calculation of the SCR using the standard formula.

The global solvency needs are then calculated taking into account the Company's risk profile. The concept of Economic Capital is used to produce this calculation, which is based on the standard formula for calculating the solvency capital requirement (SCR), and the changes that the Company deems relevant to better reflect its risk profile are introduced. In this process, all the risks that the Company is or may be exposed to are identified. These risks are assessed guantitatively and/or qualitatively.

As a complement to the assessment of the global solvency needs, a series of stress tests and sensitivity analyses are planned in order to validate the defined strategy in extreme scenarios.

To provide a prospective vision of the Company's risk profile and, consequently, of its global solvency needs, forecasts are produced, for a time period which coincides with the period defined in the strategic planning, of the Company's financial position, the result of its operations, the changes in its own funds and its solvency needs.

The ORSA is conducted annually and may also be carried out extraordinarily in certain situations. Reports are produced both for the supervisor and for internal use.

Also within the scope of the ORSA process, continual assessment is carried out of the regulatory capital requirements and the requirements applicable to the technical provisions. This consists of the production of a monthly report containing the estimated Solvency II position, adjusted by the effect of capital optimisation measures in progress or being studied.

The ORSA plays a key role in the management of the Company, and the results obtained from it are taken into consideration in the Company's Risk Management, in Capital Management and in Decision Making.

One of the key elements of the ORSA is to identify and measure the risks to which the Company is exposed and project their evolution for the period under analysis.

Therefore, based on the results obtained, the Company defines possible actions to be taken:

- Assuming the risks;
- Taking additional mitigation measures (controls/ capital, etc.);
- Transferring the risks; or
- Eliminating activities which lead to risks which the Company is not willing to run.

The ORSA also provides support for the main activities related with Capital Management, namely:

- Assessing, together with risk management, the risk appetite structure in relation to the business strategy and capital management strategy;
- Contributing to the commencement of the strategic planning process, through the performance of a capital adequacy
  assessment in the most recent period, involving both regulatory capital and economic capital;
- Monitoring capital adequacy.

Considering the results obtained in the ORSA, and if the capital requirements are not in line with those defined, both in regulatory terms and in terms of other limits defined internally, the Company defines the corrective actions to be implemented, in order to restore the adequate/intended level of capital.

# B.4. Internal control system

# B.4.1. Internal control system information

The Risk Management Division is responsible for managing operational risk and the Company's internal control system.

In turn, the Audit Division is responsible for assessing the adequacy of the system of operational risk management and the internal control system, in order to report fragilities / deficiencies detected and make recommendations for their improvement.

Management of the Company's operational risk and its internal control is performed according to the following flow diagram:

# **BUSINESS PROCESSES**

All the Company's business processes are documented considering a pre-defined "tree" of processes containing three levels (macroprocess; process; sub-process) that represent the activities of an insurance company.

Documentation and updating of the Company's business processes are a requirement for the risk management and internal control systems.

# **RISKS AND CONTROLS**

For the documented business processes, the significant risks to which they are exposed are identified, classified in line with a predefined risk matrix. Existing mitigation mechanisms (controls) are identified for these risks.

The risks and controls existing in the Company are thus documented and characterised.

### **ASSESSMENT**

To assess the Company's operational risk, quantitative information is collected on the risks previously identified by means of own assessment of risk questionnaires and the recording of loss events and subsequent losses.

The assessment of the internal control system is supported by a process of own assessment of the controls, which occurs by means of responses to questionnaires. These questionnaires aim to assess the effectiveness of the controls in mitigating risk.

It is important to mention that the Company's various Structural Bodies are responsible for enhancing the risk management and internal control process, in order to ensure that the management and control of operations is performed in a sound and prudent manner. They are also responsible for ensuring that documentation on the business processes, respective risks and control activities exists and is up to date.

# B.4.2. Information on activities performed by the Compliance Function

The Compliance Division performs functions related to management of Compliance risks, including, among others, the risk of money laundering and terrorist financing, and also the risk of faults in personal data processing and protection. The Compliance Division is a structural body, with functional independence, which performs key functions within the system of Risk Management and Internal Control.

The Compliance Division's mission is to define, implement and maintain a Compliance risk management cycle, contributing so that the management bodies, management structure and staff of the Group Companies comply with the legislation and standards in force at a given time, both externally and internally, and with the guidelines of the national and international supervisory bodies, in order to avoid situations of non-conformity that may harm the Group companies' image and their reputation in the market, and/or that may give rise to financial losses.

In 2023 the Compliance Division carried out a significant number of initiatives with the aim of strengthening the internal control mechanisms and safeguarding an adequate level of compliance with the legislation and standards in force at any given time, both externally and internally:

| <b>Compliance Topic</b>                                   | Brief Description  |
|---|--|
| Analysis of regulatory amendments                         | Assessment of the potential impacts of new regulations, contributing in this way to timely adaptation to new requirements and obligations and managing the Company's reputational risk.  |
| Communication and Training                                | Designing and implementing a communication and training plan to increase awareness and build capacity among employees on the various Compliance topics.  |
| International governance model                            | Implementation/ improvement of control processes relating to money laundering prevention, bribery and corruption, product analysis, advertising tools and data protection in the Company's subsidiaries and branches.                |
| Anti-money laundering and counter-<br>terrorist financing | Improvement of control tools for filtering counterparties and monitoring operations, and in Know Your Counterparty (KYC) processes within the scope of investment processes. Designing and developing training content (e-learning). |
| Prevention of bribery and corruption                      | Implementation of a programme to identify, assess and mitigate risks related to bribery and corruption. Development and communication of the Anti-bribery and anti-corruption policy.  |
| Analysis of products and advertising and marketing tools  | Consolidation of methods to follow products' management life cycle – Compliance By Design – including the process for checking compliance with regulatory requirements on the subject of advertising in the insurance sector.        |
| Prevention of anti-competition practices                  | Implementation of a programme to identify, assess and mitigate risks related to anti-competition practices.  |
| Data protection   | Consolidation of the method for identifying, assessing and mitigating risks linked to data protection. Designing and developing training content (e-learning).   |

The Compliance Policy establishes the strategy, mission, governance, types of risks and the processes associated with the exercise of the Compliance function in the Group, and is duly formalised and available to all employees in the internal communication channels.

# B.5. Internal Audit Function

As stated above, the internal audit function is given to the Audit Division, which is a first-line body in the corporate structure, reporting directly to the Company's Board of Directors. Its mission is to guarantee assessment and monitoring of the Company's risk management and internal control systems. Its general purpose, therefore, is to contribute to creating value and improving circuits and procedures, seeking to increase the effectiveness and efficiency of operations, the safeguarding of assets, trust in the financial reporting and legal and regulatory Compliance.

The rules and principles that the Internal Audit function must obey are established in the Internal Audit Policy, which was revised in September 2023.

This Policy sets out the competence and scope of intervention of the internal audit function, which is performed by the Audit Division within the scope of the Group's insurance undertakings.

Three mechanisms are used to preserve the independence, impartiality and objectivity of the internal audit function. Firstly, persons who perform the internal audit function are not responsible for any other operational functions. Secondly, the internal audit function communicates its conclusions directly and exclusively to the Chairman of the Board of Directors. Lastly, all the audit work carried out, in particular the conclusions obtained and the recommendations issued, is duly documented and filed. In 2023, the implementation of the internal audit module of the Corporate Governance software application used by the Risk Management Division and the Compliance Division was concluded. This allows the audit work performed and its conclusions to be documented, as well as monitoring of the level of implementation of the recommendations made. The application also enables the audit reports to be made available to all relevant parties.

To perform its function, the Audit Division has access to all the structural bodies, and to all the documentation, and the management bodies, top-level managers and staff of the various insurance companies must cooperate with the Audit Division, providing it with all the information they have and that is requested of them.

The internal auditors, for their part and in the performance of their functions, must follow the deontological principles set out in the Internal Audit Policy, in particular those of independence, integrity, confidentiality, objectivity and competence. The Policy also rules on the reporting of conflicts of interest.

Regarding the audit process, there are definitions of the types of internal audit, modes of intervention (in person and at a distance) and the scope of auditing activities (global or sectorial) which must be included in the annual audit plan to be submitted for the appreciation of the Board of Directors.

When performing the internal audits, the auditors must observe the procedures established in the Policy regarding the naming of the team, the establishment of the audit schedule and the preparation and conducting of the audit.

In terms of reporting, principles are set out which must govern the drawing up of the reports, their minimum content, the persons to whom they are addressed and the type of reports (preliminary report and final report). There are also provisions on internal audit's monitoring of the application of any improvement actions proposed, with the production of follow-up reports whenever justified.

Lastly, the Audit function is responsible for producing the Annual Audit Report, which contains an analysis of compliance with the Annual Audit Plan, identifies the work undertaken and provides a summary of the conclusions obtained and recommendations issued. The Annual Audit Report is submitted to the Chairman of the Board of Directors for analysis.

# B.6. Actuarial Function

Due to the nature, complexity and scale of the Companies' portfolios, the actuarial function is subdivided into life actuarial and nonlife and health actuarial.

The actuarial function coordinates and monitors the calculation of the technical provisions according to the financial statements, and, for such purpose, assesses both the methodologies applied and the amounts set out in the financial statements.

When calculating the technical provisions, the ASF rules are observed, namely regarding the identification of the obligations to be accounted for and the calculation methods to be observed.

The actuarial function involves the calculation of the technical provisions for solvency purposes, with calculation of the best estimate and risk margin.

The calculations are made as part of the reporting to the ASF, evolution over time is analysed and comparisons are made with the statutory reporting amounts, and any differences are identified and documented.

The actuarial function reports regularly to the Executive Committee on the results obtained from monitoring the provisions levels.

The Life and Non-Life actuarial functions produce annual actuarial reports related to the annual period being analysed.

The information used by the actuarial function is subject to validation processes which include, among others, comparisons with previous positions and with the statutory reporting amounts, and any divergences are identified and justified, and, if necessary, corrected.

The actuarial function monitors the prospective valuation of the technical provisions for solvency purposes, assessing its reasonableness, taking into account the strategic objectives assumed by the Companies, the factors for converting the valuation of the obligations in the financial statements to their valuation for solvency purposes and the application of measures, either regulatory (transitional deduction to technical provisions) or management measures (changes in the contract boundaries of group risk life insurance contracts and changes in the characteristics and guarantees of new products sold in the life savings segment).

There is a policy for designing and approving new products and for reformulating existing ones, which sets out the actuarial function's articulation with the business and marketing areas which are responsible for proposals for new products and respective specifications. The same applies to changes to existing products, where the actuarial function intervenes by giving its opinion on the proposed changes.

The actuarial function provides support to the reinsurance area in the negotiation of reinsurance treaties, providing information with risk and profitability metrics and sensitivity analyses and portfolio statistics, and monitoring the evolution of the reinsurance treaties, including their conditions in the actuarial analyses conducted. The adequacy of the treaties for the Companies' obligations is subject to actuarial analysis.

# B.7. Outsourcing

# B.7.1. Outsourcing Policy

In line with the Outsourcing Policy, the scope of application of which is singular, covering the various insurance companies within the Longrun Portugal, SGPS, S.A. universe, general principles are established which are applicable to the outsourcing of critical or important functions or activities, and the main process activities leading to their contracting either from within the group or outside of it: (1) Identification and documentation of the critical or important functions or activities, (2) Selection of the service provider; (3) Contract formalisation; (4) Notification to the ASF.

Insofar as the Companies maintain full responsibility for any functions or activities which may be outsourced, definitions are provided of the main aspects to be implemented related with the monitoring inherent to the outsourced function or activity, and the

responsibilities of each of the participants are identified, both in the outsourcing process and in the subsequent monitoring of the service provider.

The Outsourcing Policy also establishes the principles and process applicable to new outsourcing of critical or important functions or activities.

# B.7.2. Outsourced critical or important functions or activities

Of the range of functions or activities considered critical or important that are outsourced in the Company, of note are the activities related with asset management regarding, on the one hand, a Senior Secured Loans portfolio and, on the other, four Investment Grade Fixed Income Securities portfolios plus a series of unit-linked portfolios managed by three external providers.

The jurisdictions of the providers of these services are located in Portugal, Ireland, the United Kingdom, Luxembourg, Germany and Hong Kong.

Among the functions outsourced outside the group, of note are the Contact Center management and operation services, provided in Evora and Lisbon, at the premises of a service provider with its registered office in Portugal, and the management and operation services provided by Data Centers, in Evora, Lisbon and Porto, by service providers with their registered offices in Portugal.

Also of note is the outsourcing of Microsoft Applications services, housed in a cloud infrastructure and the respective maintenance, updating, performance monitoring and information security control services. The service is provided by Microsoft Ireland Operations Limited, with its registered office in the Republic of Ireland.

Lastly, services for the clinical management of personal accident claims in sports insurance are outsourced to Trueclinic, with its registered office in Porto.

# B.8. Any other information

# B.8.1. Option to produce a single own risk and solvency assessment document

As soon as the regulations have been created for such, the Group intends to request permission to produce a single own risk and solvency assessment document.

# C. Risk Profile

Risk management is an integral part of the daily activities of the Longrun Group Companies. An integrated approach is applied to ensure that the Group Companies' strategic objectives (customers' interests, financial strength and efficiency of processes) are maintained.

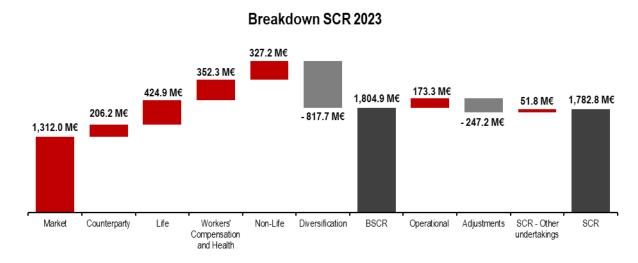

On the other hand, this integrated approach ensures value creation via the identification of adequate balance between risk and return, simultaneously guaranteeing the Companies' obligations to their stakeholders.

Risk management assists the Companies in identifying, assessing, managing and monitoring risks, in order to ensure that adequate and immediate measures are adopted in the event of material changes in their risk profile.

Accordingly, to outline Longrun's risk profile the various risks to which the Group is exposed are identified and then assessed.

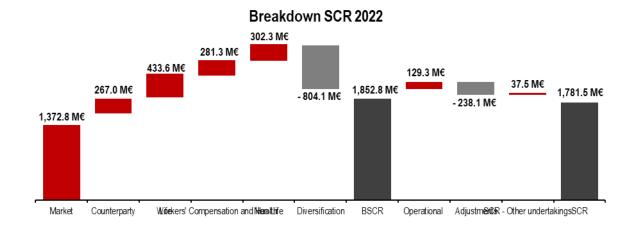

The risk assessment is based on the standard formula used to calculate the solvency capital requirement. For other risks, not included in that formula, the Group has opted to use a qualitative analysis to classify the foreseeable impact on its capital needs.

Hence, the calculation of Longrun's solvency capital requirement (SCR) with reference to 31 December 2023 was as follows:

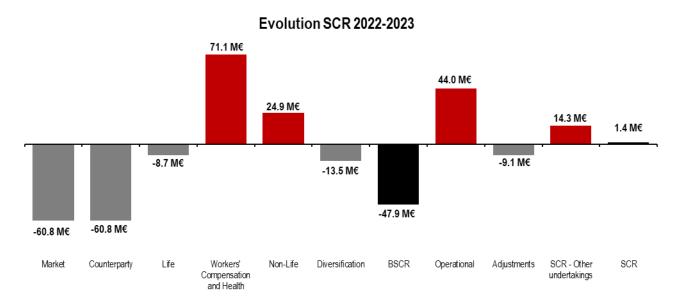

The market risk is clearly prominent in this requirement, followed by the much lower underwriting risks (of which the Life underwriting risk is more significant) and counterparty default risk. Operational risk is the lowest of the risk modules that make up the SCR calculated on the basis of consolidated data in line with Article 336 a) of Delegated Regulation (EU) 2015/35.

The same calculation relating to 31 December 2022 was as follows:

The increase of EUR 1.4 million is shown in the graph below:

The following elements can be highlighted in this evolution:

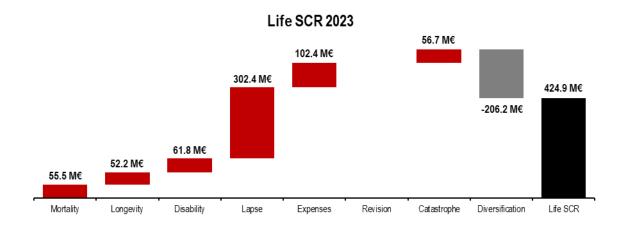

- The decrease in the market risk, as detailed in Chapter C.2.;
- The increase in the non-life underwriting risk, presented in Chapter C.1.2.: and
- The increase in the workers' compensation and Health underwriting risk, presented in Chapter C.1.3.: and
- The decrease in the counterparty default risk, presented in Chapter C.3.;
- The increase in operational risk, presented in Chapter C.5..

These risks will now be analysed, in particular with regard to their nature and impact on Longrun.

# C.1. Underwriting risks

# C.1.1. Life underwriting risk

The life underwriting risk is the second most significant for Longrun.

Analysing the sub-modules that make up this risk, the lapse risk is the most important within the life underwriting risk module.

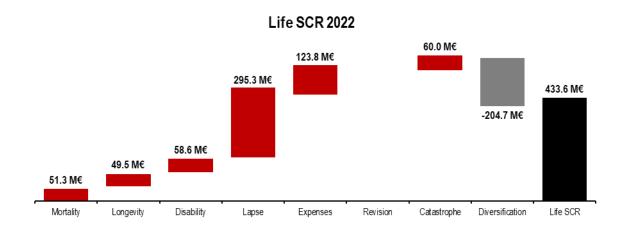

Its importance results from the impact of temporary annual renewable contracts linked to mortgages and contracts with the "Funeral Service Organisation and Expenses" and "Adjustment of the funeral service to a Vault, Drawer or Perpetual Grave" covers, which Fidelidade is not entitled to cancel or change the prices of, so that the contract boundaries considered for the purpose of assessing the technical provisions are, for the former, the maturity of the mortgage associated with each of them and, for the latter, indefinite.

The second most significant sub-module, although carrying much less weight than the lapse risk, is the expense risk, which basically results from the fact that, when calculating the capital requirements of this risk sub-module, the commissions to be paid for the intermediation activity of brokers, within the scope of Article 31 of Commission Delegated Regulation (EU) 2015/35, of 10 October 2014, were included as part of the total amount of the Life obligations, as per the understanding of the ASF, and, consequently, these were subject to the shocks applicable to this risk.

The disability risk appears with a lower value. Its weight is the result of the significant amount of sums insured associated with life risk contracts. The mortality and catastrophe risks, with similar values, both arise from Life Risk insurance contracts, and lastly, there is the longevity risk, the significance of which is relatively low in this risk module, since the Companies' Annuities portfolio is small.

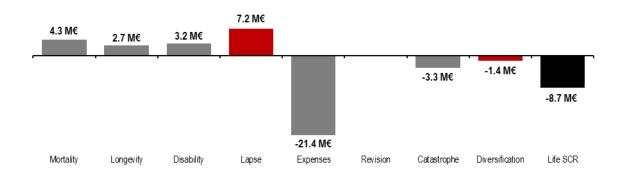

The revision risk is zero since there is no exposure to this risk.

The Life SCR at 31 December 2022 was:

The decrease of EUR 8.7 million is shown in the graph below:

# Evolution Life SCR 2022-2023

The decrease in the Life underwriting risk is basically the result of the decrease in expenses. For the remainder of the underwriting risks there is an increase as a result of the increase in the volume of the prosperity company group's portfolio.

# C.1.2. Non-Life underwriting risk

Premium and Reserve

The non-life underwriting risk is the fourth most significant for Longrun.

# Non-Life SCR 2023 88.5 M€ 37.2 M€ 327.2 M€ -89.9 M€

Within this sub-module, the premium and reserve risk is the most important.

Lapse

The weight of this risk basically results from the volume of premiums and reserves relating to motor insurance contracts (liability and other covers), fire and other damage insurance, general liability insurance, and assistance.

Catastrophe

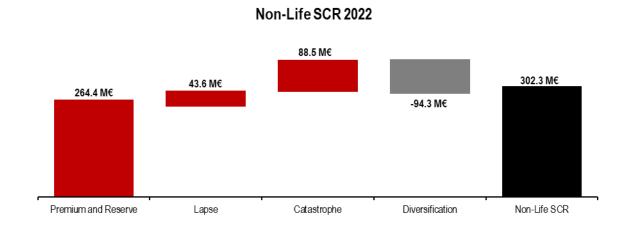

Diversification

Non-Life SCR

With a much lower figure, there is the catastrophe risk, which basically arises from the significant amount of sums insured with seismic phenomena coverage. However, in the event of a seismic phenomenon, because of the existing reinsurance contracts only a part of the liability will be assumed by the Companies. The effect of this risk is not significant for this reason. It is also important to state that the mitigating effect of these reinsurance contracts is considered in the counterparty risk module.

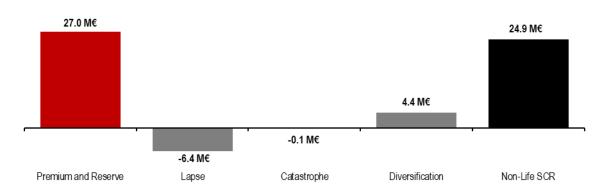

Regarding the lapse risk, its weight is less insignificant, given that the insurance contracts have a contract boundary up to the next renewal date.

The Non-Life SCR at 31 December 2022 was:

The increase of EUR 24.9 million is shown in the graph below.

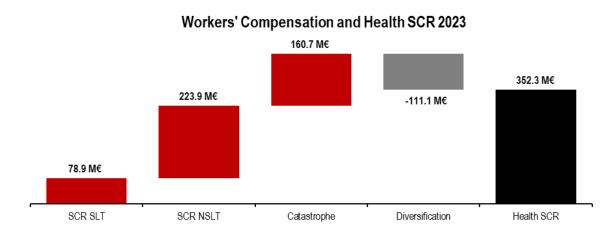

# Evolution Non-Life SCR 2022-2023

The increase in this risk results from the Companies' activity, with an increase in the volume of premiums and reserves of contracts in the motor, fire and assistance lines of business.

### C.1.3. Workers' Compensation and Health underwriting risk

In terms of weight, it is the third risk in the hierarchy of underwriting risk modules.

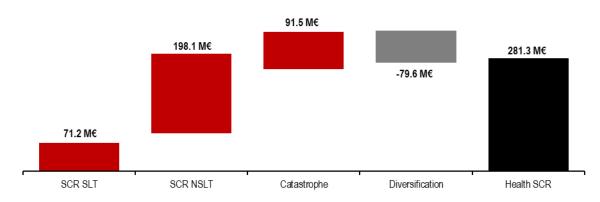

The most significant sub-module is the NSLT (not similar to life techniques) health sub-module, originating from the premium and reserve risk in workers' compensation and personal accidents and health lines of business.

The second largest sub-module is the catastrophe risk sub-module, mainly resulting from the concentration of accidents, given the sums insured involved.

The SLT (similar to life techniques) health sub-module presents a lower figure, and is basically composed of longevity risk resulting from pensions and permanent assistance expenses in the workers' compensation line of business.

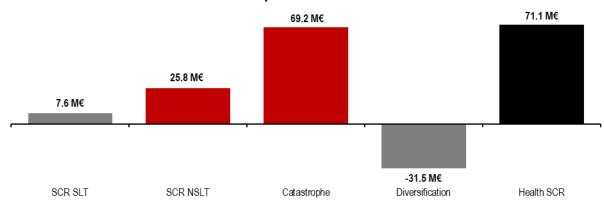

The Health SCR at 31 December 2022 was:

# Workers' Compensation and Health SCR 2022

The increase of EUR 71.1 million is shown in the graph below.

# Evolution Workers' Compensation and Health SCR 2022-2023

The evolution in this module was basically due to:

- The Group's activity;
- The catastrophe risk due to the increase in the accidents concentration risk.

# C.1.4. Mitigation measures – underwriting risk

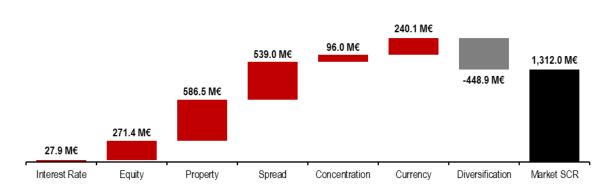

For a number of lines of business, the Group uses reinsurance contracts which guarantee mitigation of underwriting risks for life, non-life and health. This mitigation is taken into account when calculating the respective capital requirements.

The effect of this mitigation when calculating the capital requirement associated with underwriting risks is also reflected in the counterparty default risk module.

# C.2. Market Risk

Market risk is the Longrun's most significant risk and is clearly above the other risk modules.

# Market SCR 2023

Within this module, the most important sub-module is property risk, reflecting the investment strategy being pursued, where there is significant exposure to the real estate market.

The second most important market risk sub-module is spread, which is a result of the Group's high exposure to fixed income financial instruments, other than European government bonds.

The third most important sub-module in the market risk module is the equity sub-module, as a result of the Group's significant exposure to equity markets.

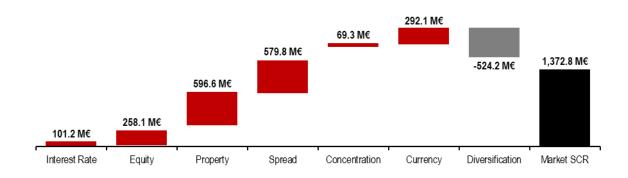

The fourth most important sub-module is currency, the main unhedged foreign currency exposure being to the US Dollar, the Mozambican Metical and the Peruvian Sol. The currency risk also reflects the hedging for the most significant exposures to foreign currency.

The concentration risk sub-module is the fifth module in terms of importance, where the Group's greatest exposures are to the economic groups HSBC and Caixa Geral de Depósitos and to the Republic of Peru.

The risk with the lowest value is the interest rate risk. Its low value results from the Asset and Liability management carried out by the Group with the aim of maintaining the duration gap at low values.

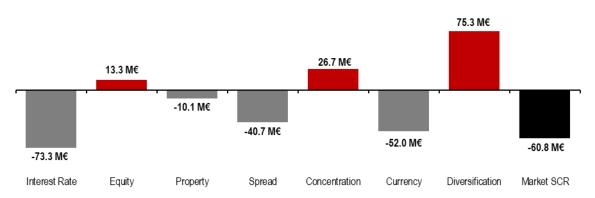

The Market Risk SCR at 31 December 2022 was:

# Market SCR 2022

The decrease of EUR 60.8 million is shown in the graph below.

# Evolution Market SCR 2022-2023

The decrease in spread risk is basically due to the derisking carried out in the corporate debt portfolio.

The decrease in currency risk is basically explained by the decrease (in absolute terms) in direct exposure to PEN (Peruvian Sol) and USD (US Dollar).

The slight increase in the equity risk is explained by the significant rise in the symmetric adjustment, and the total exposure to equity fell slight slightly compared to the previous year.

The decrease in interest rate risk is justified by the change in the portfolio and in the interest rate curve.

The change in property risk is explained by the slight decrease in both direct and indirect exposure to real estate assets.

The increase in concentration risk is predominantly explained by the increase in exposure to the Republic of Peru and the HSBC Group.

### C.2.1. Mitigation measures – market risk

The Fidelidade Group Companies' investment process, besides guaranteeing compliance with the prudent person principle, seeks to enable both rational and reasoned decisions when selecting assets and an adequate balance between risk and return.

The process, therefore, begins with the identification of investment opportunities, through tracking, identification and analysis of investment opportunities all over the world, which leads to investment proposals being presented. These are based, on the one hand, on qualitative aspects, such as a description of the investment, including different possibilities on how it can be made, and a description of the business rationale, and, on the other, on quantitative aspects such as financial indicators or the expected return.

These proposals are analysed, including a preliminary study on capital consumption in the light of the Solvency II rules.

If the investment proposal is accepted, an investment case is prepared, containing a summary of the investment to be made, an analysis of compliance with the legal limits and the limits set out in the Companies' Investments Policy, an analysis of the adequacy of the investment in ALM terms (cash flow matching), calculation of the capital consumption associated with the investment in line with the Solvency II rules.

This investment case includes an Internal Communication to the Executive Committee which contains the proposal and the grounds for making the investment, as well as other information. When securities transactions are performed, the traders responsible for these are subject to limits defined in the Investments Policy.

The entire process falls within the Group's general investment guidelines.

According to these guidelines, the main objective of the investment portfolio is to generate income for the Companies, while considering the associated risks and other restrictions arising from the business strategy defined by the Executive Committee.

Assets are allocated to each investments portfolio in a way that enables the aggregate return from all portfolios and respective cumulative risk to meet the established investment objectives.

### Market Risk - Currency

Using futures, forwards and swaps contracts the Companies hedge the currency exposure of their directly or indirectly held assets:

- The exposure to assets denominated in American Dollars (USD) and in Hong Kong Dollars (HKD), given the high correlation between USD and HKD, is mitigated by using futures, forwards and swaps contracts in USD;
- The exposure to assets denominated in Pounds Sterling (GBP) is mitigated by using futures, forwards and swaps contracts in GBP;
- The exposure to assets denominated in Yens (JPY) and in Canadian dollars (CAD) is mitigated by using forwards in JPY and CHF.

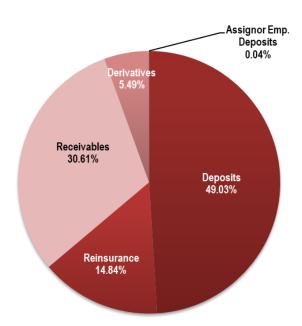

The Group intends to replace the futures contracts with similar contracts, at the end of their maturity period.

# C.3. Counterparty Default risk

The counterparty default risk module is the fifth highest of all the risks assessed by Longrun.

The breakdown of this risk by counterparty type at 31 December 2023 is:

# Counterparty Default Risk Breakdown

The solvency capital requirement for the counterparty default risk results essentially from the component relating to deposits (around 49.03%), in which exposure to Caixa Geral de Depósitos carries significant weight. Of the remaining exposures, the most significant is that relating to exposure to counterparties from which the Group has Receivables.

# C.4. Liquidity risk

The Longrun's liquidity risk is managed so that there is always capacity to meet the Group's obligations and liabilities.

The Liquidity Risk is analysed individually for the following European companies: Fidelidade, Via Directa, Multicare, Fidelidade Assistance and Companhia Portuguesa de Resseguro, as these offer a good approximation to the Group's Liquidity level. The same method is applied in the following non-European companies: Garantia, Fidelidade Angola, Macau Vida, Macau Não Vida, La Positiva Seguros y Reaseguros, La Positiva Vida Seguros Y Reaseguros, Alianza Vida Seguros y Reaseguros, Alianza Compania de Seguros y Reaseguros, Alianza Garantia Seguros Y Reaseguros, Fid Chile Seguros Generales, Fidelidade Moçambique and La Positiva S.A. - Entidad Prestadora de Salud.

Accordingly, an ALM analysis is prepared monthly for the European companies, and includes Assets and Liabilities, and Monitoring of the ALM and Liquidity Policy. For the non-European companies, the ALM analysis, including Assets and Liabilities, is prepared on a quarterly basis.

The ALM analyses conducted cover the interest rate gap, considering the yield to maturity and modified duration of the liabilities and the respective assets, including the convexity effect, and short and long-term cash flow matching. This analysis also includes a comparison between the cash flow matching and liquidity-generating capacity of assets without maturity, namely shares, funds and property.

Liquidity-generating needs are analysed following the ALM process. Based on the ALM report, the adequacy of the portfolio size is tested, in particular, compared to the known liabilities, taking into account the movements of liabilities maturities foreseeable in the current month. The result of this diagnosis is the application or generation of liquidity, identifying portfolios and amounts of liquidity to be generated or applied that lead to recommendations on the need to purchase or sell assets.

The ALM and Liquidity Policy describes a series of characteristics for classifying the asset liquidity and consequently liquidity levels based on situations of stress, on both the liabilities and assets side.

Given the above, there is considered to be adequate mitigation of this risk in the Group, which allows for the conclusion that this risk is low.

Regarding liquidity risk, "expected profits included in future premiums" (EPIFP) is considered to be the current expected value of future cash flows resulting from the inclusion in the technical provisions of premiums relating to existing insurance and reinsurance contracts, which should be received in the future, but which may not be received for some reason other than the occurrence of insured events, regardless of the legal or contractual rights of the policyholder to terminate the policy.

The EPIFP, at 31 December 2023, was.

Amount in thousand euros

Expected profits included in future premiums 614,777

This figure only refers to the life risk line of business, and the methods and main assumptions described in point D.2.1 of this report are used.

Premiums considered when calculating this profit are net of reinsurance obligations.

Lastly, the valuation referred to in Article 260(1) d) ii) of Commission Delegated Regulation (EU) 2015/35, of 10 October 2014, is not adjusted to the characteristics of the products associated with this line of business.

# C.5. Operational risk

Operational risk is the risk of losses resulting either from the inadequacy or failure of internal procedures, persons, or systems or from the occurrence of external events.

This is the risk module with the least weight of all the risks assessed by the Companies. Its increase reflects the evolution of the activity in the life business and the increase in unit-linked expenses.

In its management of operational risk and internal control, the Group identifies, within its processes, the most significant operational risks to which each of these are exposed (based on a pre-defined risk matrix) and it documents the controls which exist to mitigate these.

Additionally, to assess each Group Company's operational risk, quantitative information is collected on the risks previously identified and an assessment is carried out of the internal control system, supported by a process of own assessment of the control activities documented.

# C.6. Other risks not included in the standard formula

Risks that do not fall within the standard formula are identified and assessed qualitatively (and quantitatively if so justified) as part of the ORSA process.

For the risks that are not present in the standard formula and that were analysed in this accounting period, no materially significant risks were identified at Group level, although the legal risk has been considered as having a potential impact on some of the group companies.

### C.6.1. Reputational risk

Management of the Group's Reputational Risk is fundamentally based on:

- The existence of a function responsible for corporate communication and media relations;
- The existence of a brand communication function;
- The function of customer complaints management, which includes providing management information to the heads of the different Areas of the Companies and the Executive Committee;
- Planning and monitoring of the Companies' Human Resources;
- The Corporate Social Responsibility programme.

In addition, being aware of the growing importance of reputation for an organisation's standing and success, the Group also set up a Communication Coordination Committee, which meets regularly and is led by the Chairman of the Executive Committee, in order to better articulate all of the Companies' internal and external communication flows.

The activities conducted within this scope have produced results as demonstrated by the various awards the Company has received for service excellence / customer satisfaction. This risk is therefore considered to be adequately mitigated and is therefore classified as low.

### C.6.2. Strategic risk

The Group's strategy is attained by means of a chain of responsibilities beginning with the Executive Committee, which defines the high-level strategic objectives (this process is accommodated within a governance model which involves the Board of Directors, the Investments Committee and the Advisory Board), passing to the heads of each Division, who are responsible for outlining plans

to achieve those objectives, and ending with the Companies' employees, who seek to achieve the proposed objectives on a daily basis within the scope of their functions.

The strategic decisions taken by the Group are based on well-defined processes of approval and of implementation and monitoring, which have proved to be both effective in terms of implementing the strategy and adequate as a reaction to external factors which may affect the Companies' activity. This risk is therefore considered to be low.

# C.6.3. Business (continuity) risk

Like any other insurance undertaking operating in Portugal, the Companies may be exposed to potential market events. However, this risk is classified as low, given the Group's strong position in the Portuguese insurance market, which has also been increasing.

When analysing this risk, the possibility of the Companies suffering losses as a consequence of centralising the development of its business in a given sector or geographical area or with specific customers was also considered.

The Group's business concentration risk is considered low, given the high level of diversification in the type of products sold and the sales channels used and in the Company's customers. However, it should be noted that there is still a high level of concentration geographically speaking, with most of the business being in Portugal. Nevertheless, the Group is in the process of expanding its business internationally, in particular in markets outside Europe where it has already been carrying on its business.

### C.6.4. Legal risk

Although this risk is included in the definition of operational risk, the decision was made to analyse it separately, given both its importance and the method of assessment / measurement set out in the standard formula for operational risk, which does not allow for it to be highlighted.

The Group is constantly adapting to the rules in force (at both national and international level) and to the impacts that these have on its business. However, there is a risk, which is considered medium, resulting from potential regulatory changes.

Regarding fiscal changes to which it may become subject, we may highlight those related with deferred taxes, namely in terms of the tax rate and/or period for reporting tax losses.

Linked to this risk there is also the risk of possible changes to the level of tax benefits related with certain investment products. If these changes occur, some products may lose the competitive advantage associated with them, which leads to a risk related to sales of these products. Although this situation has already occurred in the past with some products, without any significant impact for the Group, this risk must still be considered.

In addition, the Group Companies are exposed to compliance risks during the normal course of their operations.

In conclusion, and considering all the points covered above, the legal risk associated with the Group is considered medium, due to the impacts that potential changes in the tax legislation would have and due to uncertainties related with the application of the Solvency II rules.

# C.7. Any other information

### C.7.1. Adjustment for the loss-absorbing capacity of deferred taxes

The Group Companies recognise adjustment for the loss-absorbing capacity of deferred taxes not only relating to the impact on deferred tax liabilities, but also the impact on deferred tax assets. In the case of recognition of adjustment relating to deferred tax assets, the companies test the recoverability of these taking into account estimated future tax profits following the shock, in a limited time period.

If there were no adjustment for the loss-absorbing capacity of deferred taxes, the solvency capital requirement coverage ratio would be 145.0%.

### C.7.2. Risk sensitivity

The sensitivity of the solvency ratio, at 31 December 2023, to the main risks to which Longrun is exposed, expressed as an absolute impact on that ratio (in percentage points), is presented in the table below:

| Risk Type                           | Total effect |
|-------------------------------------|--------------|
| Equity value -20%                   | -1.0 p.p.    |
| Property value -10%                 | -6.3 p.p.    |
| Spread +100bps                      | -11.2 p.p.   |
| Interest Rate – Increase of 100 bps | +2.6 p.p.    |
| Interest Rate – Decrease of 50 bps  | -2.3 p.p.    |
| Interest Rate – Decrease of 100 bps | -5.0 p.p.    |

### At 31 December 2022, sensitivity of the solvency ratio was:

| Risk Type                           | Total effect |
|-------------------------------------|--------------|
| Equity value -20%                   | -3.8 p.p.    |
| Property value -10%                 | -7.4 p.p.    |
| Spread +100bps                      | -12.1 p.p.   |
| Interest Rate – Increase of 100 bps | +0.9 p.p.    |
| Interest Rate – Decrease of 50 bps  | -1.7 p.p     |
| Interest Rate – Decrease of 100 bps | n/a          |

Explanation of the Solvency II sensitivity analyses:

| Risk          | Scenario  |
|---------------|---|
| Equity        | Impact of a 20% decrease in the value of equity, including Equity funds.        |
| Property      | Impact of a 10% decrease in the value of property, including Real Estate Funds. |
| Spread        | Impact of a 100 bps (basis points) increase in debt securities.                 |
|               | Impact of a parallel increase of 100 bps (basis points) along the whole curve.  |
| Interest rate | Impact of a parallel decrease of 50 bps (basis points) along the whole curve.   |
|               | Impact of a parallel decrease of 100 bps (basis points) along the whole curve.  |

### C.7.3. Risk concentration

The table below presents significant concentrations of risk between entities within the scope of Group supervision and third parties which exceed 10% of the Group's solvency capital requirement:

Amounts in thousand euros

|         | Type and amount of exposure |            |         |                    |        |
|---------|-----------------------------|------------|---------|--------------------|--------|
| Country | Assets                      |            | Assets  |                    | ivos   |
|         | Equity                      | Obrigações | Equity  | Apólices de seguro | Equity |
| PT      | 2,084,418                   | 749,056    | 632,218 | 6,236,437          | 0      |
| GB      | 6,701                       | 841,290    | 891,265 | 0                  | 0      |
| ES      | 0                           | 865,514    | 0       | 0                  | 0      |
| IT      | 0                           | 776,649    | 0       | 0                  | 0      |
| PE      | 0                           | 405,858    | 0       | 0                  | 0      |
| FR      | 0                           | 330,596    | 0       | 0                  | 0      |
| LI      | 0                           | 0          | 281,119 | 0                  | 0      |
| IE      | 250,606                     | 144        | 15,968  | 0                  | 0      |
| LU      | 0                           | 0          | 221,141 | 0                  | 0      |

The amount of exposure in the 'Liabilities - Insurance policies' category corresponds to the sums insured per entity.

Regarding the 'Assets' exposures, the greatest concentration in the "Equity" category relates to the shares and equity securities of Fidelidade Property Europe (EUR 1,766,650 thousand) (a subsidiary of Fidelidade, which manages Fidelidade's real estate portfolio and for which the transparency-based approach is used in the calculation of risks and as such it is not consolidated in the economic balance sheet). In the "Bonds" category, the greatest concentrations are Italian, Spanish, Peruvian and Portuguese government bonds (EUR 776,649 thousand, EUR 749,833 thousand, EUR 405,858 thousand and EUR 405,760 thousand respectively) and the HSBC Group.

Within the category "Assets – Other Investments", the greatest exposures are to Tenax (a British fund manager majority owned by Fidelidade) and the Caixa Geral de Depósitos, S.A. group.

### C.7.4. SCR - other undertakings

The SCR of other undertakings was EUR 50.5 million.

The companies included in this module are:

- Luz Saúde
- Tenax
- SGOI

# D. Valuation for Solvency Purposes

In this chapter we present information on the valuation of the assets, technical provisions and other liabilities for solvency purposes and compare this valuation with that used in the financial statements, with reference to 31 December 2023.

The same information, for solvency purposes, is presented in relation to 31 December 2022.

During the period covered by this report, there were no material changes, when compared with the period covered by the previous report, in the bases, methods and main assumptions used for the valuation of the assets or in the relevant assumptions used to calculate the technical provisions.

The following paragraphs describe the bases, methods and main assumptions used for the valuation for solvency purposes, which breaks down as follows:

Amounts in thousand euros

|       |                               | Solvency II | Financial statements | Difference | Solvency II<br>previous year |
|-------|-------------------------------|-------------|----------------------|------------|------------------------------|
| Asse  | ts                            |             |                      |            |                              |
| D.1   | Total Assets                  | 18,299,358  | 18,878,672           | -579,314   | 18.165.713                   |
| Liabi | ities                         |             |                      |            |                              |
| D.2   | Technical Provisions          | 12,990,047  | 14,064,577           | -1,074,530 | 13.192.999                   |
| D.3   | Other liabilities             | 2,484,849   | 2,205,840            | 279,009    | 2.267.142                    |
| Total | Liabilities                   | 15.474.896  | 16,270,417           | -795,521   | 15,460,141                   |
| Exce  | ss of assets over liabilities | 2.824.462   | 2,608,255            | 216,207    | 2,705,572                    |

### D.1. Assets

The valuation of the assets for solvency purposes and a comparison with that used in the financial statements is presented in this report, segmented into:

- Financial assets:
- Real estate assets;
- Other assets; and
- Reinsurance recoverables.

This chapter also includes reinsurance and special purpose vehicles recoverables.

The table below summarises the comparison, which is discussed further in the sub-chapters below:

Amounts in thousand euros

| Assets                   | Solvency II | Financial statements | Difference | Solvency II<br>previous year |
|--------------------------|-------------|----------------------|------------|------------------------------|
| Financial assets         | 15,905,731  | 16,052,374           | -146,643   | 15.432.852                   |
| Real estate assets       | 542.077     | 521.151              | 20.926     | 627,971                      |
| Other assets             | 1,425,163   | 1,548,966            | -123,803   | 1,744,438                    |
| Reinsurance recoverables | 426,387     | 756,181              | -329,794   | 360,452                      |
| Total                    | 18,299,358  | 18,878,672           | -579,314   | 18,165,713                   |

#### D.1.1. Financial assets

The table below presents the valuation of the financial assets for solvency purposes, by class of asset.

Amounts in thousand euros

| Assets   | Solvency II | Solvency II<br>previous year |
|--|-------------|------------------------------|
| Holdings in related undertakings, including participations | 2,400,378   | 2,332,692                    |
| Equities — listed  | 363,860     | 420,655                      |
| Equities — unlisted  | 30,703      | 29,228                       |
| Government bonds   | 2,619,438   | 2,947,707                    |
| Corporate bonds  | 5,311,255   | 5,240,734                    |
| Structured notes   | 188,770     | 172,754                      |
| Collateralised securities                                  | 0           | 0                            |
| Collective investment undertakings                         | 696,509     | 685,339                      |
| Derivatives  | 184,812     | 112,175                      |
| Deposits other than cash equivalents                       | 364,468     | 356,932                      |
| Other investments  | 0           | 0                            |
| Assets held for index-linked and unit-linked contracts     | 3,745,538   | 3,134,636                    |
| Total  | 15,905,731  | 15,432,852                   |

For solvency purposes, financial assets are valued in line with the following bases, methods and assumptions.

Financial assets are registered at fair value, which corresponds to the amount for which a financial asset could be sold or a liability settled between independent, knowledgeable parties interested in concluding the transaction in normal market conditions (exit price).

To determine the fair value of financial instruments, assets are classified according to the fair value hierarchy criteria defined as part of IFRS 13 (Fair Value Measurement). Within the scope of the Solvency II rules, those hierarchy criteria are defined by the method of valuing assets according to the following categories:

QMP - Quoted market price in active markets for the same assets

In this category, the fair value is determined considering the bid price in the active market available on the electronic platform.

QMPS - Quoted market price in active markets for similar assets

In this category, fair value is determined by considering the prices obtained from the market maker.

AVM - Alternative valuation methods

The Longrun Group does not make valuations from financial models.

AEM - Adjusted equity method

Assets considered in this category are initially recognised at cost and are periodically subjected to revaluation in line with the financial statements disclosure.

IEM - IFRS equity methods

Not currently applicable.

MV - Market valuation

Not currently applicable.

The table below presents a comparison of the valuation of financial assets for solvency purposes and their valuation in the financial statements.

Amounts in thousand euros

| Assets   | Solvency II | Financial statements | Difference |
|--|-------------|----------------------|------------|
| Holdings in related undertakings, including participations | 2,400,378   | 2,484,050            | -83,672    |
| Equities — listed  | 363,860     | 363,859              | 1          |
| Equities — unlisted  | 30,703      | 30,776               | -73        |
| Government bonds   | 2,619,438   | 2,627,325            | -7,887     |
| Corporate bonds  | 5,311,255   | 5,315,343            | -4,088     |
| Structured notes   | 188,770     | 188,770              | 0          |
| Collateralised securities                                  | 0           | 0                    | 0          |
| Collective investment undertakings                         | 696,509     | 698,935              | -2,426     |
| Derivatives  | 184,812     | 185,605              | -793       |
| Deposits other than cash equivalents                       | 364,468     | 411,420              | -46,952    |
| Other investments  | 0           | 0                    | 0          |
| Assets held for index-linked and unit-linked contracts     | 3,745,538   | 3,746,291            | -753       |
| Total  | 15,905,731  | 16,052,374           | -146,643   |

The main differences, by class of asset, are as follows:

Holdings in related undertakings, including participations

This results from the valuation, for solvency purposes, of unlisted subsidiaries using the Adjusted Equity Method (AEM). The total net value of these holdings for solvency purposes fell by 83,672 thousand euros.

The total difference includes (among less relevant others) the impacts of the valuation of Luz Saúde S.A. by the Adjusted Equity Method (the value of this participation, for solvency purposes, fell by 296,904 thousand euros) and of Fidelidade Property Europe (increase of 212,590 thousand euros in the valuation for solvency purposes).

### Equities - listed

This results from valuation adjustments to standardise prices of assets held in more than one geography, the valuations of which in the individual accounts were obtained at different times (different time zones).

#### Equities - unlisted

This results from the valuation, for solvency purposes, of unlisted securities using the Adjusted Equity Method (AEM).

#### Government bonds

The difference corresponds to potential gains from the portfolio of financial assets valued at amortised cost recognised in Solvency II.

#### Corporate bonds

This results from valuation adjustments to standardise exchange rates on assets held outside the Euro area and the price of assets held in more than one geography.

### Collective investment undertakings

This results from funds valuation adjustments where the look-through approach was applied. In the statutory financial statements, the available valuation at the close of accounts date was considered. In some funds this did not correspond to

the year-end valuation. For Solvency II purposes, it was possible to consider the year-end valuation that was made available in the meantime by the collective investment undertakings.

#### **Derivatives**

The Solvency II adjustment in this heading is justified by the revaluation made to reflect the full economic impacts on the Solvency II Balance Sheet, relating to the sale/purchase option existing over 12.1% of the capital of Fidelidade Moçambique – Companhia de Seguros S.A. (previously Seguradora Internacional de Moçambique, S.A.). These impacts are reflected in other balance sheet headings, namely "Holdings in related undertakings, including participations" and "Financial liabilities other than debts owed to credit institutions".

#### Deposits other than cash equivalents

Most of the Solvency II adjustment is due to the fact that as of the Q4 2022 report, assets relating to margin and collateral accounts were no longer included under the balance sheet heading "Deposits other than cash equivalents" due to a change in the classification. Following the ASF's guidelines, this amount is now reflected under the heading "Any other assets, not elsewhere shown". The remaining amount of the adjustment is due to reclassifications under Solvency II.

#### Assets held for index-linked and unit-linked contracts

The difference results from adjustments to the valuation of the funds in unit-linked portfolios, where the look-through approach was applied. In the financial statements, the available valuation at the close of accounts date was considered. In some funds this did not correspond to the year-end valuation. For Solvency II purposes, it was possible to consider the year-end valuation that was made available in the meantime by the collective investment undertakings. The remaining amount of the adjustment is due to reclassifications under Solvency II.

### D.1.2. Real estate assets

The table below presents the valuation of real estate assets for solvency purposes, by class of asset.

Amounts in thousand euros

| Assets   | Solvency II | Solvency II<br>previous year |
|--|-------------|------------------------------|
| Property, plant and equipment held for own use | 161,021     | 154,626                      |
| Property (other than for own use)              | 231,698     | 257,825                      |
| Collective investment undertakings             | 149,358     | 215,520                      |
| Total  | 542,077     | 627,971                      |

For solvency purposes, real estate assets are valued in line with the following bases, methods and assumptions.

The Companies' real estate assets are accounted for at their Market Value, which is the price for which the property could be sold, at the valuation date, in a private agreement between an independent and interested vendor and purchaser, it being implied that:

- i) the asset is put up for sale on the market;
- ii) the conditions of sale permit a regular sale;
- iii) the period for negotiating the sale is normal, considering the nature of the property.

Following this, one of the following valuation methods is used to determine the Market Value:

### Market Approach

The Market Approach consists of determining the value of a property by comparing it with identical or similar properties, according to the information available on the market regarding transaction values or prices practiced for comparable properties.

In line with this approach, the value of the property is the result of adjustment to the values and prices obtained on the market, in the light of the location and physical characteristics of the property being valued.

### Cost Approach

The Cost Approach consists of applying the principle that a purchaser will not pay more for an asset than the cost of obtaining another with the same level of utility, whether through purchase or construction, unless undue time, inconvenience, risk or other factors are involved.

This approach provides an indication of value by calculating the current replacement or reproduction cost of the asset and deducting for deterioration and all other relevant forms of obsolescence.

#### Income Approach

The Income Approach considers information relating to the income and operating expenses of the property being valued, determining the value by a capitalisation process. In this approach, taking into account the principle of replacing the asset, it is assumed that at a given rate of return required by the market, the revenue flow generated by the property will lead to its most probable fair value.

Accordingly, the estimate of the property's value results from converting the income it generates (usually the net revenue) by applying a given capitalisation rate or update rate, or even both, which reflects the expected level of return on the investment.

In order to comply with the regulations applicable to the Portuguese insurance sector, the following method is applied to value the real estate assets of the Group companies:

- It is necessary, unless otherwise stated in the paragraphs below, to follow the property valuation criteria defined for insurance sector entities within the scope of the Conselho Nacional de Supervisores Financeiros (CNSF) [National Board of Financial Supervisors], namely as set out in the future regime of the document "A Avaliação e Valorização de Property Uma Abordagem Integrada para o Sistema Financeiro Português" [Appraisal and Valuation of Property An Integrated Approach for the Portuguese Financial System];
- Besides being registered with the Portuguese Securities Market Commission (except for valuation processes outside Portuguese territory, for which local valuers are accepted) and having taken out general liability insurance, the valuer must be a RICS member, and follow RICS standards;
- Where a property's market value is estimated to be over EUR 2.5 million, two valuations are performed by different experts, and the lower value prevails;
- It is necessary to use at least one of the three methods in IFRS 13, with the Income Approach being compulsory;
- The valuation report must itemise the valuation of the land and the valuation of the building(s);
- In the case of buildings under the horizontal property regime, the valuation report must also allocate valuations per unit, that is, it must include a breakdown of the quota share of the land and the building(s) per unit;
- The valuation report may include a sensitivity analysis regarding the most relevant variables in the valuation;
- Following a principle of prudence, real estate assets must be revalued annually.

The table below presents a comparison of the valuation of real estate assets for solvency purposes and their valuation in the financial statements.

Amounts in thousand euros

| Assets   | Solvency II | Financial statements | Difference |
|--|-------------|----------------------|------------|
| Property, plant and equipment held for own use | 161,021     | 140,144              | 20,877     |
| Property (other than for own use)              | 231,698     | 231,698              | 0          |
| Collective investment undertakings             | 149,358     | 149,309              | 49         |
| Total  | 542,077     | 521,151              | 20,926     |

The differences, by class of asset, are:

Property, plant and equipment held for own use

In the financial statements the valuation at cost was considered, and hence the difference results from the fact that in Solvency II property is valued at fair value, as required by the Supervisory Authorities.

#### Collective investment undertakings

This results from funds valuation adjustments where the look-through approach was applied. In the statutory financial statements, the available valuation at the close of accounts date was considered. In some funds this did not correspond to the year-end valuation. For Solvency II purposes, it was possible to consider the year-end valuation that was made available in the meantime by the collective investment undertakings.

#### D.1.3. Other Assets

The table below presents the valuation of other assets for solvency purposes, by class of asset.

Amounts in thousand euros

| Assets  | Solvency II | Solvency II<br>previous year |
|---|-------------|------------------------------|
| Goodwill  | 0           | 0                            |
| Deferred acquisition costs  | 0           | 0                            |
| Intangible assets   | 0           | 0                            |
| Deferred tax assets   | 622,105     | 552,212                      |
| Pension benefit surplus   | 22,678      | 25,305                       |
| Loans and mortgages to individuals  | 0           | 0                            |
| Other loans and mortgages   | 48,956      | 12,402                       |
| Loans on insurance policies   | 1,699       | 1,503                        |
| Deposits to cedants   | 942         | 965                          |
| Insurance and intermediaries receivables  | 107,947     | 399,085                      |
| Reinsurance receivables   | 104,600     | 142,513                      |
| Receivables (trade, not insurance)  | 75,068      | 111,373                      |
| Own shares (held directly)  | 0           | 0                            |
| Amounts due in respect of own fund items or initial funds called up but not yet paid in | 0           | 0                            |
| Cash and cash equivalents   | 352,417     | 385,223                      |
| Any other assets, not elsewhere shown   | 88,751      | 113,857                      |
| Total   | 1,425,163   | 1,744,438                    |

Other assets are generally valued in the financial statements at fair value. Specific situations where that is not the case are explained in the following table, which presents a comparison of the valuation of other assets for solvency purposes and their valuation in the financial statements.

Amounts in thousand euros

| Assets  | Solvency II | Financial statements | Difference |
|---|-------------|----------------------|------------|
| Goodwill  | 0           | 122,036              | -122,036   |
| Deferred acquisition costs  | 0           | 15,401               | -15,401    |
| Intangible assets   | 0           | 279,379              | -279,379   |
| Deferred tax assets   | 622,105     | 402,731              | 219,374    |
| Pension benefit surplus   | 22,678      | 22,678               | 0          |
| Loans and mortgages to individuals  | 0           | 0                    | 0          |
| Other loans and mortgages   | 48,956      | 48,858               | 98         |
| Loans on insurance policies   | 1,699       | 1,694                | 5          |
| Deposits to cedants   | 942         | 942                  | 0          |
| Insurance and intermediaries receivables  | 107,947     | 113,112              | -5,165     |
| Reinsurance receivables   | 104,600     | 104,600              | 0          |
| Receivables (trade, not insurance)  | 75,068      | 75,068               | 0          |
| Own shares (held directly)  | 0           | 0                    | 0          |
| Amounts due in respect of own fund items or initial funds called up but not yet paid in | 0           | 0                    | 0          |
| Cash and cash equivalents   | 352,417     | 326,649              | 25,768     |
| Any other assets, not elsewhere shown   | 88,751      | 35,818               | 52,933     |
| Total   | 1,425,163   | 1,548,966            | -123,803   |

The differences, by class of asset, are:

### Goodwill and deferred acquisition costs

The value of these assets for solvency purposes is zero, in accordance with the Delegated Regulation.

### Intangible assets

In order for these assets to have a value in the balance sheet for solvency purposes, they must be able to be sold separately and, moreover, it would be necessary to demonstrate that there is an active market in which similar intangible assets are traded. Given that the Group's assets considered in this class do not meet these requirements, their value for solvency purposes is zero.

### Deferred tax assets

The difference results from the application of the tax rate to losses with taxable temporary differences implicit in the balance sheet for solvency purposes, that is, after adjustments with a negative impact on own funds.

#### Other loans and mortgages

The difference results from the evaluation for solvency purposes.

### Loans on insurance policies

This results from the difference, when negative, between the loan balances, which were considered in the valuation for Solvency purposes under the heading "Any other liabilities, not elsewhere shown" in other liabilities.

### Insurance and intermediaries receivables

The difference relates to receivables for reimbursement of amounts paid out in claims. This amount is considered in the technical provisions, given that its valuation for solvency purposes is net of these receivables.

#### Cash and cash equivalents

This results from the difference, when negative, between the balances of current accounts, which were considered in the valuation for Solvency purposes under the heading "Any other liabilities, not elsewhere shown" in other liabilities.

Any other assets, not elsewhere shown

As of the quarterly report relating to Q4 2022, assets relating to margin and collateral accounts were no longer included under the balance sheet heading "Deposits other than cash equivalents" due to a change in the classification. Following the ASF's guidelines, this amount is now reflected under the heading "Any other assets, not elsewhere shown".

#### D.1.4. Reinsurance and special purpose vehicles recoverables

Reinsurance recoverables were calculated according to methodologies in line with those used for the valuation of technical provisions, considering adjustment to reflect the probability of reinsurer default.

Recoverables in the Non-Life, Health SLT and Health NSLT lines of business were obtained based on the following assumptions:

- In each of the insurers in the Group, in the Non-Life, Health SLT and Health NSLT lines of business, when calculating the claims provision, the values of the accounting provisions of reinsurance ceded adjusted by the expected losses from counterparty default were assumed as the base value, and these were then distributed in annual future cash flows calculated on the basis of the future pattern of payments obtained for direct insurance in each of the lines of business. Longrun's values were obtained by consolidation, eliminating intra-group relations;
- The component of the provision for premiums in the Non-Life and Health NSLT lines of business was calculated as described in points D.2.2. and D.2.4.

Recoverables from the Life line of business were obtained based on the following assumptions:

■ To calculate Life reinsurance recoverables, projections are obtained of future premiums cash flows, claims, commissions and expenses in line with the reinsurance contracts, considering the contractual limits of the direct insurance contracts. All liabilities cash flows are based on the concept of expected value, insofar as they are linked to probabilities of occurrence of events to which they are subject, taking into account the time value of cash.

The expected inflation and interest rate structures referred to in points D.2.5 and D.2.6, respectively, were applied to the cash flows in the Life, Non-Life, Health SLT and Health NSLT lines of business.

The table below shows the amounts recoverable from reinsurance contracts and special purpose vehicles, by line of business.

Amounts in thousand euros

| Line of business   | Solvency II | Financial statements | Difference | Solvency II<br>previous year |
|--|-------------|----------------------|------------|------------------------------|
| Life and health similar to life, excluding health insurance and index-<br>linked and unit-linked | 88,354      | 110,902              | -22,548    | 87,500                       |
| Life, index-linked and unit-linked   | -192,525    | 0                    | -192,525   | -161,852                     |
| Non-life, excluding health insurance   | 496,139     | 591,217              | -95,078    | 399,332                      |
| Health similar to life   | 0           | 0                    | 0          | 0                            |
| Health similar to non-life   | 34,419      | 54,062               | -19,643    | 35,472                       |
| Total  | 426,387     | 756,181              | -329,794   | 360,452                      |

The differences result from the method applied to calculate the best estimate, which uses assumptions different to those considered in the financial statements, such as:

- Different discount structures of estimated liabilities:
- Methodological differences when valuing liabilities for remaining coverage reflected in the financial statements and in the Solvency II premium provision.

### D.2. Technical provisions

The valuation of technical provisions for solvency purposes and a comparison with that used in the financial statements is presented in this report, segmented into:

- Life;
- Non-Life;
- Health:
  - SLT (Similar to Life Techniques);
  - NSLT (Not Similar to Life Techniques).

The table below summarises the comparison, which is discussed further in the sub-chapters below:

Amounts in thousand euros

| Line of Business | Solvency II | Financial statements | Difference | Solvency II<br>previous year |
|------------------|-------------|----------------------|------------|------------------------------|
| Life             | 10,185,075  | 11,009,128           | -824,053   | 10,443,433                   |
| Non-Life         | 1,219,571   | 1,398,355            | -178,784   | 1,298,772                    |
| Health – SLT     | 1,117,119   | 1,181,444            | -64,325    | 984,228                      |
| Health – NSLT    | 468,282     | 475,650              | -7,368     | 466,566                      |
| Total            | 12,990,047  | 14,064,577           | -1,074,530 | 13,192,999                   |

The valuation of the technical provisions results from applying statistical methods which have a degree of uncertainty resulting from random factors which may not yet be reflected in the base information used, namely, market factors, legal changes and political factors.

However, this degree of uncertainty is lower due to the Companies held by Longrun not using simplifications when calculating the technical provisions.

### D.2.1. Life

The table below presents the value of the Life technical provisions by line of business, including the value of the best estimate, risk margin and the value of the application of the transitional measure on technical provisions:

Amounts in thousand euros

| Line of Business                        | Best estimate | Risk Margin | ТМТР     | Technical<br>Provisions | Technical Provisions previous year |
|---|---------------|-------------|----------|-------------------------|------------------------------------|
| Index-linked and unit-linked insurance  |               |             |          |                         |                                    |
| Contracts without options or guarantees | 2,922,399     | 52,560      | 0        | 2,974,959               | 2,675,767                          |
| Contracts with options or guarantees    | 245,380       | 42,264      | 0        | 287,644                 | 77,030                             |
| Capital redemption                      |               |             |          |                         |                                    |
| Contracts with profit sharing           | 1,356,695     | 9,195       | -94,946  | 1,270,944               | 1,420,486                          |
| Contracts without profit sharing        | 4,600,588     | 9,192       | -133,452 | 4,476,328               | 5,166,170                          |
| Risk                                    |               |             |          |                         |                                    |
| Contracts with profit sharing           | 17,294        | 223         | 0        | 17,517                  | 19,661                             |
| Contracts without profit sharing        | -136,915      | 115,193     | 0        | -21,722                 | -9,319                             |
| Annuities                               |               |             |          |                         |                                    |
| Contracts with profit sharing           | 78,172        | 3,777       | 0        | 81,949                  | 96,053                             |
| Contracts without profit sharing        | 1,068,127     | 26,773      | 0        | 1,094,900               | 996,951                            |
| Reinsurance accepted                    |               |             |          |                         |                                    |
| Reinsurance accepted                    | 2,556         | 0           | 0        | 2,556                   | 634                                |
| Total                                   | 10,154,296    | 259,177     | -228,398 | 10,185,075              | 10,443,433                         |

The Life technical provisions result from the sum of the best estimate and the risk margin less the transitional measure on technical provisions (TMTP).

The best estimate corresponds to the current value of future projected cash flows related to insurance contracts, including premiums, claims, commissions and expenses, discounted at the relevant interest rate term structures (see point D.2.6). Stochastic techniques were used when determining the time value of the options and guarantees.

Future cash-flow projections are obtained by applying probabilities of events occurring based on a historical analysis of these events in the Group's portfolio, in particular mortality, disability, survival, lapse, expense and inflation.

The risk margin of each insurer in the Group is calculated using the formula mentioned in Article 37(1) of Commission Delegated Regulation (EU) 2015/35, of 10 October 2014, that is, using the cost of capital method with a rate of 6%, and the Group risk margin is obtained by applying Article 340 of that same Regulation.

In this method capital corresponds to the solvency capital requirement of the Life Underwriting Risk, Operational Risk and Counterparty Risk (in the part corresponding to the Life segment), allocated by line of business.

The value of the best estimate results from the sum of the claims provision and the value of the best estimate of future cash flows from policies held in portfolio.

All liabilities cash flows are based on the concept of expected value, insofar as they are linked to probabilities of occurrence of events to which they are subject. These probabilities constitute second-order technical bases, and that expected value is therefore the Group's best estimate, following a historical analysis covering several years.

Income to calculate profit sharing, included in the claims estimates, was determined on the basis of assets held in portfolio at 31 December 2023 and their potential gains at that date. For such purpose, a "risk neutral" projection was made, in which different securities were subject to the reference interest rates curve (see point D.2.6), added to the recognition of potential gains at that date.

Therefore, in the case of fixed income securities, in order to determine the cash flows default probabilities were calculated so that the current value of those cash flows, discounted at the reference curve, was the same as the market value.

Profit sharing was calculated based on the minimum percentage of allocation, defined contractually.

For insurance with demographic risk, profit sharing was calculated on the technical and financial results and was distributed by payment in cash. In the case of annuities insurance, the profit-participation calculation also comes from the technical and financial results and was allocated by increase in future annuities. For capital redemption products, profit sharing was calculated on the financial results, and was allocated by addition to the mathematical provision, with the consequent increase in sums insured, that is, increase in the amounts paid at maturity, redemption or death.

The Monte Carlo method was used to determine the time value of the options and guarantees.

For unit-linked insurance without guarantees, the technical provision is calculated using the sum of the statutory technical provision (corresponding to the value of the assets) and the corresponding provision for expenses and risk margin. The provisions for expenses are calculated using the current value of the difference between the estimated expenses and the management costs charged at the end of each year.

For unit-linked insurance with guarantees, the best estimate is calculated using the current value of the best estimate of future cash flows, maturities, redemptions, claims, commissions, expenses and less any future premiums. When calculating the maturity cash flow, we consider the higher of the guaranteed value and the estimated value of the assets on the maturity date, with these figures being obtained based on their market value on the valuation date, on the reference curve (see point D.2.6) and net of the products' management costs.

Expenses are estimated using the unit costs calculated based on the total costs charged to unit-linked products in the previous year. Commissions are estimated in line with the distribution agreements for each product. Redemption and death cash flows are estimated based on probabilities calculated in line with the Group's past history.

The following calculation assumptions were used:

#### Decreases by Death and Disability

Mortality was analysed by class of products, namely: products in the event of death, in the event of life and the financial component. The disability risk was treated in the same way as the risk of death.

### Decreases by Redemption and Cancellation

Decreases by cancellations and decreases by redemption were determined according to the historical experience for each type.

#### **Technical Management Costs**

Since these come into play in determining the economic value of the existing business, the acquisition costs were removed from the total expenses charged to the Life Line of Business, at 31 December 2023.

### **Premiums**

For products with demographic risk all future premiums were considered, while for capital redemption products it was assumed that, if the policy is in force, the policyholder will comply with the established premiums payment plan, provided that the product's general and specific conditions so permit and only in scenarios in which the reference interest rate (see point D.2.6) is lower than the product's technical rate. For products whose contracts allow for extraordinary payments, the average payments made in the last five years were taken into account.

#### Commissions

Commissions cash flows were calculated based on the provision of services/ commissioning agreements in force in the Group, defined in the technical specifications and notes of the different types.

### Future management measures

Regarding future management measures, it was agreed to maintain the portfolio's asset mix at the valuation date. Thus, the proportion of each class of assets and the structure of securities within each class will tend to remain the same over time in the representation in the mathematical provisions.

### Policyholders' behaviour

Policyholders' behaviour in terms of redemptions and cancellations is that described in the point on Decreases by Redemption and Cancellation.

For capital redemption products the payment plans are dealt with in line with that set out in the point on Premiums.

### Risk margin

The risk margin of each insurer in the Group is calculated using the formula mentioned in Article 37(1) of Commission Delegated Regulation (EU) 2015/35, of 10 October 2014, that is, using the cost of capital method with a rate of 6%, and the Group risk margin is obtained by applying Article 340 of that same Regulation.

The table below presents a comparison of the valuation of Life technical provisions for solvency purposes and their valuation in the financial statements.

Amounts in thousand euros

| Line of Business                        | Technical Provisions | Financial statements | Difference |
|---|----------------------|----------------------|------------|
| Index-linked and unit-linked insurance  |                      |                      |            |
| Contracts without options or guarantees | 2,974,959            | 3,191,253            | -216,294   |
| Contracts with options or guarantees    | 287,644              | 303,765              | -16,121    |
| Capital redemption                      |                      |                      |            |
| Contracts with profit sharing           | 1,270,944            | 1,318,404            | -47,460    |
| Contracts without profit sharing        | 4,476,328            | 4,782,072            | -305,744   |
| Risk                                    |                      |                      |            |
| Contracts with profit sharing           | 17,517               | 91,309               | -73,792    |
| Contracts without profit sharing        | -21,722              | 391,142              | -412,864   |
| Annuities                               |                      |                      |            |
| Contracts with profit sharing           | 81,949               | 79,650               | 2,299      |
| Contracts without profit sharing        | 1,094,900            | 851,463              | 243,437    |
| Reinsurance accepted                    |                      |                      |            |
| Reinsurance accepted                    | 2,556                | 70                   | 2,486      |
| Total                                   | 10,185,075           | 11,009,128           | -824,053   |

In risk products, the differences basically justified by the different contractual limits used for the purposes of the technical provisions in the financial statements of a set of temporary annual renewable (TAR) group life contracts, as described in point D.5.2.. This recognition of future profits has a positive impact on the Group's solvency capital requirement coverage ratio of around 3.5 p.p.

For annuities products, the differences are essentially the result of applying the risk-free interest rate term structure.

The differences in the index-linked and unit-linked class arise from the current value of the difference between the estimated technical management costs and the future management costs.

For capital redemption products, without profit participation, the differences result, on the one hand, from the application of the transitional measure on technical provisions and, on the other, from the difference between the rates guaranteed to customers and the rates contained in the reference interest rates curve (see point D.2.6). For a set of products with profit sharing where the discretionary component is not materially significant, these were classified for the purposes of valuation of the technical provisions according to the financial statements, within the scope of IFRS 9.

### D.2.2. Non-Life

The table below presents the value of the Non-Life technical provisions by line of business, including the value of the best estimate and the risk margin.

Amounts in thousand euros

| Line of Business                            | Best estimate | Risk Margin | Technical Provisions | Technical Provisions previous year |
|---|---------------|-------------|----------------------|------------------------------------|
| Motor vehicle liablity insurance            | 486,419       | 11,767      | 498,186              | 468,237                            |
| Other motor insurance                       | 99,737        | 6,636       | 106,373              | 174,783                            |
| Marine, aviation and transport insurance    | 9,657         | 885         | 10,542               | 26,034                             |
| Fire and other damage to property insurance | 331,601       | 4,672       | 336,273              | 375,195                            |
| General liability insurance                 | 189,236       | 2,807       | 192,043              | 173,614                            |
| Credit and suretyship insurance             | -482          | 357         | -125                 | 5,585                              |
| Legal expenses insurance                    | 3,399         | 190         | 3,589                | 3,869                              |
| Assistance                                  | 40,777        | 1,578       | 42,355               | 38,879                             |
| Miscellaneous financial loss                | 28,798        | 1,537       | 30,335               | 32,576                             |
| Non-proportional reinsurance accepted       | 0             | 0           | 0                    | 0                                  |
| Other technical provisions                  | 0             | 0           | 0                    | 0                                  |
| Total                                       | 1,189,142     | 30,429      | 1,219,571            | 1,298,772                          |

The Non-Life technical provisions result from adding the value of the best estimate of the claims and premiums provisions and the risk margin.

The best estimate of Longrun's provisions is equal to the sum of the best estimate of the provisions of the different insurers in the Group, after elimination of intra-group effects.

The best estimate of the provisions of each insurer corresponds to the current value of future projected cash flows related to insurance contracts, including premiums, claims, commissions and expenses, discounted using the relevant interest rate term structures (see point D.2.6).

Future cash-flow projections are obtained by applying probabilities of events occurring based on a historical analysis of these events in the Group's portfolio, in particular claims, lapse, expense and inflation.

The risk margin of each insurer in the Group is calculated using the formula mentioned in Article 37(1) of Commission Delegated Regulation (EU) 2015/35, of 10 October 2014, that is, using the cost of capital method with a rate of 6%, and the Group risk margin is obtained by applying Article 340 of that same Regulation.

In this method capital corresponds to the solvency capital requirement of the Non-Life Underwriting Risk, Operational Risk and Counterparty Risk (in the part corresponding to the Non-Life segment), allocated by line of business.

The table below presents a comparison of the valuation of Non-Life technical provisions for solvency purposes and their valuation in the financial statements.

Amounts in thousand euros

| Line of Business                            | Technical Provisions | Financial statements | Difference |
|---|----------------------|----------------------|------------|
| Motor vehicle liablity insurance            | 498,186              | 505,397              | -7,211     |
| Other motor insurance                       | 106,373              | 154,183              | -47,810    |
| Marine, aviation and transport insurance    | 10,542               | 17,673               | -7,131     |
| Fire and other damage to property insurance | 336,273              | 419,783              | -83,510    |
| General liability insurance                 | 192,043              | 227,381              | -35,338    |
| Credit and suretyship insurance             | -125                 | -1,384               | 1,259      |
| Legal expenses insurance                    | 3,589                | 5,776                | -2,187     |
| Assistance                                  | 42,355               | 35,935               | 6,420      |
| Miscellaneous financial loss                | 30,335               | 33,611               | -3,276     |
| Non-proportional reinsurance accepted       | 0                    | 0                    | 0          |
| Other technical provisions                  | 0                    | 0                    | 0          |
| Total                                       | 1,219,571            | 1,398,355            | -178,784   |

The main differences identified between the amounts in the financial statements and the Solvency II technical provisions are the result of:

- The application of different discounting structures;
- Methodological differences when valuing liabilities for remaining coverage reflected in the financial statements and in the Solvency II premium provision;
- Methodological differences when valuing the margin for non-financial risks in Solvency II (Risk Margin, in line with the standard formula) and in the financial statements (risk adjustment, in line with IFRS 17).

#### D.2.3. Health - SLT

The table below presents the value of the Health-SLT technical provisions by line of business, including the value of the best estimate, the risk margin and the value of the application of the transitional measure on technical provisions:

Amounts in thousand euros

| Line of Business  | Best estimate | Risk Margin | ТМТР     | Technical<br>Provisions | Technical<br>Provisions<br>previous year |
|---|---------------|-------------|----------|-------------------------|--|
| Health insurance (direct insurance)                                       |               |             |          |                         |  |
| Contracts without options or guarantees                                   | 0             | 0           | 0        | 0                       | 0  |
| Contracts with options or guarantees                                      | 0             | 0           | 0        | 0                       | 0  |
| Health insurance (reinsurance accepted)                                   |               |             |          |                         |  |
| Health insurance (reinsurance accepted)                                   | 0             | 0           | 0        | 0                       | 0  |
| Annuities stemming from non-life insurance c                              | ontracts      |             |          |                         |  |
| relating to health insurance obligations                                  | 1,196,747     | 98,214      | -177,842 | 1,117,119               | 984,228                                  |
| relating to insurance obligations other than health insurance obligations | 0             | 0           | 0        | 0                       | 0  |
| Total   | 1,196,747     | 98,214      | -177,842 | 1,117,119               | 984,228                                  |

The Health - SLT technical provisions result from adding the value of the best estimate of the claims provisions and the risk margin, adjusted by the transitional measure on technical provisions.

The Longrun's best estimate is equal to the sum of the best estimate of the different insurers in the Group, after elimination of intragroup effects.

The best estimate of the provisions of each insurer corresponds to the current value of future projected cash flows related to insurance contracts, including claims and expenses, discounted using the relevant interest rate term structures (see point D.2.6.).

Future cash-flow projections are obtained by applying probabilities of events occurring based on a historical analysis of these events in the Group's portfolio, in particular survival, expense and inflation.

The risk margin of each insurer in the Group is calculated using the formula mentioned in Article 37(1) of Commission Delegated Regulation (EU) 2015/35, of 10 October 2014, that is, using the cost of capital method with a rate of 6%, and the Group risk margin is obtained by applying Article 340 of that same Regulation.

In this method capital corresponds to the solvency capital requirement of the Health - SLT Underwriting Risk and Operational Risk (in the part corresponding to the Health - SLT segment).

The table below presents a comparison of the valuation of Health - SLT technical provisions for solvency purposes and their valuation in the financial statements.

Amounts in thousand euros

| Line of Business  | Technical Provisions | Financial statements | Difference |
|---|----------------------|----------------------|------------|
| Health insurance (direct insurance)                                       |                      |                      |            |
| Contracts without options or guarantees                                   | 0                    | 0                    | 0          |
| Contracts with options or guarantees                                      | 0                    | 0                    | 0          |
| Health insurance (reinsurance accepted)                                   |                      |                      |            |
| Health insurance (reinsurance accepted)                                   | 0                    | 0                    | 0          |
| Annuities stemming from non-life insurance contracts                      |                      |                      |            |
| relating to health insurance obligations                                  | 1,117,119            | 1,181,444            | -64,325    |
| relating to insurance obligations other than health insurance obligations | 0                    | 0                    | 0          |
| Total   | 1,117,119            | 1,181,444            | -64,325    |

Considering the adjustment of the transitional measure on technical provisions, the impact of revaluing the provisions results fundamentally from the evolution of the interest rates term structures referred to in point D.2.6.

#### D.2.4. Health - NSLT

The table below presents the value of the Health – NSLT technical provisions by line of business, including the value of the best estimate and the risk margin.

Amounts in thousand euros

| Line of Business                | Best estimate | Risk Margin | Technical Provisions | Technical Provisions previous year |
|---------------------------------|---------------|-------------|----------------------|------------------------------------|
| Medical expense insurance       | 145,247       | 7,805       | 153,052              | 174,765                            |
| Income protection insurance     | 64,233        | 10,157      | 74,390               | 61,036                             |
| Workers' compensation insurance | 222,757       | 18,083      | 240,840              | 230,765                            |
| Total                           | 432,237       | 36,045      | 468,282              | 466,566                            |

The Health – NSLT technical provisions result from adding the value of the best estimate of the claims and premiums provisions and the risk margin.

The Group's best estimate is equal to the sum of the best estimate of the different insurers in the Group, after elimination of intragroup effects.

The best estimate of the provisions of each insurer corresponds to the current value of future projected cash flows related to insurance contracts, including premiums, claims, commissions and expenses, discounted using the relevant interest rate term structures (see point D.2.6).

Future cash-flow projections are obtained by applying probabilities of events occurring based on a historical analysis of these events in the Group's portfolio, in particular claims, lapse, expense and inflation.

The risk margin of each insurer in the Group is calculated using the formula mentioned in Article 37(1) of Commission Delegated Regulation (EU) 2015/35, of 10 October 2014, that is, using the cost of capital method with a rate of 6%, and the Group risk margin is obtained by applying Article 340 of that same Regulation.

In this method capital corresponds to the solvency capital requirement of the Health - NSLT Underwriting Risk, Operational Risk and Counterparty Risk (in the part corresponding to the Health - NSLT segment), allocated by line of business.

The table below presents a comparison of the valuation of Health - NSLT technical provisions for solvency purposes and their valuation in the financial statements.

Amounts in thousand euros

| Line of Business                | Technical Provisions | Financial statements | Difference |
|---------------------------------|----------------------|----------------------|------------|
| Medical expense insurance       | 153,052              | 158,898              | -5,846     |
| Income protection insurance     | 74,390               | 74,949               | -559       |
| Workers' compensation insurance | 240,840              | 241,803              | -963       |
| Total                           | 468,282              | 475,650              | -7,368     |

The main differences identified between the amounts in the financial statements and the Solvency II technical provisions are the result of:

- The application of different discounting structures;
- Methodological differences when valuing liabilities for remaining coverage reflected in the financial statements and in the Solvency II premium provision;
- Methodological differences when valuing the margin for non-financial risks in Solvency II (Risk Margin, in line with the standard formula) and in the financial statements (risk adjustment, in line with IFRS 17).

#### D.2.5. Inflation rate

The following are used to calculate the best estimate in the life, non-life and health segments:

- In the European insurers in Longrun's perimeter the harmonised index of prices, three-year forecast, disclosed by Banco de Portugal in December 2023, is used. In the best estimate projections, 2.9% was considered in 2024 and 2.0% in 2025 and subsequent years;
- In the projections for the non-European insurers, future inflation is considered to follow the pattern implicit in the historical information used to estimate future cash flows.

#### D.2.6. Reference interest rates

For technical provisions in currencies for which the Supervisor does not publish interest rate structures (Peruvian Sols (PEN), Bolivian Bolivianos (BOB), Paraguayan Guaranis (PYG), Angolan Kwanzas (AOA), Mozambican Meticais (MZN), Cape Verdean Escudos (CVE), and Macanese Patacas (MOP), interest rate structures were calculated by applying a method similar to that considered by EIOPA, assuming as the basis of calculation for the first years the interest rate structure of Peruvian Government Bonds for PEN and PYG, Colombian Government Bonds for BOB, Brazilian Government Bonds for CVE, MZN and AOA, and Hong Kong Government Bonds for MOP and the long-term inflation rate expected by the respective Central Banks to determine the future behaviour of interest rate structures.

When valuing the remaining technical provisions in Solvency II, the Group used the relevant risk-free interest rate structures set out in Commission Implementing Regulation (EU) 2024/456, de 7 February 2024, without volatility adjustment.

In the financial statements, the following approaches were used, as established by IFRS 17:

| Segment  | Product Type                            | Approach            |
|----------|---|---------------------|
|          | Annuities                               | Top-down            |
| Life     | Risk                                    | Bottom-up           |
|          | Capital redemption with guaranteed rate | Stochastic approach |
| Non-Life | Reinsurance                             | Bottom-up           |
| Non-Lite | Direct Insurance                        | вошот-ир            |

### D.3. Other liabilities

The table below presents a comparison of the valuation of other liabilities for solvency purposes and their valuation in the financial statements.

Amounts in thousand euros

| Liabilities  | Solvency II | Financial statements | Difference | Solvency II<br>previous year |
|--|-------------|----------------------|------------|------------------------------|
| Contingent liabilities   | 0           | 0                    | 0          | 0                            |
| Provisions other than technical provisions                         | 38,735      | 38,735               | 0          | 46,191                       |
| Pension benefit obligations  | 8,352       | 8,352                | 0          | 7,067                        |
| Deposits from reinsurers   | 57,551      | 57,551               | 0          | 54,603                       |
| Deferred tax liabilities   | 617,794     | 196,611              | 421,183    | 542,033                      |
| Derivatives  | 310,725     | 311,511              | -786       | 171,924                      |
| Debts owed to credit institutions                                  | 4,891       | 4,891                | 0          | 0                            |
| Financial liabilities other than debts owed to credit institutions | 61,347      | 49,863               | 11,484     | 41,020                       |
| Insurance and intermediaries payables                              | 216,765     | 216,765              | 0          | 224,209                      |
| Reinsurance payables   | 314,325     | 480,198              | -165,873   | 347,703                      |
| Payables (trade, not insurance)                                    | 153,755     | 153,755              | 0          | 126,096                      |
| Subordinated liabilities   | 482,667     | 503,326              | -20,659    | 462,590                      |
| Any other liabilities, not elsewhere shown                         | 217,942     | 184,282              | 33,660     | 243,706                      |
| Total  | 2,484,849   | 2,205,840            | 279,009    | 2,267,142                    |

Other liabilities are generally valued in the financial statements at fair value. Specific situations where that is not the case are described below.

The differences, by class of liability, are:

### Deferred tax liabilities

The difference results from the application of the tax rate to gains with taxable temporary differences implicit in the balance sheet for solvency purposes, that is, after adjustments with a positive impact on own funds.

#### Derivatives

The Solvency II adjustment in this heading is justified by the revaluation made to reflect the full economic impacts on the Solvency II Balance Sheet, relating to the sale/purchase option existing over 12.1% of the capital of Fidelidade Moçambique – Companhia de Seguros S.A. (previously Seguradora Internacional de Moçambique, S.A.). These impacts are reflected in other balance sheet headings, namely "Holdings in related undertakings, including participations" and "Financial liabilities other than debts owed to credit institutions".

#### Financial liabilities other than debts owed to credit institutions

The Solvency II adjustment in this heading is justified by the revaluation made to reflect the full economic impacts on the Solvency II Balance Sheet, relating to the sale/purchase option existing over 12.1% of the capital of Fidelidade Moçambique – Companhia de Seguros S.A. (previously Seguradora Internacional de Moçambique, S.A.). These impacts are reflected in other balance sheet headings, namely "Holdings in related undertakings, including participations" and "Derivatives".

### Reinsurance payables

The difference relates to reinsurance ceded payables for reimbursement of amounts paid from index-linked and unit-linked contracts. For solvency purposes these payables are included in the Life reinsurance recoverables, index-linked and unit-linked, the valuation of which was net of these.

#### Subordinated liabilities

The difference is due to the fact that in Solvency II subordinated liabilities are valued at fair value, while in the financial statements they are initially recognised at fair value (less directly related transaction costs) and subsequently measured at amortised cost.

Any other liabilities, not elsewhere shown

This results from the difference, when negative, between the balances of current accounts related with futures contracts and the components relating either to the valuation of unmatured contracts (recorded under the heading "Derivatives") or to the initial margin (collateral), which were considered in the financial statements valuation under the heading "Any other assets, not elsewhere shown", and "Sight deposits" with negative balances which were considered in the financial statements valuation under the heading "Cash and cash equivalents".

### D.4. Alternative valuation methods

As mentioned in point D.1.1 of this report, Longrun does not make valuations from financial models.

### D.5. Any other information

#### D.5.1. Information on the valuation for solvency purposes

The bases, methods and main assumptions used at Group level for the valuation of assets, technical provisions and other liabilities for solvency purposes do not differ from those used in any of the Group's European subsidiaries for valuation for solvency purposes of the respective assets, technical provisions and other liabilities.

### D.5.2. Extension of the contract boundaries of temporary annual renewable insurance contracts

When calculating the best estimate of the Life obligations relating to temporary annual renewable (TAR) life insurance contracts, the contract boundary considered is the date of the next renewal except for contracts for which the Group has provenly waived the unilateral right to terminate the contract and to reject or amend the tariffs in force.

For these contracts, which are all linked to mortgages, for the purpose of valuing their technical provisions, the Group considered their contract boundary to be the maturity of the mortgage agreement associated with each adhesion, and for contracts with the "Funeral Service Organisation and Expenses" and "Adjustment of the funeral service to a Vault, Drawer or Perpetual Grave" covers the boundary was considered to be indefinite, and lapse probabilities were taken into account. Although the reinsurance treaty associated with these contracts is of annual duration, when calculating the reinsurance recoverables the Group assumed a time limit consistent with the limits of the insurance contract to which they relate, according to the understanding of the ASF. For the purposes of the Financial Statements profits are recognised over the duration of the contracts, so future profits are not yet recognised as own funds.

#### D.5.3. Application of the transitional deduction to technical provisions

Of the Group's subsidiaries, only Fidelidade applied, pursuant to Article 25 of Law No. 147/2015, of 9 September, the transitional deduction to technical provisions for similar to life obligations, in the following groups of homogeneous risks:

- Capital redemption products, with and without profit sharing;
- Health SLT, relating to obligations with workers' compensation insurance contracts.

ASF ruled that for 2019 the transitional deduction to technical provisions must be recalculated, based on 31 December 2018 information, and the reduction resulting from that calculation (if greater than the normal gradual reduction) must be reported on the first day of 2019.

Accordingly, the table below contains the respective amounts of the gross technical provisions and the reinsurance recoverables, for solvency purposes, with the reference date of 1 January 2019<sup>16</sup>, and in the financial statements, with the reference date of 31 December 2018. The initial amount of the transitional deduction applied is also shown:

Amounts in thousand euros

| Lines of business/ Homogeneous risk |  | Gross Technical Provisions |               |             | Reinsurance l           |              |           |  |
|-------------------------------------|--|----------------------------|---------------|-------------|-------------------------|--------------|-----------|--|
|                                     |  | Solvency II                |               | Financial   |                         | Transitional |           |  |
| groups                              |  | Financial<br>Statements    | Best estimate | Risk Margin | Financial<br>Statements | Solvency II  | Deduction |  |
| 29 and 33                           | Life insurance obligations - Health - SLT  | 699,747                    | 881,404       | 75,225      | 0                       | 0            | 256.882   |  |
| 30                                  | Life insurance obligations - Insurance with profit sharing - Capital redemption products     | 1,254,522                  | 1,382,107     | 9,559       | 0                       | 0            | 137.145   |  |
| 32                                  | Life insurance obligations - Other obligations similar to life - Capital redemption products | 5,087,284                  | 5,268,160     | 11,889      | 0                       | 0            | 192.764   |  |
| Total                               |  | 7.041.553                  | 7,531,671     | 96,673      | 0                       | 0            | 586,791   |  |

Pursuant to Article 25 of Law No. 147/2015, of 9 September, the Group applied the transitional deduction to technical provisions on the first day of 2023. The table below shows the amount of that deduction at 31 December 2023:

Amounts in thousand euros

|  |   | Transitional Deduction    |                    |  |                         |  |  |
|--|---|---------------------------|--------------------|--|-------------------------|--|--|
| Lines of business/ Homogeneous risk groups |   | Recalculation<br>1/1/2019 | Annual<br>decrease | Accumulated decrease to 31/12/2023 (4 years) | Amount at<br>31/12/2023 |  |  |
| 29 and 33                                  | Life insurance obligations - Health – SLT   | 256,882                   | -19,760            | -79,041                                      | 177,841                 |  |  |
| 30   | Life insurance obligations - Insurance with profit sharing - Capital redemption products        | 137,145                   | -10,550            | -42,198                                      | 94,947                  |  |  |
| 32   | Life insurance obligations - Other obligations similar to life -<br>Capital redemption products | 192,764                   | -14,828            | -59,312                                      | 133,452                 |  |  |
| Total                                      |   | 586,791                   | -45,138            | -180,551                                     | 406,240                 |  |  |

The following table quantifies the impact on the Group's financial condition, at 31 December 2023, of not applying this transitional deduction, namely the impact on the amount of the technical provisions, solvency capital requirement, minimum capital requirement, basic own funds and eligible own funds to meet the minimum capital requirement and the solvency capital requirement.

Amounts in thousand euros

| Solvency Capital Requirement (SCR) | 1,782,832                                    | 1,735,828                            | 47,003                               |  |
| SCR coverage ratio                 | 165.05%                                      | 156.10%                              |                                      |  |

The impact of the annual decrease in the transitional deduction to technical provisions, on the first day of 2024, is approximately 0.35% of the total amount of the technical provisions and 1.69 p.p. in the SCR coverage ratio, so the effects on the solvency position are immaterial.

<sup>&</sup>lt;sup>16</sup> Pursuant to Article 25 of Law No. 147/2015, of 9 September 2015, the ASF requested all insurance companies covered by the transitional rules to recalculate the transitional deduction, using information relating to 31 December 2018 as the basis for recalculation and with an effective date of 1 January 2019.

## E. Capital Management

During the period covered by this report, there were no significant changes related to the objectives, policies and processes adopted by Longrun to manage its own funds.

The changes which occurred in 2023, both in its own funds and in its solvency capital requirement are explained in this chapter.

Method 1 (the accounting consolidation-based method) described in Article 270 of the Legal Framework on the Taking-up and Pursuit of the Business of Insurance and Reinsurance, approved by Law No. 147/2015, of 9 September, was used to calculate the group's solvency, using data net of any intra-group transactions.

#### F.1. Own funds

#### E.1.1. Management of own funds

The new legal framework on the taking-up and pursuit of the business of insurance requires insurance undertakings to have an effective risk management system.

Accordingly, the own risk and solvency assessment, normally identified by the acronym ORSA, is considered a central element in this system, since, from a prospective vision, it relates risk, capital and return, in the context of the business strategy established by the insurance undertaking.

The ORSA exercise, which coincides with the Companies' strategic planning timeframe (never less than 3 years), plays a key role in the Companies' Capital Management, supporting their main activities, namely:

- Assessing, together with risk management, the risk appetite structure in relation to the business strategy and capital management strategy;
- Contributing to the commencement of the strategic planning process, through the performance of a capital adequacy assessment in the most recent period;
- Monitoring of capital adequacy in line with the regulatory capital requirements and the internal capital needs.

Considering the results obtained in the ORSA, and if the capital requirements are not in line with those defined, both in regulatory terms and in terms of other limits defined internally, corrective actions to be implemented are detailed, in order to restore the adequate/intended level of capital.

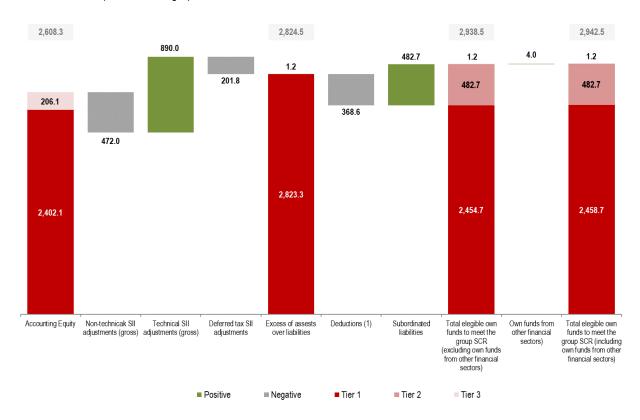

#### E.1.2. Structure, amount and tiering of own funds

The table below presents a comparison of the own funds as set out in Longrun's financial statements and the excess of assets over liabilities calculated for solvency purposes:

Amounts in thousand euros

|                                   | Solvency II | Financial statements | Difference | Solvency II previous year |
|-----------------------------------|-------------|----------------------|------------|---------------------------|
| Assets                            | 18,299,358  | 18,878,672           | -579,314   | 18,165,713                |
| Technical Provisions              | 12,990,047  | 14,064,577           | -1,074,530 | 13,192,999                |
| Other liabilities                 | 2,484,849   | 2,205,840            | 279,009    | 2,267,142                 |
| Excess of assets over liabilities | 2,824,462   | 2,608,255            | 216,207    | 2,705,572                 |

The difference is explained in the graph below in million euros:

(1) Deductions on Own Funds resulting from participations in credit and financial institutions and unavailable minority interests

The table below provides information on the structure, amount and tiering of the basic own funds and ancillary own funds, at 31 December 2023 and 31 December 2022.

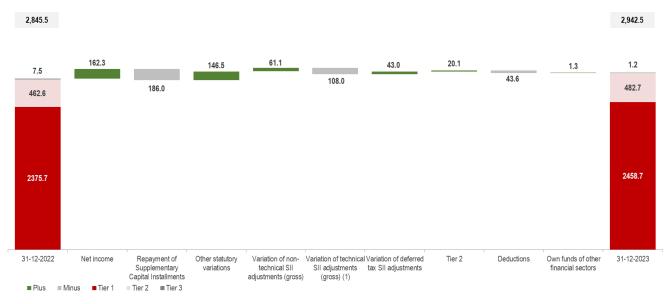

Amounts in thousand euros

|                                   |  |           |       |                      | III tilousaria euros         |

### E.1.3. Restrictions to the transferability and fungibility of own funds in subsidiaries

No restrictions were identified which affect the availability and transferability of the own funds of the subsidiaries, and which might affect the Group's Solvency position.

### E.2. Solvency capital requirement and minimum capital requirement

To calculate the solvency capital requirement, the Group applies the standard formula set out in Articles 119 to 129 of the Legal Framework on the Taking-up and Pursuit of the Business of Insurance and Reinsurance, approved by Law No. 147/2015, of 9 September, and does not use simplified calculations or specific parameters.

Calculation of the minimum capital requirement is in line with that set out in Article 147 of the aforementioned Legal Framework.

Information is presented below on the solvency capital requirement (SCR) and the minimum capital requirement (MCR) and also the respective coverage ratio, at 31 December 2023 and 31 December 2022.

| SCR s/ setor financeiro | 1,782,832            | 1,781,475                             | 164.82%        | 159.59%                         |
| MCR                     | 644,546              | 628,884                               | 400.84%        | 397.33%                         |

The table below provides a breakdown of the SCR by risk modules, with reference to 31 December 2023 and 31 December 2022, focusing, in particular, on the breakdown of the BSCR and the adjustments for the loss-absorbing capacity of the technical provisions and of deferred taxes.

Amounts in thousand euros

|   | SCR Breakdown | SCR Breakdown<br>previous year |
|---|---------------|--------------------------------|
| Market risk   | 1,311,958     | 1,372,785                      |
| Counterparty default risk   | 206,156       | 266,973                        |
| Life underwriting risk  | 424,945       | 433,628                        |
| Health underwriting risk  | 352,350       | 281,298                        |
| Non-life underwriting risk  | 327,185       | 302,259                        |
| Diversification   | -817,684      | -804,137                       |
| Intangible asset risk   | 0             | 0                              |
| Basic Solvency Capital Requirement  | 1,804,910     | 1,852,806                      |
| Operational risk  | 173,279       | 129,281                        |
| Loss-absorbing capacity of technical provisions   | -204          | -2,678                         |
| Loss-absorbing capacity of deferred taxes   | -246,975      | -235,406                       |
| Solvency capital requirement for companies using the consolidated method                                  | 1,731,010     | 1,744,003                      |
| Capital requirement for other financial sectors (capital requirements not linked to the insurance sector) | 1,365         | 1,091                          |
| Capital requirement for residual undertakings   | 50,457        | 36,381                         |
| Consolidated Group Solvency Capital Requirement   | 1,782,832     | 1,781,475                      |

Information on the main changes to the solvency capital requirement in the period covered by this report, and the reasons for those changes, are included in Chapter C.

E.3. Use of the duration-based equity risk sub-module in the calculation of the solvency capital requirement

The Fidelidade Group does not use the duration-based equity risk sub-module, set out in Article 125(5) of the Legal Framework on the Taking-up and Pursuit of the Business of Insurance and Reinsurance, approved by Law No. 147/2015, of 9 September.

E.4. Differences between the standard formula and any internal model used

As previously stated, the Longrun Group uses the standard formula, and does not apply any internal model.

E.5. Non-compliance with the minimum capital requirement and non-compliance with the solvency capital requirement

There was no failure to comply with the minimum capital requirement or the solvency capital requirement during the period covered by this report.

### E.6. Any other information

### E.6.1. Transitional measure on equity risk

The Group did not apply the transitional regime applicable to the equity risk set out in Article 20(2) and (3) of Law No. 147/2015, of 9 September.

### E.6.2. Futures, forwards and swaps contracts

Calculation of capital requirements of the currency risk sub-module includes the effect of hedging of exchange rate exposure of assets held in portfolio denominated in American dollars (USD), Hong Kong dollars (HKD) and Pounds sterling (GBP), via the use of futures and foreign exchange forwards and swaps, and of assets denominated in Yen (JPY) and Swiss francs (CHF), via the use of foreign exchange forwards.

The counterparty default risk module also takes into account exposure to counterparties with which the above-mentioned hedging is performed.

E.6.3. Solvency capital requirement and own funds of the group's insurance and reinsurance undertakings

The tables below present the solvency capital requirement of each of the Group's insurance and reinsurance undertakings included in the Longrun Group's solvency calculation:

### a) EEA Insurance Undertakings

c) Other regulated and non-regulated financial undertakings including insurance holding companies and mixed financial holding companies

Amounts in thousand euros

| Legal name of undertaking   | Capital requirement in line with sector rules | Minimum capital<br>requirement in line with<br>sector rules | Eligible own funds in line with sector rules |
|---|---|---|--|
| Fidelidade - Sociedade Gestora de Org. de Investimento Imobiliari | 609   | 125   | 1,849  |
| Tenax Capital Ltd   | 922   | 0   | 5,022  |

### E.6.4. Effects of Group diversification

Among the entities within the group's consolidation perimeter, Fidelidade's business has a very substantial weight, when compared with the other entities.

Accordingly, the effect of diversification resulting from the consolidation of the business of the Group's insurance and reinsurance undertakings is not significant, as can be seen in the table below:

### Amounts in thousand euros

|  | SCR       |  |
|--|-----------|--|
| Fidelidade - Companhia de Seguros, S.A.              | 1,492,206 |  |
| Fidelidade Assistência - Companhia de Seguros, S.A.  | 19,242    |  |
